Requirements

1. Do not install the oven over equipment that produces heat.
2. Do not operate the microwave oven with these items filled.
3. Do not block the air intake and air vents. Do not place anything on top of the oven. Failure to comply can damage the oven.
4. Do not remove the feet from the bottom of the oven.

5. Never remove the microwave cover that is screwed to the oven.

inner side wall. This cover protects the magnetron.

Setting up your oven

The oven should only be adjusted by a professional.

Do not install the oven if it is damaged.

Our Authorized Service Personnel.

WARNING:

is not misaligned and that it closes properly.

Check the oven for any damage, in particular, that there is no damage in any way. It is particularly important that the oven door door seals and sealing surfaces. Do not operate the oven if it is damaged in the door (such as dents, its hinges and latches and the damage to the door, etc.).

Do not place any objects between the oven front face and the door.

Specifications

**Audible tones**

Pressing any button, except the Stop button, will cause the oven to beep. This tones the button pressed.

A single beep is sounded as a button on the Control Panel is pressed.

**NEVER OPERATE THE MICROWAVE OVEN WHEN IT IS EMPTY**

**WARNING**

As this will cause damage to the oven.

Turn foods over during cooking to spread the cooking of products.

Cover food while cooking. The cover prevents splatter and helps retain heat and extra time (if required). Severely over-cooked food can smoke and burn.

Arrange the food with the thicker areas to the outside of the dish.

Do not cook directly on the glass tray. Place the food in a microwave-proof dish for example.

**Microwave basics**

The microwave oven is not suitable for cooking eggs with the shell on.
To check on the countdown progress, press the TIMER button. After the first 5 seconds the display will revert back to the clock time.

**NOTE**
Followed by one short beep to alert you that the timer has increments when the oven will sound one long beep.

1. Press the START button.
2. Enter the time required using the Number buttons.
3. Press the TIMER button.
4. The microwave will count down to zero in 1 second.

The oven can be used as a simple timer for any use where timed periods do 99 minutes and 99 seconds are required. The Timer and end of the period.

**Setting the Timer**

3. Use the SKWRS pad.
4. Press the CAKE pad.
Do not use aluminum foil in this oven.

Select the correct materials:

The lists shown on the next page are general guides to help you cook. Found around dishes are recommended in preference to square metal utensils which could cause sparks and/or a fire.

Do not use recycled paper products as they may contain small metal fragments that could cause sparks and/or a fire.

Microwaves cannot penetrate so metal utensils and dishes, through the container and heat only the food inside.

The ideal material for a microwave utensil or container is one that:
- Pyrex glass
- Glass, ceramic, or heat-resistant plastic
- Metal, aluminum, or copper
- Use of microwave cooking:
  - Carefully feel the container: if it becomes very hot do not use for microwaving.

Follow these steps:
- Place the empty container in the oven.
- Proceed below.

These may be certain non-metallic containers that are not safe to use for microwaving. If in doubt, you can test these following the Cookware Test:

Using the Microwave Oven

Ensure that the container is the correct size for the food to be cooked:

- Small containers need to be filled to at least half their capacity.
- Large containers can be filled to two-thirds of their capacity.

Use the microwave safe container in the oven:

- Place the container in the center of the turntable.
- Set the microwave power at 50%.
- Cook for 2 minutes.

Remove from microwave and check the food:

- If not cooked, return to microwave for another 2 minutes.
- If cooked, remove from microwave and allow to cool before handling.

Cleaning the microwave:

- Unplug the microwave from the power source.
- Remove all food from the container.
- Wash the container with warm soapy water.
- Rinse and dry thoroughly.

Caution:

- Do not overload the microwave with food.
- Do not use plastic wrap in the microwave.
- Do not use metal utensils in the microwave.
- Do not use microwave cooking:
  - Use of microwave cooking:
    - Carefully feel the container: if it becomes very hot do not use for microwaving.
- Place the empty container in the oven.
- Proceed below.

These may be certain non-metallic containers that are not safe to use for microwaving. If in doubt, you can test these following the Cookware Test.
Clean the inside of the oven with a soft cloth dampened with a mild detergent solution. To remove any food spills:

- Wipe the inside of the microwave oven thoroughly and dry with a soft cloth.
- Wipe the inside of the microwave oven thoroughly using a sponge or a cloth dampened with a mild detergent solution.

Cleaning or other abrasive pads:

- Never use, scrub pads or harsh cleaners; cleaning powders or
detergent solution rinsed wet with a clean damp cloth and wiped dry.

General Cleaning:

- A cover which gives protection against exposure to open flames.
- Repair operation which involves the removal of a compartment person to operate our any service or
component or part of the microwave oven.
- A cover which gives protection against exposure to open flames.

- Repair operation which involves the removal of a compartment person to operate our any service or
component or part of the microwave oven.
- A cover which gives protection against exposure to open flames.
6. When the cooking sequence ends, remove the cooked food. The microwave oven will be hot; take care when removing food.

WARNING

Progress is shown by pressing the CONVECTION button.
2. You can check the conversion percentage while cooking is in progress. By pressing the CONVECTION button, the percentage of the cooking time appears in display. To clear END button, press STOP/CANCEL button or open door for grill is 99.9%. After time set is expired, the oven beeps sound and END 1. Grill cooking power is set at full power. Maximum cooking time is 10 minutes.

NOTE

5. Press START button.
4. Use the number pads to enter cooking time.
3. Press GRILL button. The Grill symbol is displayed on the grill rack with a collecting tray below.
2. Place the food in a suitable container on the turntable of the oven. Make sure the system is reset by pressing the STOP/CANCEL pad.

Suppose you want to program grill cooking for 12 minutes. Suitable for hot sandwiches and small dishes. Choose sausages and pieces of chicken. It is also suitable for barbecue sausages and pieces of chicken. Grill cooking is particularly useful for thin slices of meat, steaks, and fish.

USING THE MICROWAVE OVEN

ENX5110SS Microwave Oven

NOTE

If the door is not opened, 3 beeps will sound every 2 minutes until the CANCEL pad is pressed. The door is displayed before starting another cooking session. Press the START/CANCEL pad to clean the display and reset the system.

After the cooking time ends, the system will beep four times and END.

USING THE MICROWAVE OVEN

ENX510CSS Microwave Oven

NOTE

If you want to cancel the cooking again by pressing the START/CANCEL pad once. Pressing the STOP/CANCEL pad twice will cancel the cooking program altogether. You can restart the cooking again by pressing the START/CANCEL pad once.
WARNING

1. Press the START button. The display shows Press MICRO + GRILL button once. The display shows.
2. Use the number pads to enter 1:20.
3. Press the START button. The display shows Press MICRO + GRILL button twice. The display shows:

Suppose you want to set combination 1 cooking for 15 minutes:

Combination 1

NOTE

2. During cooking, you can see the programmed setting by pressing the maximum cooking time that can be entered is 99:99.

This feature allows you to combine grill and microwave cooking.

Combination 2

NOTE

This feature allows you to combine grill and microwave cooking. But do not use the grill and microwave cooking simultaneously.

Combination cooking

There are two types of combination cooking.

1. Microwave and grilling

2. Microwave and convection

Using the microwave oven
**Using the Microwave Oven**

1. **Defrosting**
   - Suppose you want to defrost frozen food for five minutes.
   - Press **MICROWAVE + CONVECTION** button 1 to enter defrosting time.
   - Then use the number buttons to enter the number of minutes.
   - Press **START** button. The oven will start to defrost the food.

2. **Press Defrost**
   - Press Defrost button 1 to enter defrosting time.
   - Then use the number buttons to enter the number of minutes.
   - Press **START** button. The oven will start to defrost the food.

3. **Case 3**
   - If you need to defrost the food for less time, press Defrost button 5 and double zero.
   - Press **START** button. The oven will start to defrost the food.

4. **Case 2**
   - If you need to defrost the food for more time, press Defrost button 5 and double zero.
   - Press **START** button. The oven will start to defrost the food.

5. **Case 1**
   - If you need to defrost the food for the exact time, press Defrost button 5 and double zero.
   - Press **START** button. The oven will start to defrost the food.

**Defrosting Tips**
- For better results, use a small, shallow dish and arrange the food in a single layer.
- Check the food periodically to ensure even defrosting.
- If the food is not defrosted after the recommended time, continue defrosting in 30-second intervals.

**Cooking Tips**
- For best results, use microwave-safe containers and utensils.
- Cover food with microwave-safe lids or plastic wrap to retain moisture.
- Stir food occasionally to ensure even cooking.

**WARNING**
- Always remove the food from the oven when cooking is complete.
- Press **STOP/CANCEL** button to stop cooking at any time.
- Use microwave-safe containers to ensure safety.
- Do not overcook food, as this can lead to burns or fires.

**NOTE**
- The maximum cooking time is 9 hours, 99 minutes. After this time, the oven will automatically turn off.
- The maximum defrosting time is 99 minutes plus 99 seconds. After this time, the oven will automatically turn off.
3. Press the START button.
