When using recipes in this book always follow metric or imperial measurements. Do not combine the two. In some recipes the conversions are not a direct equivalent due to recipe result.

### Important Notice

Your oven is rated 1000 Watts (IEC). When using other cookbooks remember to adjust cooking times accordingly. The symbol above, which is displayed on your oven door, indicates the heating category for your oven when cooking or reheating convenience foods. Your oven is rated ‘E’, which is very efficient. It is therefore very important that you refer carefully to the packet instructions on convenience foods. Some packet instructions only display information for B or D rated ovens. We therefore provide additional guidelines for reheating on pages 47-55 of this book.

ALWAYS check the progress of the food as it cooks or reheats by simply opening the door and after checking the progress of the foods press START to continue the cooking time.

Failure to follow the instructions given in this Cookbook and Operating Instructions, may affect the recipe result and in some instances may be dangerous.
Welcome to Panasonic microwave cooking

Thank you for purchasing a Panasonic microwave oven.
Even if this is not your first microwave oven, do please read the opening chapters of this cookbook to achieve perfect results every time.

This microwave oven has the benefit of the Inverter System inside. This technology has been in use with microwave ovens in Japan for many years, improving the cooking performance of the oven. It also means that you benefit from having more space inside your oven, without taking up more room on your work surface.

Microwaves leave most foods tastier and leave you with less washing up, but don’t expect to become a perfect microwave cook overnight – some of the methods are very different to those used in conventional cooking.

We hope you enjoy using your new oven but should you require any further help or explanation, phone our

## Important safety instructions

Please read carefully and keep for future reference.

This appliance is supplied with a moulded three pin mains plug for your safety and convenience. A 13 amp fuse is fitted in this plug. Should the fuse need to be replaced, please ensure that the replacement fuse has a rating of 13 amps and that it is approved by ASTA or BSI to BS1362. Check for the ASTA mark  or the BSI mark  on the body of the fuse.

If the fitted moulded plug is unsuitable for the socket outlet in your home then the fuse should be removed and the plug cut off and disposed of safely and an appropriate one fitted. There is a danger of severe electrical shock if the cut off plug is inserted into any 13 amp socket.

If a new plug is to be fitted, please observe the wiring code as shown opposite. If in any doubt, please consult a qualified electrician (For U.K. Models only).

**WARNING:** THIS APPLIANCE MUST BE EARTHED.

### Important:

The wires in this mains lead are coloured in accordance with the following code: Green-and-yellow: Earth, Blue: Neutral, Brown: Live.

As the colours of the wire in the mains lead of this appliance may not correspond with the coloured markings identifying the terminals in your plug, proceed as follows:

- The wire which is coloured GREEN-AND-YELLOW must be connected to the terminal in the plug which is marked with the letter E or by the Earth symbol  or coloured GREEN or GREEN AND-YELLOW.
- The wire which is coloured BLUE must be connected to the terminal in the plug which is marked with the letter N or coloured BLACK.
- The wire which is coloured BROWN must be connected to the terminal in the plug which is marked with the letter L or coloured RED.

When this oven is installed it should be easy to isolate the appliance from the electricity supply by pulling out the plug or operating a circuit breaker.

### Voltage & power

The voltage used must be the same as specified on this microwave oven. Using a higher voltage than that which is specified is dangerous and may result in a fire or other type of accident causing damage.

Do not immerse cord, plug or oven in water. Keep cord away from heated surfaces. Do not let cord hang over the edge of table or work top. Do not plug your oven in via an extension cable as this can be dangerous. It is important to plug the oven directly into a wall socket.

The back of the appliance heats up during use. Do not allow the cord to be in contact with the back of the appliance or cabinet surface.
Unpacking your oven

1. **Examine your oven**
   Unpack oven, remove all packing material, and examine the oven for any damage such as dents, broken door latches or cracks in the door. Notify dealer immediately if unit is damaged. Do NOT install if unit is damaged.

2. **Guarantee**
   Your receipt is your guarantee, please keep it in a safe place.

3. **Cord**
   If the supply cord of this appliance is damaged, it must be replaced by the manufacturer or its service agent or a similarly qualified person in order to avoid a hazard.

**N.B.** The appliance should be inspected for damage to the door seals and door seal areas. If these areas are damaged the appliance should not be operated until it has been repaired by a service technician trained by the manufacturer.

Placement of your oven

1. This oven is suitable for countertop use only. It is not suitable for built-in use or use within a cupboard.

2. Oven must be placed on a flat, stable surface 850mm above floor level. For proper operation, the oven must have sufficient air flow, i.e. 5cm/2" at one side, the other being open; 15cm/6" clear over the top; 10cm/4" at the rear.

3. Do not place the microwave oven on a shelf directly above a gas or electric hob. This may be a safety hazard and the oven may be damaged.

4. Do not block air vents on the rear and bottom or top of the cabinet. Do not place any articles on the top of the oven over the vents. If air vents are blocked during operation, the oven may overheat. If the oven overheats, a thermal safety device will turn the oven off. The oven will remain inoperable with blank display until it has cooled.

5. Do not use outdoors.
**Caution: Hot surfaces**

1. **Hot surfaces**
   Exterior oven surfaces, including air vents on the cabinet and the oven door, will get hot during CONVECTION, COMBINATION and GRILLING. Use care when opening or closing door and when inserting or removing food and accessories. The oven has a heater situated in the top of the oven. After using the CONVECTION, COMBINATION and GRILL functions the roof and walls will be very hot.

2. **Children should be kept away from the oven at all times and should only be allowed to operate the oven under supervision. Ensure that children do not touch the hot outer casing after operation of the oven.**

3. **When the appliance is used in the combination mode, children should only use the oven under adult supervision due to the temperatures generated.**

---

**Before using your oven**

1. In the case of electronic failure, the oven can only be turned off at wall socket.

2. Only allow children to use the oven without supervision when adequate instructions have been given so that the child is able to use the oven in a safe way and understands the hazards of improper use. Ensure that children do not touch the hot outer casing after operation of the oven.

3. **Storage of accessories**
   Do not store any objects other than oven accessories inside the oven in case it is accidentally turned on.

4. **Before use**
   Before using CONVECTION, COMBINATION or GRILL function for the first time operate the oven without food and accessories (including glass turntable and roller ring) on GRILL 1 for 5 mins. This will allow the oil that is used for rust protection to be burned off. This is the only time that the oven is operated empty.

5. This appliance is not intended to be operated by means of an external timer or separate remote-controlled system.

6. This appliance is not intended for use by persons (including children) with reduced physical, sensory or mental capabilities, or lack of experience and knowledge unless they have been given supervision or instruction concerning use of the appliance by a person responsible for their safety. Children should be supervised to ensure that they do not play with the appliance.

---

CAUTION: All inside surfaces of the oven will be hot.
DO NOT OPERATE THE OVEN EMPTY.
(Apart from in point 4 above).
The appliance must not be operated by MICROWAVE or COMBINATION WITHOUT FOOD IN THE OVEN. Operation when empty will damage the appliance.
It is essential for the safe operation of the oven that it is kept clean, and wiped out after each use. Failure to maintain the oven in a clean condition could lead to deterioration of a surface that could adversely affect the life of the appliance and possibly result in a hazardous situation.

1. **Switch the oven off** before cleaning and unplug at socket if possible.

2. **Keep the inside of the oven, door seals and door seal areas clean.** When food splatters or spilled liquids adhere to oven walls, door seals and door seal areas wipe off with a damp cloth. Mild detergent may be used if they get very dirty. The use of harsh detergent or abrasives is not recommended. Take care when cleaning around the microwave feed guide.

3. **After using CONVECTION, GRILL or COMBINATION cooking** the walls of the oven should be cleaned with a soft cloth squeezed in soapy water. Particular care should be taken to keep the window area clean particularly after cooking by CONVECTION, GRILL or COMBINATION. Stubborn spots inside the oven can be removed by using a small amount of branded conventional oven-cleaner sprayed onto a soft damp cloth. Wipe onto problem spots, leave for recommended time and then wipe off. Avoid the microwave feed guide area and the door. DO NOT SPRAY DIRECTLY INSIDE THE OVEN.

4. The **outside oven surface** should be cleaned with a damp cloth. To prevent damage to the operating parts inside the oven, water should not be allowed to seep into the ventilation openings.

5. If the **control panel** becomes dirty, clean with a soft, dry cloth. Do not use harsh detergents or abrasives on the Control Panel. When cleaning the Control Panel, leave the oven door open to prevent the oven from accidentally turning on. After cleaning touch STOP/CANCEL Pad to clear display window.

6. **If steam accumulates** inside or around the outside of the oven door, wipe with a soft cloth. This may occur when the microwave oven is operated under high humidity conditions and in no way indicates a malfunction of the unit or microwave leakage.

7. It is occasionally necessary to remove the **glass turntable** for cleaning. Wash the turntable in warm soapy water. Do not place in the dishwasher.

8. The **roller ring and oven cavity floor** should be cleaned regularly to avoid excessive noise. Simply wipe the bottom surface of the oven, particularly the turntable spindle and the area surrounding this, with mild detergent and hot water then dry with a clean cloth. The roller ring may be washed in mild soapy water. Vapours may cause corrosion. After removing the roller ring from cavity floor for cleaning, be sure to replace it in the proper position.

9. **When GRILLING or cooking by COMBINATION or CONVECTION** some foods may splatter grease onto the oven walls. If the oven is not cleaned to eliminate this grease, it can accumulate and cause the oven to ‘SMOKE’ during use. These marks will be more difficult to clean later.

10. A steam cleaner is not to be used for cleaning.

11. Keep air vents clean at all times. Check that no dust or other material is blocking any of the air vents on the top, bottom or rear of the appliance. If air vents become blocked this could cause overheating which would affect the operation of the oven and possibly result in a hazardous situation.

12. Do not use harsh abrasive cleaners or sharp metal scrapers to clean the oven door glass since they can scratch the surface, which may result in shattering of the glass.
Maintenance of your oven

1. Service
   WHEN YOUR OVEN REQUIRES A SERVICE call your local Panasonic engineer (Customer Care Centre on 0844 8443868 who can recommend an engineer). It is hazardous for anyone other than a competent person to carry out any service or repair operation which involves the removal of a cover which gives protection against exposure to microwave energy.

2. Door seals
   Do not attempt to tamper with or make any adjustments or repairs to door, control panel housing, safety interlock switches or any other part of the oven. Do not remove outer panel from oven.
   The door seals and door seal areas should always be kept clean – use a damp cloth.
   **N.B.** The appliance should be inspected for damage to the door seals and door seal areas. If these areas are damaged the appliance should not be operated until it has been repaired by a service technician trained by the manufacturer.

3. Oven light
   The oven lamp must be replaced by a service technician trained by the manufacturer. **DO NOT** attempt to remove the outer casing from the oven.

4. Selected spares and accessories
   These may be ordered direct; on line at www.panasonic.co.uk or by telephoning the Customer Care Centre 0844 8443868. Most major credit and debit cards accepted. Ensure you quote the correct model number.
1. Do not operate the oven without the roller ring and glass turntable in place.
2. Only use the glass turntable specifically designed for this oven. Do not substitute with any other glass turntable.
3. If glass turntable is hot, allow to cool before cleaning or placing in water.
4. Do not cook directly on glass turntable. Always place food in a microwave safe dish. The only exception to this is when cooking jacket potatoes on microwave only.
5. If food or utensil on glass turntable touches oven walls, causing the turntable to stop moving, it will automatically rotate in the opposite direction. This is normal. Open oven door, reposition the food and restart.
6. The glass turntable can rotate in either direction. The maximum weight that can be placed on the turntable is 4kg (8lb 14oz) (this includes total weight of food and dish.)
7. While cooking by MICROWAVE or COMBINATION, turntable may vibrate. This will not affect cooking performance.
8. The metal accessories provided must ONLY be used as directed for GRILLING, CONVECTION and COMBINATION cooking. Never use them on MICROWAVE only. Do not use if operating the oven with less than 200g (7oz) of food on a manual COMBINATION program. FAILURE TO USE ACCESSORIES CORRECTLY COULD DAMAGE YOUR OVEN.
9. Arcing may occur if the incorrect weight of food is used, a metal container has been used incorrectly, or the accessories have been damaged. If this occurs, stop the machine immediately. You can continue to cook by GRILL OR CONVECTION ONLY.
10. Always refer to instructions for correct accessories to use on all programs. The glass turntable and roller ring are the only accessories used for MICROWAVE cooking. For CONVECTION and COMBINATION cooking the metal tray must ALWAYS be in place on the glass turntable.
Glass turntable
The glass turntable and roller ring are the only accessories used for microwave cooking.

1. The roller ring and oven floor should be cleaned frequently to prevent excessive noise.
2. The roller ring must always be used together with the glass turntable for cooking.

Door safety lock system
Push to open the door. Opening the door during cooking will stop the cooking process without cancelling the program. Cooking resumes as soon as the door is closed and Start is pressed. The oven light will turn on and stay on whenever the door is opened.
Safety

If smoke or a fire occurs in the oven, press Stop/Cancel pad and leave the door closed in order to stifle any flames.

Disconnect the power cord, or shut off power at the fuse or the circuit breaker panel.

Short cooking times

As microwave cooking times are much shorter than other cooking methods it is essential that recommended cooking times are not exceeded without first checking the food.

Cooking times given in the cookbook are approximate. Factors that may affect cooking times are: preferred degree of cooking, starting temperature, altitude, volume, size and shape of foods and utensils used. As you become familiar with the oven, you will be able to adjust these factors.

It is better to undercook rather than overcook foods. If food is undercooked, it can always be returned to the oven for further cooking. If food is overcooked, nothing can be done. Always start with minimum cooking times.

Important.

If the recommended cooking times are exceeded the food will be spoiled and in extreme circumstances could catch fire and possibly damage the interior of the oven.

1. **Small quantities of food.**

   Take care when heating small quantities of food as these can easily burn, dry out or catch fire if cooked too long. Always set short cooking times and check the food frequently.

   **NEVER OPERATE THE OVEN WITHOUT FOOD INSIDE ON MICROWAVE OR COMBINATION.**

2. **Foods low in moisture.**

   Take care when heating foods low in moisture, e.g. bread items, chocolate, biscuits and pastries. These can easily burn, dry out or catch on fire if cooked too long.

   We do not recommend heating foods low in moisture such as popcorn or poppadoms. This oven has been developed for food use only. We do not recommend that it is used for heating non food items such as wheat bags or hot water bottles.

3. **Christmas pudding.**

   Christmas puddings and other foods high in fats or sugar, e.g. jam, mince pies, must not be over heated. These foods must never be left unattended as with over cooking these foods can ignite.

4. **Boiled eggs.**

   Eggs in their shell and whole hard-boiled eggs should not be heated in microwave ovens since they may explode even after microwave heating has ended.
5. **Foods with skins.**

Potatoes, apples, egg yolk, whole vegetables and sausages are examples of food with non-porous skins. These must be pierced using a fork before cooking to prevent bursting.

6. **Liquids.**

Liquids and other foods must not be heated in sealed containers since they are liable to explode. When heating liquids, eg soup, sauces and beverages in your microwave oven, overheating the liquid beyond boiling point can occur without evidence of bubbling. This could result in a sudden boil over of the hot liquid. To prevent this possibility the following steps should be taken:

a) Avoid using straight-sided containers with narrow necks.

b) Do not overheat.

c) Stir the liquid before placing the container in the oven and again halfway through the heating time.

d) After heating, allow to stand in the oven for a short time, stirring again before carefully removing the container.

e) Microwave heating of beverages can result in delayed eruptive boiling, therefore care should be taken when handling the container.

7. **Lids.**

Always remove the lids of jars and containers and takeaway food containers before you microwave them. If you don’t then steam and pressure might build up inside and cause an explosion even after the microwave cooking has stopped.

8. **Deep fat frying.**

Do not attempt to deep fat fry in your oven.

9. **Meat thermometer.**

Use a meat thermometer to check the degree of cooking of roasts and poultry only when meat has been removed from the microwave. If undercooked, return to the oven and cook for a few more minutes at the recommended power level. Do not leave a conventional meat thermometer in the oven when microwaving.

10. **Paper, plastic.**

When heating food in plastic or paper containers, keep an eye on the oven due to the possibility of ignition. Do not use wire twist-ties with roasting bags as arcing will occur. Do not use re-cycled paper products, e.g. kitchen roll unless they say they are specifically designed for use in a microwave oven. These products contain impurities which may cause sparks and/or fires when used.

11. **Reheating.**

It is essential that reheated food is served “piping hot”.

Remove the food from the oven and check that it is “piping hot”, i.e. steam is being emitted from all parts and any sauce is bubbling. (If you wish you may choose to check the food has reached 72°C with a food thermometer – but remember do not use this thermometer inside the microwave.)

For foods that cannot be stirred, e.g. lasagne, shepherds pie, the centre should be cut with a knife to test it is well heated through. Even if a manufacturer’s packet instructions have been followed always check the food is piping hot before serving and if in doubt return your food to the oven for further heating.
12. Standing time.

Standing time refers to the period at the end of cooking or reheating when food is left before being eaten, i.e. it is a rest time which allows the heat in the food to continue to conduct to the centre, thus eliminating cold spots. See page 13.

13. Keeping your oven clean.

It is essential for the safe operation of the oven that it is wiped out regularly. Use warm soapy water, squeeze the cloth out well and use to remove any grease or food from the interior. Pay particular attention to the door seal area and also the areas around the microwave feed guide situated on the right hand side of the cavity wall. The oven should be unplugged when cleaning.

The oven will only operate on the GRILL function with the door closed.

15. Fan motor operation.

After using the microwave oven, the fan motor may operate to cool the electric components. This is normal and you can take out food even though the fan motor operates. You can continue using the oven during this time.

Before use check that utensils/containers are suitable for use in microwave ovens. See page 18.

17. Babies bottles and food jars.

When reheating babies bottles always remove top and teat. Liquid at the top of the bottle will be much hotter than that at the bottom and must be shaken thoroughly before checking the temperature. The lid must also be removed from babies food jars, the contents must also be stirred or shaken before the temperature is checked. This should be carried out before consumption in order to avoid burns.

18. Arcing

Arcing may occur if a metal container has been used incorrectly, if the incorrect weight of food is used, or if the accessories have been damaged. Arcing is when blue flashes of light are seen in the microwave oven. If this occurs, stop the machine immediately. If the oven is left unattended and this continues it can damage the machine.

You can continue to cook by GRILL OR CONVECTION ONLY.

19. Maximum weight on turntable

The maximum weight that can be placed on the turntable is 4kg (8lb 14oz) (this includes total weight of food and dish.)
Microwaving principles

Microwave energy has been used in this country to cook and reheat food since early experiments with RADAR in World War II. Microwaves are present in the atmosphere all the time, both naturally and from manmade sources.

Manmade sources include radar, radio, television, telecommunication links and mobile phones.

How Microwaves cook food

Reflection
The microwaves bounce off the metal walls and the metal door screen. In a microwave oven, electricity is converted into microwaves by the MAGNETRON.

Transmission
Then they pass through the cooking containers to be absorbed by the water molecules in the food, all foods contain water to a more or lesser extent.

The microwaves cause the water molecules to vibrate which causes FRICTION, i.e. HEAT. This heat then cooks the food. Microwaves are also attracted to fat and sugar particles, and foods high in these will cook more quickly. Microwaves can only penetrate to a depth of 1 1/2-2 inches (4-5 cm) and as heat spreads through the food by conduction, just as in a traditional oven, the food cooks from the outside inwards.

IMPORTANT NOTES
The dish used to cook or reheat the food will get warm during cooking, as the heat conducts from the food. Even when microwaving, oven gloves are required!

MICROWAVES CANNOT PASS THROUGH METAL AND THEREFORE METAL COOKING UTENSILS CAN NEVER BE USED IN A MICROWAVE, FOR COOKING ON MICROWAVE ONLY.

Foods not suitable for cooking by microwave only
Yorkshire puddings, souffles, double crust pastry pies.
This is because these foods rely on dry external heat to cook correctly, do not attempt to cook by microwave.
Foods that require deep fat frying cannot be cooked either.

Boiled eggs
Do not boil eggs in your microwave. Raw eggs boiled in their shells can explode and cause serious injury.

Standing time
When a microwave oven is switched off, the food will continue to cook by conduction – NOT BY MICROWAVE ENERGY. Hence STANDING TIME is very important in microwaving, particularly for dense foods i.e. meat, cakes and reheated meals (Refer to page 13).
General guidelines

Standing time

Dense foods e.g. meat, jacket potatoes and cakes, require a STANDING TIME (inside or outside of the oven) after cooking, to allow heat to finish conducting to cook the centre completely.

- MEAT JOINTS – Stand 15 mins. wrapped in aluminium foil.
- JACKET POTATOES – Stand 5 mins. wrapped in aluminium foil.
- LIGHT CAKES – Stand 5 mins. before removing from dish.
- RICH DENSE CAKES – Stand 15-20 mins.
- FISH – Stand 2-3 mins.
- EGG DISHES – Stand 1-2 mins.
- PRECOOKED CONVENIENCE FOODS – Stand for 1-2 mins.
- PLATED MEALS – Stand for 1-2 mins.
- VEGETABLES – Boiled potatoes benefit from standing for 1-2 mins., however most other types of vegetables can be served immediately.
- DEFROSTING – It is essential to allow standing time to complete the process. This can vary from 5 mins. e.g. raspberries, to up to 1 hour for a joint of meat.

If food is not cooked after STANDING TIME, return to oven and cook for additional time.
General guidelines

Piercing
The skin or membrane on some foods will cause steam to build up during cooking. These foods must be pierced or a strip of skin should be peeled off before cooking to allow the steam to escape. Eggs, potatoes, apples, sausages etc., will all need to be pierced before cooking. DO NOT ATTEMPT TO BOIL EGGS IN THEIR SHELLS.

Moisture content
Many fresh foods e.g. vegetables and fruit, vary in their moisture content throughout the season. Jacket potatoes are a particular example of this. For this reason cooking times may have to be adjusted throughout the year. Dry ingredients e.g. rice, pasta, can dry out further during storage and cooking times may differ from ingredients freshly purchased.

Cling film
Cling film helps keep the food moist and the trapped steam assists in speeding up cooking times. However it should be pierced before cooking, to allow excess steam to escape. Always take care when removing cling film from a dish as the build-up of steam will be very hot. Always purchase cling film that states on the packet “suitable for microwave cooking” and use as a covering only. Do not line dishes with cling film. Do not cover foods when cooking by COMBINATION, CONVECTION or GRILL.

Dish size
Follow the dish sizes given in the recipes, as these affect the cooking and reheating times. A quantity of food spread in a bigger dish cooks and reheats more quickly.
General guidelines

Quantity
Small quantities cook faster than large quantities, also small meals will reheat more quickly than large portions.

Spacing
Foods cook more quickly and evenly if spaced apart. NEVER pile foods on top of each other.

Shape
Even shapes cook evenly. Food cooks better by microwave when in a round container rather than a square container.

Density
Porous airy foods heat more quickly than dense heavy foods.
General guidelines

Covering
Foods cook more quickly and evenly if spaced apart. NEVER pile foods on top of each other.

Arranging
Individual foods e.g. chicken portions or chops, should be placed on a dish so that the thicker parts are to the outside.

Starting temperature
Food temperature should be between 5-8°C before cooking. The colder the food, the longer it takes to heat up. Food from a fridge takes longer to reheat than food at room temperature.

Turning and stirring
Some foods require stirring during cooking. Meat and poultry should be turned after half the cooking time. Remove metal spoon when microwaving.
General guidelines

Liquids
All liquids must be stirred before and after during heating. Water especially must be stirred before and during heating, to avoid eruption. Do not heat liquids that have previously been boiled. DO NOT OVERHEAT. Remove metal spoon when microwaving.

Checking Foods
It is essential that food is checked during and after a recommended cooking time, even if an AUTO PROGRAM has been used (just as you would check food cooked in a conventional oven). Return the food to the oven for further cooking if necessary.

Cleaning
As microwaves work on food particles, keep your oven clean at all times. Stubborn spots of food can be removed by using a branded oven cleaner, sprayed onto a soft cloth, always wipe the oven dry after cleaning. Avoid any plastic parts and door area. The back of the oven has a catalytic lining which is self cleaning.
Containers to use

Choosing the correct container is a very important factor in deciding the success or failure of your cooking.

Testing dishes for suitability - for microwave cooking only.

When unsure that a cooking container is suitable for use in your microwave, check by the following test:

1. Fill a microwave safe measuring jug with 300ml (1/2 pt) cold water.
2. Place it on the turntable alongside the dish to be tested. If the dish you are testing is a large dish, then stand the measuring jug on top of the empty dish.
3. Heat on HIGH power for 1 minute.

Result

If the dish is suitable for microwaving, it will remain cool, whilst the water in the jug will begin to feel warm. If the testing dish feels warm, do not use as it is obviously absorbing microwave energy.

N.B. This test does not apply to plastic or metal based containers e.g. Le Creuset® style dishes, which should not be used as they are cast iron covered with enamel.

Quick check guide to cooking utensils

Oven glass

Everyday glass that is heat resistant e.g. Pyrex®, is ideal for Microwave, Convection or Combination cooking. DO NOT USE FOR GRILLING. Do not use delicate glass or lead crystal which may crack or arc.

China and ceramic

Everyday glazed china, porcelain or ceramic plates, bowls, mugs and cups can be used if they are heat resistant. Fine bone china should only be used for reheating for short periods. Do not use dishes with a metal rim or pattern. Do not use jugs or mugs with glued handles, since the glue can melt. If dishes are heat resistant they may be used on Convection and Combination but not directly under the Grill.
**Containers to use**

**Pottery, earthenware, stoneware**

If completely glazed, these dishes are suitable. Do not use if partially glazed or unglazed, since they are able to absorb water which in turn absorbs microwave energy, making the container very hot and slows down the cooking of food.

**Foil/metal containers**

NEVER ATTEMPT TO COOK IN FOIL OR METAL containers on Microwave only as the microwaves cannot pass through and the food will not heat evenly, it may also damage your oven. Foil and metal containers can be used on GRILL and CONVECTION. Use wooden kebab sticks instead of metal skewers.

**Cling film**

Microwave cling film can only be used for covering food that is reheated by microwave. It is also useful for covering food to be cooked, but care should be taken to avoid the film being in direct contact with the food. DO NOT USE ON ANY OTHER COOKING MODE.

**Roasting bags**

Roasting bags are useful when slit up one side to tent a joint, for roasting by power and time. Do not use the metal twists supplied, when using Microwave or Combination.

**Aluminium foil**

Small amounts of smooth aluminium foil can be used to SHIELD joints of meat during defrosting and cooking by Microwave, as the microwaves cannot pass through the foil, this prevents the parts shielded from overcooking or overdefrosting. Take care that the foil does not touch the sides or roof of the oven, as this may cause arcing and damage your oven. Aluminium foil can be used for Convection cooking.
Plastic

Many plastic containers are designed for microwave use, but do not use for cooking foods high in sugar or fat or for foods that require long cooking times e.g. brown rice. Only use Tupperware® containers if they are designed for microwave use. Do not use Melamine. Never cook in margarine cartons or yoghurt pots, as these will melt with the heat from the food. If heatproof they can be used for Convection or Combination cooking. DO NOT USE UNDER THE GRILL.

Paper

Plain white absorbent kitchen paper (kitchen towel) can only be used for microwave cooking e.g. covering blind pastry cases and for covering bacon to prevent splattering. ONLY USE FOR SHORT COOKING TIMES. NEVER RE-USE A PIECE OF KITCHEN TOWEL. ALWAYS USE A FRESH PIECE OF PAPER FOR EACH DISH.

Avoid kitchen paper containing manmade fibres. If you are using branded re-cycled kitchen towel, check first that it is recommended for microwave use. Do not use waxed or plastic coated cups or plates as the finish may melt. Greaseproof paper can be used to line the base of dishes and to cover fatty foods e.g. bacon rashers, to stop splattering. White paper plates can be used for SHORT REHEATING TIMES, on Microwave only.

Wicker, wood, straw baskets

Dishes will crack and could ignite. Do not use wooden dishes in your microwave. DO NOT USE ON ANY COOKING MODE.

12. Ib/oz Conversion pad
13. Weight Selection pads
14. Stop/Cancel pad:
    Before cooking:
    one press clears your instructions.
    During cooking:
    one press temporarily stops the cooking program. Another press cancels all your instructions and the time of day will appear in the display.
15. Start pad:
    Press to start operating the oven. If during cooking the door is opened or Stop/Cancel pad is pressed once, Start pad has to be pressed again to continue cooking.

* The design of your control panel may vary from the panel displayed (depending on colour), but the words on the pads will be the same.

Beep sound:
A beep sounds when a pad is pressed. If this beep does not sound, the setting is incorrect. When the oven changes from one function to another, two beeps sound. After completion of cooking, five beeps sound.

NOTE: If an operation is set and Start Pad is not pressed, after 6 minutes, the oven will automatically cancel the operation. The display will revert back to clock mode.

This oven is equipped with an energy saving function.

Please Note:
1. When in stand-by mode the brightness of the display will be reduced.
2. The oven will enter stand-by mode, when first plugged in and immediately after the last operation has completed.
Let’s start to use your oven

1  Plug in
   Plug into a 13 amp fused electrical socket. You will be reminded to read your operating instructions.

2  Press clock pad
   Set clock as a 24hr clock. Set time using time pads. Press clock pad again. (See page 23 for details).

3  Press grill pad
   ( will appear in the display window with the grill setting)
   (This procedure is to burn off the oil used for rust protection in the oven.) Press once for Grill 1 (High). Remove all accessories from the oven.

4  Press time pad
   Press 1 min pad until 5 minutes is displayed in the window.

5  Press start pad
   The time will be displayed in the window and count down. The oven will beep at the end of the program. The oven is now ready to use.

6  Demonstration mode
   This is to enable you to experiment setting various programs. (The letter D will always appear in the display window. This is to confirm that there is no microwave power produced and it is safe to use the oven without any food). To select this mode press the Microwave Pad once and then Stop/Cancel 4 times. “Demo mode press any key” will appear. To cancel press the Microwave Pad once and then Stop/Cancel 4 times.

7  Child lock
   To operate the child lock facility press the Start pad three times, this will deactivate the microwave. “Lock” will appear in the display and none of the controls will operate. To clear child lock facility press Stop/Cancel three times.

* The design of your control panel may vary from the panel displayed (depending on colour), but the words on the pads will be the same.
Setting the clock

Example of how to set 11.25am.

- Press clock pad
  “SET TIME” will appear in the display window, and the colon starts to blink.

- Press time pads
  Enter time of day by pressing Time pads e.g. 11.25am (24hr clock).

- Press clock pad
  Colon stops blinking. Time of day is now locked into the display.

N.B.
1. To reset time of day, repeat step 1 through to step 3.
2. The clock will keep the time of day as long as the oven is plugged in and electricity is supplied.
3. This is a 24 hour clock.

- Press this pad until the power you require appears in the display window. The microwave symbol will also appear.

- Select cooking time

N.B.
1. Maximum time that can be set on HIGH power is 30 min.
2. On all power levels, except HIGH power, the maximum time that can be set is 99 minutes, 50 seconds. The 1h pad is inoperable.
Microwave cooking and defrosting

Accessory to use:

When using your oven on MICROWAVE only, the glass turntable provided must always be in position. DO NOT attempt to use microwave only with any metal accessory in the oven.

DO NOT place food directly onto the turntable except in the case of jacket potatoes cooked by MICROWAVE only.

Foods reheated or cooked by MICROWAVE only are normally covered with a lid or cling film, unless otherwise stated.

Two stage cooking:
e.g. High power 10 minutes followed by Simmer power 20 minutes; select High power and program 10 minutes then select second power (Simmer) with second cooking time (20 minutes) then press Start.

Three stage cooking:
e.g. High power 5 minutes, Delay 5 minutes, High power 2 minutes; select first power level and cooking time, then press DELAY and time, then select final power level and final cooking time. Then press Start.

Auto weight defrost - Chaos Defrost

With this feature you can defrost frozen foods according to the weight. Select the category and set the weight of the food. The weight can be programmed in pounds and ounces or grams. The weight starts from the minimum weight for each category.

- Select the desired program by pressing pad once, twice or three times. The microwave and defrost symbols will also appear.
- Press to select g or lb and oz. Default weight is g.
- Enter the weight by pressing the up & down pads. The “up” pad will start with the minimum weight for each food.
- Press Start.

Auto weight defrost programs

This feature allows you to defrost minced meat, chops, chicken portions, meat joints and bread. The CHAOS defrost pad should be pressed to select the correct category and then enter in the weight of the food in grams or pounds and ounces using the appropriate pads (See page 24).

Foods should be placed in a suitable dish, whole chickens and joints of meat should be on an upturned saucer or on a rack. Chops, chicken portions and slices of bread should be placed in a single layer. It is not necessary to cover the foods.

The CHAOS Theory principle is used in Auto Weight defrost programs to give you a quick and more even defrost.

The CHAOS system uses a random sequence of pulsing microwave energy which speeds up the defrosting process.

During the program the oven will beep to remind you to check the food.

IT IS ESSENTIAL THAT YOU TURN AND STIR THE FOOD FREQUENTLY AND SHIELD IF NECESSARY (See below and page 26).

On hearing the first beep you should TURN and SHIELD (if possible). On the second beep you should turn the food or break it up.

1st Beep

Turn

2nd Beep

Turn or break up

1st Beep

or Shield
Category 1 Bread

The Bread Program is suitable for defrosting small items e.g. rolls, buns and slices of bread which are required for immediate use. Small items may feel warm immediately after defrosting. Loaves can also be defrosted on this program but these will require standing time to allow the centre to thaw out. Standing time can be shortened if slices are separated and buns and loaves cut in half. Items should be turned halfway during defrosting. THIS PROGRAM IS NOT SUITABLE FOR CREAM CAKES OR DESSERTS e.g. cheesecake.

Category 2 Meat items (mince/chops/chicken portions)

It is necessary for mince to be broken up frequently during defrosting and this is best carried out in a large shallow dish. Chops and chicken portions should be arranged in a single layer and turned frequently.

Category 3 Meat joints/whole chickens

Meat joints and chickens will require shielding during defrosting especially if they are particularly fatty pieces. This is to prevent over defrosting on the outside edges. Smooth foil secured with cocktail sticks should be used. DO NOT ALLOW THE FOIL TO TOUCH THE WALLS OF THE OVEN. Back fat of joints, legs, wings and breast bones need shielding (see photograph on page 25). Standing time of at least 1 hour should be allowed (rolled joints may require longer) before cooking to ensure the centre is fully defrosted.

Defrosting guidelines

Tips

1. Check foods during defrosting. Foods vary in their defrosting speed.
2. It is not necessary to cover the food.
3. Always turn or stir the food especially when the oven “beeps”. Shield if necessary (see point 5).
4. Minced meat/chops/chicken portions should be broken up or separated as soon as possible and placed in a single layer.
5. Shielding prevents food cooking. It is essential when defrosting chickens and joints of meat. The outside thaws out first, so protect wings/breast/fat with smooth pieces of aluminium foil secured with cocktail sticks.
6. Allow standing time so that the centre of the food thaws out. (minimum 1 hour for joints of meat and whole chickens)
Defrosting using defrost power & time

By selecting the DEFROST power level from the microwave power pad, and setting a time, you can defrost food in your microwave. The biggest challenge is getting the inside defrosted before the outside starts to cook.

For this reason a defrost program alternates between a defrost power and a standing time. The name for this type of defrost is cyclic and during the standing stages there is not any microwave power in the oven, although the light will remain on and the turntable will turn. The automatic stand times ensure a more even defrost but it is still necessary to allow for standing time before use. Place foods in a suitable container. Meat joints and chickens should be placed on an upturned saucer.

Separate chops and small items e.g. bread slices where possible.

Chickens and joints of meat will require shielding during defrosting.

Turn dense foods and meat 2/3 times during defrosting.

Break up small items e.g. minced meat, frequently during defrosting.
## Defrosting foods using defrost power & time

The times given below are a guideline only. Always check the progress of the food by opening the oven door and then re-starting. For larger quantities adjust times accordingly. Food should not be covered during defrosting.

Using the Delay/Stand feature

The Delay/Stand pad is used as a timing pad either before, during or after a cooking program. When the Delay/Stand pad is selected with a time, there is no microwave power in the oven during this time.

1. To set a standing time:

   - Set the desired cooking program, by selecting cooking option and time required.
   - Then press the Stand pad.
   - Set desired standing time (max 9hrs 59 mins) (10 sec. pad is inoperable). An “H” will appear in the display to denote hours.
   - Press Start pad. Cooking program will commence after which the standing time will count down.

2. To set a delay start:

   - Press the Delay pad.
   - Set Delay time (max 9hrs 59 mins) (10 sec. pad is inoperable). An “H” will appear in the display to denote hours.
   - Set the complete cooking program, by entering cooking option and time required.
   - Press Start pad. Delayed time will count down then the cooking program will start.

**NB**

1. If the oven door is opened during the stand or delay time, the time in the display window will continue to count down.
2. Delay Start cannot be used before an auto program.
Grilling

The Quartz Grill system on the oven gives fast efficient cooking for a wide variety of foods e.g. chops, sausages, steak, toast, oven chips etc.

**DO NOT PREHEAT THE GRILL BEFORE USE.**
The metal tray must be on the glass turntable when using.

- **Select Grill power.**
  Press once for Grill 1 (High), twice for Grill 2 (Medium) or three times for Grill 3 (Low). The grill symbol will also appear.

- **Press Time pads** to enter cooking time. Maximum time is 99 mins. 50 sec, 1 h pad is inoperable.

- **Press Start.**
The cooking program will start and the time in the display will count down.

**NOTE:** The Grill will only operate with the oven door closed, and there is no microwave power on the GRILL only program.

**Grilling times**

When using the grill to cook foods, the cooking times will be similar to traditional grilling. Most foods will require turning halfway through the cooking time (see section on oven accessories page 32).

The Grill has three variable settings, Grill 1 (High), Grill 2 (Medium) and Grill 3 (Low). Grill 1 will be the hottest.

**Caution:**
The ACCESSORIES and surrounding oven will get very hot. Use oven gloves.
Grilling

Oven accessories to use

When grilling foods the glass turntable should be in position, with the metal tray and the wire rack on top.

Place food on wire rack on the metal tray on the turntable. The wire rack will allow fat to drip through into the metal tray to reduce excess splatter and smoke when grilling steaks, chops and other fatty foods.

Most foods require turning halfway during cooking. When turning food, open oven door and CAREFULLY remove the metal tray and wire rack by holding the accessories firmly. Use oven gloves when removing accessories as they will be very hot, and so will the roof and walls of the oven.

After turning, return food to the oven, close door and press START. The oven will continue to count down the remaining cooking time. It is quite safe to open the oven door at any time to check the progress of the food as it is grilling.

If grilling fish or small items, place the metal tray on top of the wire rack.

Guidelines

1. There is no microwave power on the GRILL only program.
2. Use the accessories provided, as explained above.
3. The Grill will only operate with the oven door closed.
4. Most meat items e.g. bacon, sausages, chops can be cooked on the hottest setting - GRILL 1. This setting is also suitable for toasting bread, muffins and teacakes etc.
5. GRILL 2 and GRILL 3 are used for more delicate foods or those that require a longer grill time e.g. fish or chicken portions.
6. DO NOT PREHEAT THE GRILL.
7. NEVER COVER THE FOOD WHEN GRILLING.
8. ALWAYS USE OVEN GLOVES WHEN REMOVING THE FOOD AND ACCESSORIES AFTER GRILLING AS THE OVEN AND ACCESSORIES WILL BE VERY HOT.
9. After grilling it is important that the grill accessories are removed for cleaning before reuse and that the oven walls and floor are wiped with a cloth squeezed in hot soapy water to remove any grease. DO NOT PUT ACCESSORIES IN DISH WASHER.
Convection cooking

Your combination oven can be used in convection mode which incorporates a heating element with a fan.

For best results always place food in a preheated oven. The metal tray must be on the glass turntable when preheating.

- Press to select oven temperature. The oven starts at 150 °C and then for each press the temperature will count up in 10 °C stages to 220 °C, then to, 100 °C, 110 °C etc. The convection symbol will also appear.
- Press Start to preheat. A “P” will appear in the display window. When the oven is preheated the oven will beep and the “P” will flash. Then open the door and place the food inside.*
- Press Time pads to enter cooking time. Maximum cooking time is 9 hours, 59 minutes. The 10 sec pad is inoperable.
- Press Start pad. Note: Check that only the convection symbol is still in the display. If the microwave symbol is displayed this is incorrect and the program should be cancelled. Reselect the convection setting.

* Note: Open the door using the Door Release pad, because if the Stop/Cancel pad is pressed the program may be cancelled. Then if the time was entered the oven would revert to cooking on microwave only.

The oven will maintain the selected temperature for approximately 30 minutes. If no food has been placed inside the oven or a cooking time set, then it will automatically cancel the cooking program and revert to time of day.

CAUTION:
THE ACCESSORIES AND THE SURROUNDING OVEN WILL GET VERY HOT. USE OVEN GLOVES.
Convection cooking

Oven accessories to use

When using the Convection oven the glass turntable should be in position and must have the metal tray placed on top.

The food is then placed onto the metal tray. Follow your individual recipe guidelines.

When using the oven as a CONVECTION oven, there is NO MICROWAVE POWER, i.e. the oven is operating as a conventional oven and you can use all your standard metal baking tins and ovenware.

It is not recommended to cook on more than one level when using the CONVECTION oven. When cooking 2 trays of buns etc, cook in two batches.

Combination cooking

Your oven has two methods of cooking by Combination.

1. Convection and Microwave
2. Grill and Microwave

COMBINATION cooking is ideal for many foods. The microwave power cooks them quickly, whilst the oven or grill gives the traditional browning and crispness.

All this happens simultaneously resulting in most foods being cooked in $\frac{1}{2} - \frac{2}{3}$ of the conventional cooking time.

There is no need to preheat on COMBINATION programs, **EXCEPT when cooking pastry.**

It is possible to use smooth seamed metal tins and foil containers on COMBINATION but they must be placed directly onto the metal tray on the glass turntable. They must not be placed directly onto the wire rack, or arcing will occur.

If you experience arcing, which is when you see blue sparks or hear crackling noises, the metal container is unsuitable or you have insufficient food in the oven. You should stop the program immediately and change the container or re-program to CONVECTION only.

To cook successfully by COMBINATION you should always use a minimum of 200 g (7oz) food. Small quantities should be cooked by Convection, or Grill.
Combination cooking

Preheat if necessary

- Press Combination pad. The grill and convection symbols will appear and flash.
- Select first cooking mode. The microwave symbol will appear.
- Select microwave power. Options available depend on first cooking mode selected.
- Press if preheating.* Convection only.

- Set cooking time. 10 sec. pad is inoperable.
- Press Start pad.

CAUTION:
Take care to use oven gloves when removing dishes from the oven - especially when turning or stirring foods as the oven walls and roof will be very hot.

* NOTE:
When placing food in the oven after preheating, just open the door using the Door Release pad, because if STOP/CANCEL pad is pressed the program may be cancelled. Then, if the time was entered, the oven would revert to cooking on microwave only.

Containers to use
DO NOT use plastic MICROWAVE containers on Combination Programs (unless suitable for combination cooking). Dishes must be able to withstand the heat of the top grill. Do not put dishes on wire rack directly under the grill, place on metal tray on glass turntable.

Oven accessories
When using any Combination cooking program the glass turntable should be in position and must have the metal tray placed on top, unless otherwise stated.
Combination 1. Convection and Microwave

This is the most popular combination mode combining Convection heat with Microwave Power. Casseroles, meat joints, jacket potatoes and pastries are very successful using this combination. Unsuitable foods are those which contain whisked eggs, meringues, rich fruit cakes, biscuits and yorkshire puddings.

It is not necessary to preheat on combination except when cooking pastry dishes. For pastry dishes preheat oven to 210°C on Convection so that the oven is hot, and then select the desired Combination program or follow recipe guidelines.

- Press Combination pad. The grill and convection symbols will appear and flash.
- Press to select oven temperature. The oven starts at 150°C, and then for each press the temperature will count up in 10°C stages to 220°C, then to 100°C, 110°C etc. The grill symbol will disappear and the convection symbol will stop flashing. The microwave symbol appears and starts to flash.
- Press Micro power pad to select Microwave setting. HIGH & DEFROST are not available. The microwave symbol will stop flashing.
- Press to enter required cooking time. 10 sec pad is inoperable.
- Press Start pad.
Oven accessories to use

When using Combination cooking the glass turntable should be in position and must have the metal tray on top, unless otherwise stated.

Items of food can be placed onto the wire rack on the metal tray on the glass turntable. Heatproof dishes of food should be placed directly onto the metal tray on the glass turntable.

Joints and portions of meat should be placed on an upturned saucer on the metal tray on the glass turntable. Alternatively they can be placed in a heatproof dish on the metal tray on the glass turntable.

Recipes using foil or metal containers e.g. cakes and pastries should be placed directly onto the metal tray on glass turntable.
Combination 1. Convection and Microwave

Guidelines

• Food is usually cooked UNCOVERED.
• After cooking it is important that the accessories are removed for cleaning before re-use and that the oven walls and floor are wiped with a cloth squeezed in hot soapy water to remove any grease. DO NOT PUT ACCESSORIES IN THE DISHWASHER.

The chart below gives suggestions for Combination programs. For cooking times refer to cooking charts or a similar recipe in the book. It is not possible to use HIGH or DEFROST Microwave Power in this mode.

Foods should always be cooked until browned and piping hot.

CAUTION:
ALWAYS USE OVEN GLOVES WHEN REMOVING DISHES FROM THE OVEN - ESPECIALLY WHEN TURNING OR STIRRING FOODS, AS THE ACCESSORIES AND SURROUNDING OVEN WILL GET VERY HOT.
This Combination mode is suitable for foods which are normally grilled and for reheating small savoury items.

Do not use this program with less than 200 g (7 oz) of food.

It is NOT necessary to preheat when using this Combination mode and food should always be cooked uncovered.

The Grill will glow on and off during cooking - this is normal.

Grill 1 - HIGH
Grill 2 - MEDIUM
Grill 3 - LOW

• Press Combination pad. The grill and convection symbols will appear and flash.

• Select Grill Power. Press once for Grill 1 (High), twice for Grill 2 (Medium) or three times for Grill 3 (Low). The convection symbol will disappear and the grill symbol will stop flashing. The microwave symbol appears and starts to flash.

• Select Microwave Power. Keep pressing this pad until the power you require appears in the display window. Options available depend on Grill Power selected. The microwave symbol will stop flashing.

• Press to enter required cooking time. 10 sec. pad is inoperable.

• Press Start pad.
Combination 2. Grill and Microwave

Oven accessories to use

When using Combination cooking the glass turntable should be in position and must have the metal tray on top, unless otherwise stated.

Food should be placed directly onto the wire rack on the metal tray. This is then placed on the glass turntable.

When cooking fish or small items, food can be placed directly on the metal tray on top of the wire rack.

Guidelines

- Food is always cooked UNCOVERED.
- To turn food just press the door release pad, remove the Metal Tray and Wire Rack, turn the food, return to the oven, close the door and press START pad. The oven will continue to countdown the remaining cooking time.
- After Grilling it is important that the Grill accessories are removed for cleaning before reuse and that the oven walls and floor are wiped with a cloth squeezed in hot soapy water to remove any grease. DO NOT PUT ACCESSORIES IN THE DISHWASHER.
For advice on cooking times refer to cooking charts and recipes in this book.
Foods should always be cooked until browned and piping hot.

CAUTION:
ALWAYS USE OVEN GLOVES WHEN REMOVING DISHES FROM THE OVEN - ESPECIALLY WHEN TURNING OR STIRRING FOODS, AS THE ACCESSORIES AND SURROUNDING OVEN WILL GET VERY HOT.

* NOTE:
When placing food in the oven after preheating, just open the door using the Door Release pad, because if STOP/CANCEL pad is pressed the program may be cancelled. Then, if the time was entered, the oven would revert to cooking on microwave only.

Containers to use
DO NOT use plastic MICROWAVE containers on Combination programs (unless suitable for combination cooking). Dishes must be able to withstand the heat of the top grill. Do not put dishes on wire rack directly under the grill, use the metal tray.
Auto weight cook programs

This feature allows you to cook or reheat ten foods by setting the weight only. The oven determines the Microwave power level and/or Combination setting, then the cooking time automatically. Select the category of food and then just enter the weight. The weight can be entered in grams or pounds and ounces.

- Select the desired Auto Weight program, by pressing the pad. The pad can be pressed once or twice to select the desired program.

- Press to select grams or pounds and ounces.

- Enter the weight by pressing the up and down pads.

- Press Start.

When you select an automatic program symbols will appear in the display to show the cooking mode that will be used and the accessories that are needed, in addition to the turntable. These are what they mean:-

- Microwave
- Grill
- Convection
- Metal tray
- Wire rack
Guidelines for use

The auto weight programs are designed to take the guesswork out of cooking or reheating your food. They must ONLY be used for the foods described.

1. Only cook foods within the weight ranges described (see table below).
2. Only use the accessories as indicated on pages 44-46.
3. DO NOT cover food unless stated, as programs 7-10 use a Combination of Microwave and Convection and it will prevent the food browning. The heat will also melt any plastic covering.
4. Most foods benefit from a STANDING time after cooking on an auto program, to allow heat to continue conducting to the centre.
5. To allow for some variations that occur in food, check that food is thoroughly cooked and piping hot before serving.

Auto Programs must ONLY be used for the foods described below. Programs 1-6 use Microwave power only, Programs 7-10 use a Combination program of Microwave and Convection and/or Grill.

*IMPORTANT NOTE:* These programs are not suitable for foods that cannot be stirred e.g. lasagne / shepherds pie.

1 Curry

This program is for reheating a chilled curry convenience meal that can be stirred.* Foods must be in a suitable microwaveable container and have the film pierced. Place on turntable, press the pad once. Enter the weight then press START. Stir halfway. Allow to stand for 1 minute. Ensure that the food is piping hot. Stir the food before serving.

2 Chinese style

This program is for reheating a chilled chinese style convenience meal.* Foods must be in a suitable microwaveable container and have the film pierced. Press the pad twice. Enter the weight. Press START. Stir halfway. Allow to stand for 1 minute. Ensure food is piping hot. Stir again before serving.

3 Pasta

This program is for reheating a chilled pasta convenience meal that can be stirred.* Foods must be in a suitable microwaveable container and have the film pierced. Place on turntable, press the pad once. Enter the weight then press START. Stir halfway. Allow to stand for 1 minute. Ensure that the food is piping hot. Stir the food before serving.

4 Casserole

This program is for reheating a chilled casserole convenience meal.* Foods must be in a suitable microwaveable container and have the film pierced. Press the pad twice. Enter the weight. Press START. Stir halfway. Allow to stand for 1 minute. Ensure food is piping hot. Stir again before serving.

M = Microwave cooking only  C = Combination e.g. Convection + Micro power
Auto weight cook programs

5 Fresh fish

To cook FRESH fish. Shield the thinner portions. Place in a shallow container on turntable. Add 15 ml (1tbsp) liquid. Cover with pierced cling film or lid. Press the pad once. Enter the weight. Press START.

6 Fresh vegetables

To cook FRESH vegetables. Place prepared vegetables into a shallow container on turntable. Add 90 ml (6tbsp) of water. Cover with pierced cling film or lid. Press the pad twice. Enter the weight. Press START.

7 Jacket potatoes

To cook jacket potatoes with a crisper drier skin. Choose medium sized potatoes 200-250 g (7-9oz), for best results. Wash and dry potatoes and prick with a fork several times. Place on metal tray on glass turntable. Press the pad. Enter total weight of potatoes, then press START.

M = Microwave Power only   C = Combination e.g. Convection + Micro Power
It is necessary to preheat the oven for programs 8-10 (Frozen potato products, whole chicken, frozen pizza). See below for operation.

eg.

8 Frozen potato products

To cook FROZEN oven chips and potato products, e.g. Hash browns, croquettes, etc., that are suitable for GRILLING. Press the pad. Press the start pad to pre-heat the oven. After pre-heating, beeps sound and ‘P’ will flash in the display. Spread potato products out on metal tray on wire rack on glass turntable. Enter the weight. Press START. Turn during cooking. For best results cook in a single layer.

NOTE: Potato products vary considerably. We suggest checking a few minutes before the end of cooking to assess personal browning.

9 Whole chicken

To cook WHOLE FRESH unstuffed chickens. Cook stuffing separately. Press Pad. Press the start pad to pre-heat the oven. After pre-heating, beeps sound and ‘P’ will flash in the display. Place chicken on metal tray and place on glass turntable. Enter in the weight of the chicken, then press START. Start cooking breast side down and turn $\frac{2}{3}$ total time, a beep will sound to turn, taking care with hot juices. Stand for 5 minutes.

10 Frozen pizza

For reheating and browning frozen, purchased pizza. Press Pad. Press the start pad to pre-heat the oven. After pre-heating, beeps sound and ‘P’ will flash in the display. Remove all packaging and place pizza on wire rack on metal tray on glass turntable. Enter weight and press START.

Cooking and reheating guidelines

Most foods reheat very quickly in your oven by HIGH power. Meals can be brought back to serving temperature in just minutes and will taste freshly cooked and NOT leftover. Always check food is piping hot and return to oven if necessary.

As a general rule, always cover wet foods, e.g. soups, casseroles and plated meals.

Do not cover dry foods e.g. bread rolls, mince pies, sausage rolls etc.

The charts on pages 49-67 show you the best way to cook or reheat your favourite foods. The best method depends on the type of food.

Remember when cooking or reheating any food that it should be stirred or turned wherever possible. This ensures even cooking or reheating on the outside and in the centre.

When is food reheated?

Food that has been reheated or cooked should be served “piping hot” i.e. steam should be visibly emitted from all parts. As long as good hygiene practices have been followed during the preparation and storage of the food, then cooking or reheating presents no safety risks.

Foods that cannot be stirred should be cut with a knife to test that they are adequately heated throughout. Even if a manufacturer’s instructions or the times in the cookbook have been followed, it is still important to check the food is heated thoroughly. If in doubt, always return to the oven for further reheating.

If you cannot find the equivalent food in the chart then choose a similar type and size listed and adjust the cooking time if necessary.

Plated meals

Everyone’s appetite varies and reheat times depend on meal contents. Dense items e.g. mashed potato, should be spread out well. If a lot of gravy is added, extra time may be required. Place denser items to the outside of the plate. An average plated meal will take 4-7 mins on HIGH power to reheat. Do not stack meals.

Canned foods

Remove foods from can and place in a suitable dish before heating.

Soups

Use a bowl and stir before, during and after heating.

Casseroles

Stir halfway through and again at the end of heating.
Cooking and reheating guidelines

Mince pies - caution

REMEMBER even if the pastry is cold to the touch, the filling will be piping hot and will warm the pastry through. Take care not to overheat otherwise burning can occur due to the high fat and sugar content of the filling. Check the temperature of the filling before consuming to avoid burning your mouth.

Christmas puddings and liquids - caution

Take great care when reheating these items. See Page 9 and 10.

Do not leave unattended.
Do not add extra alcohol.

Babies’ bottles - caution

Milk or formula MUST be shaken thoroughly before heating and again at the end and tested carefully before feeding a baby. See page 49.

For 7-8 fl.oz. of milk from fridge temperature, remove top and teat. Heat on HIGH power for 25-30 secs.
CHECK CAREFULLY.

For 3 fl.oz. of milk from fridge temperature, remove top and teat. Heat on HIGH power for 10-15 secs.
CHECK CAREFULLY.

N.B. Liquid at top of bottle will be much hotter than at bottom and bottle must be shaken thoroughly.

WE DO NOT RECOMMEND THAT YOU USE YOUR MICROWAVE TO STERILISE BABIES’ BOTTLES. If you have a special microwave steriliser we urge extreme caution, due to the low quantity of water involved. It is vital to follow the manufacturers instructions implicitly.
The times given in the charts below are a guideline only, and will vary depending on STARTING temperature, dish size etc.

**HEATING CATEGORY**

Your oven is Heating Category E and this is displayed on the front of your oven door. The information on this label will assist you in using new instructions on food packs to enable you to program the best heating time in your oven.

**POINTS FOR CHECKING**

Always check that food is piping hot after reheating in the microwave. If unsure return to oven. Foods will still require a STAND TIME, especially if they cannot be stirred. The denser the food the longer the stand time.
### PURCHASED CONVENIENCE FOODS – FROZEN – N.B. Transfer food from foil container to a similar sized heat-proof dish. Plastic dishes designed for microwave and conventional ovens may be used with care.

### POINTS FOR CHECKING
Always check that food is piping hot after reheating in the microwave. If unsure return to oven. Foods will still require a STAND TIME, especially if they cannot be stirred. The denser the food the longer the stand time.
Increasing and decreasing recipes

Increasing recipes
• To increase a recipe from 4 to 6 servings, increase each ingredient listed by half. To double the quantity, simply double every ingredient listed.
• Do not forget that large quantities will require a larger dish. Make sure that it is deep enough to prevent the recipe from boiling over during cooking.
• Cover as directed in the recipe. Stir or rearrange foods as recommended.
• Increase the stand times by 5 mins. per lb.
• Always check the recipe during cooking.
• When increasing the ingredients to 6 servings, add an extra one third of the original cooking time, i.e. 30 mins. on MEDIUM power for 4 servings will become 40 mins. on MEDIUM power for 6 servings.
• When doubling a recipe from 4 to 8 add on half the original cooking time, i.e. 30 mins. on MEDIUM power for 4 servings will become 45 mins. on MEDIUM power for 8 servings.

Decreasing recipes
• To decrease a recipe from 4 servings to 2 servings, halve the ingredients listed.
• Choose a dish that is proportionally smaller than the one recommended in the recipe, however make sure it is deep enough to stop food boiling over.
• Allow half to two-thirds of the original cooking time, i.e. 30 mins. on MEDIUM power for 4 servings will become 15-20 mins. on MEDIUM power for 2 servings.

Using recipes from other books

The best way to convert a family favourite dish is to find a similar recipe in a cookery book to give you a guide to the correct method and timings to use.

Many cookbooks refer to 650W ovens, however since 1990 oven output powers have been set by a new standard (IEC). When using other cookbooks, the 1000 W output power of your oven must be allowed for. Use the same power level suggested e.g. HIGH or MEDIUM and select the same cooking time suggested, however CHECK the progress of the food during cooking and adjust the time if necessary.

Cooking for one
• For one serving quarter ALL ingredients listed.
• Choose a dish that is proportionally smaller than the one recommended in the recipe.
• Use the same cooking power recommended in the original recipe.
• Start by cooking for one quarter of the recommended cooking time, although extra time in most cases will be required.
• Always check the food during cooking.
• There is not a great saving for reduced quantities of soups, casseroles, stews and rice, as a minimum time is required to tenderise meats and blend flavours.
• When cooking for one it often makes sense to cook for two and plate up both meals. Freeze one meal for a later date.
### Carrot & orange soup

4. Sprinkle with basil and season with pepper. Serve immediately.
Fish

Fish cooks very well by microwave as it stays moist and the lingering fish smells left in conventional ovens are avoided.

When is fish cooked?
Fish is cooked when it flakes easily and becomes opaque.

For fish with a strong odour, eliminate the smell after cooking by placing 600 ml (1 pt) of boiling water and 1 sliced lemon in a large bowl, cook on SIMMER for 20 mins. Wipe out oven with a dry cloth.

Whole fish
If cooking 2 whole fish together, they should be arranged head to tail for even cooking.
Large whole fish must have the tail and head shielded halfway through cooking with smooth pieces of tin foil secured with cocktail sticks.

Arranging
Thin fillets of fish i.e. plaice, should be rolled up prior to cooking to avoid overcooking on the thinner outside edge and tail.
Fish steaks should be arranged in a circle, thicker part to the outside. Cover with cling film or lid.

Liquid
Fresh fish should always be sprinkled with 30 ml (2 tbsp) of lemon juice, white wine or water.
When cooking frozen fish, add liquid as above for even cooking.
Do not sprinkle salt onto fish before cooking as this may make the fish dry.

Noise
During cooking, popping sounds may be heard. This is due to moisture trapped between the flesh, particularly with oily fish such as salmon and mackerel. This can be minimised when cooking if the skin and flesh is pierced several times with a cocktail stick.
**Ingredients**

350 g (12 oz) peeled potatoes
25 g (1 oz) butter
1 small onion, finely chopped
200 g (7 oz) can tuna, drained
1 egg, hardboiled, chopped
30 ml (2 tbsp) fresh parsley, chopped
10 ml (2 tsp) lemon juice
salt and pepper
1 egg, beaten
100 g (4 oz) breadcrumbs

---

**Tuna fish cakes**

**Serves 4**

**Oven accessory:** glass turntable + metal tray + wire rack

1. Cook potatoes with 45 ml (3 tbsp) water, covered on **HIGH** power for 6-8 mins. or until cooked. Drain.
2. Place butter and onion in a bowl, cover and cook on **HIGH** power for 4 mins. or until soft. Add potatoes and mash.
3. Stir in tuna, hard boiled egg, parsley and lemon juice, season well.
4. Shape into 8 cakes and coat in beaten egg and breadcrumbs.
5. Place on metal tray on wire rack and cook on **Combination: CONVECTION 220˚C + WARM** power for 12-15 mins. or until brown, turning halfway.

---

**Ingredients**

450 g (1 lb) white fish
50 g (2 oz) butter
50 g (2 oz) flour
450 ml (3/4 pt) milk
300 ml (1/2 pt) white wine
450 g (1 lb) mixed seafood
6 gherkins, diced
15 ml (1 tbsp) fresh parsley
10 ml (2 tsp) dill
salt and pepper

**Rosti topping:**

450 g (1 lb) peeled potatoes
15 ml (1 tbsp) capers
50 g (2 oz) butter, melted
50 g (2 oz) cheddar cheese, grated

---

**Special occasion fish pie**

**Serves 4**

**Dish:** gratin dish

**Oven accessory:** glass turntable + metal tray

1. Place the white fish with 2 tbsp water in a shallow dish. Cover and cook on **HIGH** power for 4-5 mins or on AUTO FISH program. Drain, skin, bone and flake.
2. Make the sauce by melting the butter in a large jug on **HIGH** power for 1 min. Add the flour and stir well. Mix in the milk and wine and cook on **HIGH** power for 4-5 mins. Stir halfway. Mix in the fish, mixed seafood, gherkins and herbs. Season and pour into the dish.
3. Grate the potatoes and mix in the capers, melted butter and grated cheese. Place lightly on the fish sauce without pressing firmly to keep the grated form. Cook on **Combination: CONVECTION 220˚C + SIMMER** power for 35-40 mins. or until piping hot and golden.
Ingredients
4 trouts, 350 g (12 oz) each
Stuffing:
1 bunch spring onions, finely chopped
100 g (4 oz) button mushrooms, finely sliced
grated rind and juice of 1 orange
2 1/2 cm (1") cube fresh ginger, peeled and grated
dash of Soy sauce
juice of 1 orange
juice of 1 lime
black pepper
25 g (1 oz) butter

Stuffed citrus trout Serves 4

Oven accessory: glass turntable, metal tray and wire rack

1. Wash the fish and pat dry. Fill the fish cavities with the combined stuffing ingredients and arrange the fish in a shallow dish.
2. Pour over the orange and lime juice. Season and marinade for one hour.
3. Dot with butter, place the fish two at a time on the metal tray on the wire rack.
4. Cook on GRILL 1 and LOW for 10-12 mins. or until crisp and brown. Turn halfway. Repeat with remaining fish.

Ingredients
100 g (4 oz) broccoli
100 g (4 oz) cauliflower
1 medium red pepper, diced
198 g (7 oz) can salmon, drained
25 g (1 oz) butter
30 ml (2 tbsp) plain flour
300 ml (1/2 pt) milk
50 g (2 oz) grated tasty cheese
150 ml (1/4 pt) cream (optional)
salt and pepper to taste
15 g (1/2 oz) butter
75 g (3 oz) fresh white breadcrumbs
15 ml (1 tbsp) chopped fresh parsley
pinch paprika

Salmon & vegetable mornay Serves 4

Dish: 20 x 25 cm (8" x 10") dish
Oven accessory: glass turntable + metal tray

1. Break broccoli and cauliflower into florets, add red pepper and 2 tbsp water. Cover and cook on HIGH power for 5-6 mins. or until soft. Drain.
2. Flake salmon and mix with vegetables.
3. Melt butter in jug on HIGH power for approx. 20-30 secs. Stir in flour then milk. Cook on HIGH power for 2 mins. or until mixture boils and thickens; stir halfway. Stir in cheese, cream and seasoning. Pour cheese sauce over vegetables and salmon.
5. Cook on Combination: 220°C + LOW power for 10-12 mins. or until golden brown.
**Haddock and spinach florentine**  
Serves 4

**Ingredients**

- 50 g (2 oz) butter
- 50 g (2 oz) flour
- 450 ml (4/4 pt) milk
- 100 g (4 oz) Cheddar cheese, grated
- salt and black pepper
- pinch grated nutmeg
- 450 g (1 lb) frozen spinach
- 450 g (1 lb) smoked haddock fillet, skinned
- 50 g (2 oz) breadcrumbs
- pinch paprika

**Dish: 20 cm (8”) square dish**

**Oven accessory: glass turntable + metal tray**

1. Mix together the butter, flour and milk in a large jug and cook uncovered on **HIGH** power for 4-5 mins. or until the sauce has thickened, whisking every minute. Stir in half of the cheese and season well with salt, pepper and nutmeg.

2. Place spinach in the dish and cook covered on **HIGH** power for 6-7 mins. or until cooked. Place in a sieve and drain thoroughly, then place back into the dish.

3. Place the fish in a single layer on top of the spinach. Cover and cook on **HIGH** power for 4-5 mins. or until tender.

4. Pour the cheese sauce over the fish to cover it completely. Cook uncovered on **HIGH** power for 3 mins. then sprinkle the remaining cheese, breadcrumbs and paprika on top. Cook on **GRILL 1** for 5-6 mins. or until brown and crisp.

- 1 large leek, sliced
- 4 garlic cloves, crushed
- 1.2 ltr (2 pt) fish stock
- salt and black pepper
- 150 ml (1/4 pt) dry white wine
- 4 sprigs thyme
- small piece of orange peel
- 4 strands saffron
- 4 large fresh prawns
- bunch of dill to garnish

**Dish: 3 litre (6 pt) casserole**

**Oven accessory: glass turntable**

1. Skin the tomatoes and cut into four pieces, removing the cores. Place the oil and tomato puree in a large bowl, heat on **HIGH** power for 1 min. and mix well. Add the onions and leek, cook on **HIGH** power for 3-4 mins. or until soft.

2. Add the garlic, tomatoes, stock, seasoning, wine, thyme, orange peel, saffron and chilli sauce. Heat on **HIGH** power for 3-4 mins. Skin the fish, cut into chunks and add to the tomato liquid. Cook on **HIGH** power for 3-4 mins. or until the fish is cooked. Add the mixed seafood and prawns and heat again for 2-3 mins. on **HIGH** power or until hot, taking care not to overcook the fish.

Meat and poultry

Guidelines

Defrosted joints
If the meat has previously been frozen, ensure it is properly thawed before cooking by microwave. Defrosted joints of meat must be allowed to STAND for a minimum of 1 hour. before cooking to ensure the centre is fully defrosted.

Fat
Large amounts of fat absorb microwave energy and can cause the meat next to it to overcook. Always choose joints that aren’t excessively fatty.

Standing time
Meat and poultry require a minimum of 15 mins. STANDING TIME wrapped in aluminium foil after cooking by microwave. Roast meat is always easier to carve after STANDING and the meat will continue to cook during the STAND TIME.

Bone
Bone tips on legs of lamb and crown roasts may need shielding when cooked by microwave, to prevent overcooking.

Turning
Joints and poultry should be turned over halfway through cooking.

Shielding
Large joints may need shielding with pieces of smooth aluminium foil after half the cooking time to avoid overcooking on the outside edges. Turkeys and large chickens should have their breast meat, legs and wings protected. Secure foil with cocktail sticks and do not allow foil to touch the walls of the oven.

How to roast a joint by Combination
Place the joint on metal tray and place on glass turntable.
**Meat and poultry**

**How to roast a joint by microwave**
To roast basic joints of meat place the joint onto the rack of a microwave roasting set and cover with a dome lid. Alternatively use a large, shallow dish and place the joint on an upturned saucer and cover with cling film.

**Roasting bags**
Roasting bags are useful when split up one side to tent a joint for roasting by power and time.

*Do not* use the metal twists supplied.

**Tips**
Braised and stewed meat cooked in a microwave has a slightly firm texture and therefore it is essential to purchase good quality meats.

When cooking a casserole, place a saucer or small upturned plate over the meat to keep it submerged in the juices.

**How to cook small cuts of meat by microwave**
Some cuts of meat can be cooked successfully by microwave although due to their short cooking times and no heat source, they will not crisp and brown.

They should always be cooked on a microwave rack to lift them out of their juices.

**Crispy bacon** - place on a microwave safe rack (optional extra obtainable from cookware shops). Cover with a plain piece of kitchen towel to minimise splatter. Cook on *HIGH* power for approx. 45 secs. per rasher, or until desired crispness is achieved.

Macaroni cheese  
Serves 4

**Ingredients**
- 175 g (6 oz) quick cooking macaroni
- 40 g (1½ oz) butter
- 1 small onion, finely chopped
- 100 g (4 oz) bacon, chopped
- 40 g (1½ oz) flour
- 600 ml (1 pt) milk
- salt and pepper
- 5 ml (1 tsp) french mustard
- 150 g (5 oz) red cheese, grated
- 30 ml (2 tbsp) fresh brown breadcrumbs

**Dish:** large dish and jug

**Oven accessory:** glass turntable + metal tray

1. Cook macaroni in 450 ml (¾ pt) boiling water. Cover and cook on **HIGH power** for 5-6 mins. or until soft. Drain.
2. Place butter, onion and bacon in a jug. Cover. Cook on **HIGH power** for 5 mins. or until onion is soft. Stir halfway through cooking.
3. Stir in flour and cook for 30 secs. on **HIGH power**.
4. Gradually add milk, stir well and season. Cook on **HIGH power** for 5-6 mins. or until sauce is thick and bubbling. Stir twice during cooking.
5. Add mustard and 100 g (4 oz) grated cheese. Add macaroni. Place the macaroni mixture in a large dish. Sprinkle with breadcrumbs and remaining cheese.
6. Cook on **Combination:** **CONVECTION 220°C + LOW power** for 10-12 mins. or until cheese starts to melt.
• Root vegetables. i.e. carrots, swede, should be cut into slices, strips or cubes.
• Do not mix fresh and frozen vegetables as the cooking times may be different.

• Cabbage should be shredded and cooked by power and time.
• Fresh vegetables require 90 ml (6 tbsp) of water. For each extra 450 g (1 lb) add an extra 90 ml (6 tbsp) of water and stir halfway.

• If cooking potatoes with other vegetables, only cook with other ROOT vegetables.
• Never add salt to vegetables before microwaving. Remember the flavour of microwaved vegetables is much better than boiled.

• Always cook vegetables in a dish that is a suitable size. Use flat dishes not basins. Always cover with microwave cling film or a lid.
• Certain vegetables i.e. broccoli and asparagus, should be arranged so that the tips are in the centre of the dish, as these require less cooking.

• Whole cauliflower should be cooked upside down on MEDIUM power for 10 mins. approx. with 90 ml (6 tbsp) water.

Jacket potatoes

Varieties of potatoes vary in their suitability for cooking by microwave. We recommend Maris Piper for consistently good results. The cooking times given may need adjustment for other varieties. The ideal size of potato to be cooked by microwave is 200 g - 250 g (7-9 oz).

Before cooking
Wash potatoes and prick skins several times. Spread around edge of turntable.

After cooking
Remove from oven and wrap in aluminium foil to retain the heat. Leave to stand for 5 mins.
Vegetarian chilli  Serves 4

Dish: large casserole + lid
Oven accessory: glass turntable

1. Place oil, onion, pepper, chilli and carrots in a large casserole, cover and cook on HIGH power for 4-5 mins. or until softened.

2. Add chilli and cumin. Stir in bulgar wheat, chopped tomatoes, tomato puree and water. Cover and cook on HIGH power for 10 mins. Stir in red kidney beans, cover and cook on HIGH power for 2-3 mins.

Vegetable lasagne  Serves 4-6

Dish: large deep rectangular dish
Oven accessory: glass turntable + metal tray

1. Place onion and butter in a casserole dish, cover and cook on HIGH power for 3 mins. Add vegetables and stock, re-cover and cook on HIGH power for 8-10 mins. or until vegetables are soft. Season to taste.

2. Cover base of dish with a thin layer of tomato sauce, then a layer of lasagne on top followed by a layer of vegetable mixture. Thinly slice 175 g (6 oz) of the cheese and layer on top of vegetables. Continue layering until ingredients are all used ending with a tomato sauce layer.

3. Grate remaining cheese and arrange over top in 3 diagonal bands. Cook on Combination: CONVECTION 190°C + SIMMER power for 20-30 mins. or until the pasta is cooked.

7. Place tops back on peppers and cook on Combination: GRILL 1 + SIMMER power for a further 5-7 mins.
Sauces

Container size
Always use a container or jug at least twice the capacity of the sauce, to avoid boiling over.

Covering
DO NOT cover sauces when cooking.

STIRRING – IMPORTANT
Sauces/gravy should be thoroughly stirred before, during and after cooking, to avoid any eruptions and to result in a smooth sauce.

Reheating
Sauces can be made in advance and reheated by microwave. Reheat on HIGH power and stir halfway.

Power level
Most sauces require HIGH Power for cooking. Sauces containing eggs should be cooked on SIMMER power.

Wooden spoons
Do not leave wooden spoons in the sauce when cooking. The wood may dry out and burn. NEVER LEAVE metal spoons in the sauce.

Ingredients
30 g (1 oz) butter
30 g (1 oz) flour
600 ml (1 pt) milk

White pouring sauce

Dish: 1 litre (2 pt) jug
Oven accessory: glass turntable
1. Melt butter in jug on HIGH power for 20-40 secs.
2. Stir in the flour to make a roux.
3. Add the milk gradually stirring continuously until well combined.
4. Cook for 2 mins. on HIGH power. Stir and cook for a further 3 mins. Sauce should be smooth and glossy and coat the back of a spoon.

Variations of White Sauce

Parsley
Stir 60 ml (4 tbsp) chopped parsley and 15 ml (1 tbsp) lemon juice into sauce halfway through cooking time.

Onion
Cook 1 small onion in the butter for 30 secs. on HIGH power before adding the flour and milk.

Cheese
Stir in 75 g (3 oz) grated cheese at the end of cooking time.
### Custard

**Ingredients**
- 30 ml (2 tbsp) custard powder
- 15 ml (1 tbsp) sugar
- 600 ml (1 pt) cold milk

**Dish:** 1 litre (2 pt) jug  
**Oven accessory:** glass turntable  
1. Mix together the custard powder, sugar and a little milk to form a smooth paste.
2. Blend in the remaining milk, whisking well.
3. Cook on **HIGH** power for 4-6 mins. Whisk well halfway through cooking time and again at the end.

### Hollandaise sauce

**Ingredients**
- 3 egg yolks
- 30 ml (2 tbsp) white wine vinegar
- 100 g (4 oz) chilled, unsalted butter, cut into cubes
- pepper

**Dish:** 1 litre (2 pt) jug  
**Oven accessory:** glass turntable  
1. Place egg yolks and vinegar in a jug. Beat well.
2. Drop cubes of butter on top. Cook on **HIGH** power for 15 secs.
3. Whisk. Cook on **HIGH** power for 10 secs.
4. Whisk again and cook on **HIGH** power for 10 secs. Repeat 10 secs. stages until sauce is thick and creamy.
5. Season and serve immediately with salmon steaks or asparagus spears.

**N.B. This sauce must not boil or eggs will curdle.**

### Chocolate sauce

**Ingredients**
- 25 g (1 oz) butter
- 75 g (3 oz) caster sugar
- 75 g (3 oz) soft brown sugar
- 50 g (2 oz) cocoa powder
- 3 ml (1/2 tsp) vanilla essence
- 300 ml (1/2 pt) milk

**Dish:** 1 litre (2 pt) jug  
**Oven accessory:** glass turntable  
1. Melt butter in a large bowl on **HIGH** power for 20-30 secs.
2. Stir in sugars, cocoa powder and vanilla essence.
3. Gradually add milk, stirring well.
4. Cook on **HIGH** power for 2 mins. Stir well. Repeat this again three more times or until you achieve a smooth and glossy consistency that coats the back of a spoon.
### Savoury potato plait

**Serves 4-6**

**Dish:** baking sheet (round)

**Oven accessory:** glass turntable + metal tray

1. Cook potato and onion in a shallow dish with 60 ml (4 tbsp) water, covered for 3 mins. on **HIGH** power. Drain.

2. Preheat oven on **CONVECTION 200°C**.

3. Roll out the pastry to an oblong 25 x 27 cm (10 x 11”). Lift onto baking sheet. With a knife, cut each side of the long edges diagonally at 2.5 cm (1”) intervals, to give strips which will become plaits.

4. Arrange layers of potato, onion and apple down the centre of the pastry. Season. Sprinkle over the cheese.

5. Brush the pastry strips with beaten egg and fold alternately over the mixture to form a plait.

6. Glaze the complete plait with beaten egg. Cook on **Combination: CONVECTION 200°C + SIMMER** power for 11-13 mins. or until crisp and golden.

---

### Baked jam roly poly pudding

**Serves 4**

**Dish:** 1 kg (2 lb) loaf dish

**Oven accessory:** glass turntable + metal tray

1. Roll out pastry to approx. 23 x 32 cm (9 x 13”).

2. Spread the jam over the pastry leaving 1cm (“½”) border all round. Brush the edges with milk and roll the pastry up evenly, starting at one short side and sealing the edges well.

3. Brush top with milk and place in loaf dish. Preheat oven on **CONVECTION 210°C**. Cook on **Combination:** **CONVECTION 220°C + SIMMER power** for 15-20 mins. or until golden.

---

**Ingredients**

- 1 small potato, thinly sliced
- 200 g (7 oz) puff pastry
- 1 small onion, sliced
- small apple, peeled, cored and sliced
- salt and pepper to taste
- 75 g (3 oz) cheese, grated or crumbled, eg. Stilton, Roule etc.

**Glaze:**
- 1 egg, beaten

---

**Ingredients**

- 1 quantity of suet pastry (see page 100)
- 75 ml (5 tbsp) seedless raspberry jam
- milk to glaze
Suetcrust pastry

1. Mix together flour, salt and suet.
2. Add water and mix to a soft dough. Knead lightly until smooth.

Apple strudel

Dish: baking sheet (round)
Oven accessory: glass turntable + metal tray

1. Preheat the oven on CONVECTION 180°C.
2. Put the apples and juice into a bowl and toss together.
3. Add the sugar, walnuts, sultanas, cinnamon and almonds and mix together.
4. Take three sheets of filo pastry and brush with melted butter. Place each one with the shortest edge towards you. Overlap the 2nd sheet onto the 1st sheet by 5-6 cms along the long edge and repeat with the 3rd sheet overlapping the second.
5. Place three more sheets of filo on top, in the same way as in step 4.
6. Spread the apple filling along the front edge of the filo pastry just 2.5cms from the edge and 2.5cms from each side.
7. Fold the sides in over the filling and brush with butter. Roll up from the long front edge buttering the final long edge to seal the strudel.
8. Place on baking sheet, seam-side down. Brush with melted butter.
9. Cook on CONVECTION 180°C for 30-35 mins.
10. Dust with icing sugar to serve.
### Carrot Cake

**Ingredients**

- 2 eggs beaten
- 150 ml veg oil
- 150 g self-raising wholemeal flour
- 100 g soft light brown sugar
- 2 tsp cinnamon
- 75 g raisins
- 100 g grated carrots

**Icing**

- (enough for a thin top and a thin layer in the middle or a thick topping)
- 50 g cream cheese
- 50 g butter
- 100 g icing sugar
- 2 tsp lemon juice
- 50 g chopped walnuts

**Dish:** 7" souffle dish lined with greaseproof

1. Mix eggs and oil together
2. Combine flour, sugar, cinnamon, raisins, and carrots in a mixing bowl and pour egg mix into flour and stir well.
3. Pour into dish and cook on Combination: **GRILL 3** + **LOW** micro power for 8 mins.
4. Beat cream cheese and butter together and gradually add icing sugar and lemon juice. Sprinkle with walnuts.

### Ginger Cake

**Ingredients**

- 100 g (4 oz) butter
- 100 g (4 oz) golden syrup

1. Place the butter, sugar and syrup in a bowl. Cook on **HIGH** power for 1-2 mins. or until melted. Stir in the rolled oats.
2. Spread half the oat mixture into the dish. Arrange the plums over the top in overlapping rows and sprinkle with cinnamon.
3. Sprinkle the remaining oat mixture over the plums and gently press down.
4. Cook on **Combination: CONVECTION 220°C + LOW** power for 8-10 mins. or until the mixture is firm and golden brown.
5. Cut into slices while hot, then allow to cool in the dish.

**Steamed suet sponge pudding**

**Ingredients**
- 150 g (5 oz) self-raising flour
- pinch of salt
- 50 g (2 oz) caster sugar
- 50 g (2 oz) suet
- 1 egg
- 150 ml (¼ pt) milk
- 30 ml (2 tbsp) jam or golden syrup
- Optional: Add 1 tbsp of sultanas

**Dish:** 1 litre (2 pt) pudding basin

**Oven accessory:** glass turntable

1. In a mixing bowl, sift together the flour and salt. Stir in sugar and suet.
2. Make a well in the centre and add beaten egg and milk. Mix to a soft dropping consistency.
3. Put the jam in the base of the greased pudding basin and pour pudding mixture over. Cook on **HIGH** power for 5-5½ mins. until firm.

**Bread and butter pudding**

**Ingredients**
- 6 slices of bread, buttered and cut in half diagonally
- 75 g (3 oz) mixed dried fruit
- 450 ml (¾ pt) milk
- 3 eggs
- 25 g (1 oz) caster sugar
- 3 ml (½ tsp) nutmeg

**Dish:** 20 x 25 cm (8 x 10") oblong, greased dish

Ingredients
1 cooking apple, peeled and grated
1 carrot, peeled and grated
1 orange, juice and grated rind of
400 g (14 oz) mixed dried fruit
45 ml (3 tbsp) brandy
15 ml (1 tbsp) black treacle
50 g (2 oz) self-raising flour
pinch of salt
15 ml (1 tbsp) cocoa
5 ml (1 tsp) mixed spice
3 ml (1/2 tsp) nutmeg
100 g (4 oz) shredded suet
150 g (5 oz) fresh breadcrumbs
50 g (2 oz) mixed peel
50 g (2 oz) flaked almonds
2 eggs, beaten

Christmas pudding
Serves 6-8

Dish: 1.3 litre (2 1/2 pt) pudding basin lightly greased
Oven accessory: glass turntable

1. Place apple and carrot in a large bowl. Cover and cook on HIGH power for 5 mins. Beat well to make a thick puree.
3. Press into the pudding basin. Cover with greaseproof paper and cook on HIGH power for 4 mins. Stand for 5 mins. Cook on HIGH power for another 2 mins. or until just firm.

N.B. One of the advantages of using your microwave to make this traditional pudding is that it can be made the week before Christmas and stored in a cool dry place. Do not attempt to make the pudding earlier than this, since the flavour will not improve with keeping, unlike a traditionally steamed pudding.

Ingredients
4 medium sized apples
30 ml (2 tbsp) sugar
25-50 g (1-2 oz) mixed dried fruit
25 g (1 oz) butter

Baked apples
Serves 4

Dish: 20 cm (8") shallow dish
Oven accessory: glass turntable

1. Core the apples and score the skin around the middle.
2. Mix together the sugar and fruit and fill the centres of the apples.
3. Dot the top with butter. Stand the apples in a suitable dish and cook on HIGH power for 5 1/2 - 7 mins. Stand for 5 mins. before serving.

N.B. The apples will look quite green when removed from the oven, but they should feel slightly soft when tested with a sharp knife. During the standing time, the colour will become dull and the apples will be tender. The apples will overcook very easily, so take care to undercook slightly. For 1 baked apple cook for 2-3 mins. For 2 baked apples cook for 3-5 mins.
Baking guidelines

Covering
For traditional cakes, with long cooking times, baked on convection mode only, it is necessary to cover the top of the tin with foil 10-15 mins. after the start of baking. This is not applicable to any of the recipes in this section.

Dish size/shape
Always use the exact dish size stated in the following recipes, otherwise cooking times and results will be affected.

Mixing/beating
Cakes cooked by microwave need to be well mixed, but not over beaten. Generally it is unnecessary to cream butter and sugar or beat eggs in an electric mixer or food processor. Do not attempt to cook whisked/fatless sponges, or any cakes containing whisked egg white.

Eggs
The following recipes have been tested using medium eggs. Using a different size of egg may affect cooking times.

Combination cooking.
DO NOT use spring form tins, use smooth, and preferably seamless metal cake tins.

Ingredients
125 g (4 oz) butter
200 g (7 oz) dark chocolate (72% cocoa solids)
175 g (6 oz) soft brown muscovado sugar
2 eggs, beaten
Few drops of vanilla essence
50 g (2 oz) plain flour
5 ml (1 tsp) baking powder

Luscious chocolate brownies

Dish: 18 cm (7") square dish, lined
Oven accessory: glass turntable + metal tray
1. Melt the butter with 50 g of the chocolate in a bowl on MEDIUM power for 1 minute 30 seconds.
2. Put the eggs, sugar and vanilla essence in a bowl, then sift in the flour and baking powder.
3. Stir in the melted chocolate and butter mixture and mix well.
4. Chop the remaining chocolate into rough chunks and stir into the brownie mixture.
5. Spoon into the dish, spread evenly and cook on metal tray, Combination: CONVECTION 220°C + SIMMER power for 9-12 minutes until firm.

Ingredients
225 g (8 oz) self-raising flour
pinch salt
5 ml (1 tsp) baking powder
50 g (2 oz) butter
25 g (1 oz) caster sugar
50 g (2 oz) sultanas
100 ml (3½ fl oz) milk
beaten egg to glaze

Fruit scones

Dish: baking sheet (round)
Oven accessory: glass turntable + metal tray
1. Preheat oven on CONVECTION 210°C.
2. Sift the flour, salt and baking powder together. Rub in fat until the mixture resembles fine breadcrumbs. Add sugar and sultanas.
3. Make a well in the centre and stir in enough milk to form a soft dough.
4. Knead lightly. Pat out to 2 cm (½") thick and cut into 10 rounds with a 5 cm (2") cutter. Place on baking sheet, brush with beaten egg and cook on CONVECTION 210°C for 15 mins. or until well risen and golden brown.

Preserves

Sterilizing jars
Jam jars can be sterilized by microwave ready for your jams. Half fill with water and heat them on HIGH power until water boils (approx. 3 mins. for 2 jars). Empty and drain upside down on kitchen paper. The jars should be warm when filled with jam.

If you wish to cook larger quantities than given in the recipes below, revert to the traditional hob method, using a traditional recipe.

Dish size
Always use a very large pyrex bowl. DO NOT attempt to use jam pans or saucepans in your microwave.

DO NOT LEAVE JAMS UNATTENDED DURING COOKING BECAUSE OF THE HIGH SUGAR CONTENT.

Covering
Do not cover preserves whilst cooking, apart from if recommended in the recipe.

WE DO NOT RECOMMEND THAT YOU USE YOUR MICROWAVE TO STERILISE BABIES’ BOTTLES.
(See details on page 48)
DO NOT SEAL PRESERVING JARS IN YOUR MICROWAVE.

Setting point
To determine whether setting point is reached, place a couple of drops of jam or marmalade on a cold saucer (put one in the fridge whilst making the jam). Leave to cool. The jam should wrinkle on the surface when your finger pushes across the top.

Ingredients
450 g (1 lb) soft fruit, washed
450 g (1 lb) caster sugar
30 ml (2 tbsp) lemon juice
5 ml (1 tsp) butter

Soft fruit jam  Makes approx. 1½ lbs jam

Dish: large bowl
Oven accessory: glass turntable

1. Place all ingredients in a large bowl and stir. Cook on HIGH power for 5 mins. (10-15 mins. if using frozen fruit), stirring frequently. Continue to cook in one minute intervals until sugar has dissolved.

2. Wash down any sugar crystals from around the bowl.

3. Bring mixture to the boil and continue to cook until setting point is reached – approx. 15-25 mins. Test regularly for setting point.
**Orange marmalade**  
*Makes 1 1/2-2 lbs*

**Dish:** 6pt pyrex ® bowl  
**Oven accessory:** glass turntable

1. Grate oranges and lemon ensuring all the pith is left on the fruit. Set the rind aside.  
2. Peel the fruit and put it in a food processor and chop until the pips are broken.  
3. Place the chopped mixture in a large bowl and pour over boiling water. Cover with pierced clingfilm and cook on **HIGH** power for 10 mins.  
4. Strain the mixture through a sieve into another large bowl pressing the pulp well until all the juice is extracted. Discard the pulp.  
5. Stir the shredded rind into the hot juice and cook uncovered on **HIGH** power for 10 mins. until rind is tender, stirring occasionally. Stir in the sugar until dissolved.  
6. Cook on **HIGH** for 8 mins covered with pierced clingfilm. Stir in the butter and cook uncovered to setting point 18-20 mins.  
7. Leave to stand for 10 mins then pour into warmed sterilized jars.  
8. N.B Do not double this recipe as it will boil over.

**Ingredients**  
450 g (1 lb) seville oranges  
1 lemon  
900 ml (1 1/2 pts) water  
450 g (1 lb) sugar  
knob of butter

---

**Lemon curd**  
*Makes 2 lbs*

**Dish:** large bowl  
**Oven accessory:** glass turntable

1. Place all ingredients in bowl. Mix well.  
2. Cook on **HIGH** power for 1 min. Stir. Continue to cook in 1 minute stages until mixture starts to thicken, then cook for 30 secs. at a time until mixture coats back of spoon. (The eggs will curdle if overcooked).  
3. The mixture will thicken on cooling. Pot into warm jars. Cover with a circle of waxed paper and a jam pot cover.

**Ingredients**  
4 lemons, grated rind and juice of  
450 g (1 lb) caster sugar  
4 eggs, beaten  
100 g (4 oz) butter
Questions and answers

Q My microwave oven causes interference with my TV, is this normal?

A Some radio and TV interference might occur when you cook with the microwave oven. This interference is similar to the interference caused by small appliances such as mixers, vacuums, hair dryers, etc. It does not indicate a problem with your oven.

Q My oven has an odour and generates smoke when using the CONVECTION, COMBINATION and GRILL function. Why?

A It is essential that your oven is wiped out regularly particularly after cooking by COMBINATION or GRILL. Any fat and grease that builds up will begin to smoke if not cleaned.

Q Sometimes warm air comes from the oven vents. Why?

A The heat given off from the cooking food warms the air in the oven cavity. This warmed air is carried out of the oven by the air flow pattern in the oven. There isn’t an airtight seal to the air therefore steam can escape. There are no microwaves in the air, or steam. The oven vents should never be blocked during cooking.

Q My oven stops cooking by microwave and “H97” and “H98” appears in the display window.

A The display indicates a problem with the microwave generation system. Please contact an authorised Service Center or ring the Customer Care Centre on 0844 8443868 who can recommend a service agent.
