Important Safety Information

These warnings are provided in the interests of your safety. Ensure that you understand them all before installing or using this appliance. Your safety is of paramount importance. If you are unsure about any of the meanings or these warnings contact the Customer Care Department.

Prior to Installation
Check the appliance for transport damage. Under no circumstances should a damaged appliance be installed. In the event of damage please contact your retailer.

Installation
• This appliance is heavy. Care should be taken when moving it.

• It is dangerous to alter the specifications or attempt to modify this product in any way.

• Ensure that the appliance does not stand on the electrical supply cable. If the supply cable is damaged, it must be replaced by a cable available from your local Service Force Centre.

• Any electrical work required to install this appliance should be carried out by a qualified electrician or competent person.

• Parts which heat up should not be exposed. Whenever possible, the back of the appliance should be close to a wall, but leaving the required distance for ventilation, as stated in the installation instructions.

• The appliance should be left for 2 hours after installation before it is turned on, in order to allow the refrigerant to settle.

Child Safety
• Do not allow children to tamper with the controls or play with the product.

• There is a risk of suffocation! Keep packaging material away from children!

During Use
• This appliance is designed for domestic use only, specifically for the storage of edible foodstuffs. It is not intended for commercial or industrial use.

• Containers with flammable gases or liquids can leak at low temperatures. Do not store any containers with flammable materials, such as spray cans, fire extinguisher refill cartridges etc. in the refrigerator.

• Frozen food should not be refrozen once it has thawed out.

• Do not place carbonated or fizzy drinks in the freezer compartment

• Iod lollies can cause 'frost/frozen burns' if consumed straight from the freezer

• Do not remove items from the freezer compartment if your hands are damp/wet, as this could cause skin abrasions or frost/freezer burns.

• Bottles and cans must not be placed in the freezer compartment they can burst when the contents freeze.

• Manufacturer's recommended storage times should be adhered to. Refer to relevant instructions.

Maintenance and Cleaning
• Before cleaning, always switch off the appliance and disconnect from the electrical supply.

• When unplugging always pull the plug from the mains socket, do not pull on the cable.

Servicing
• This product should be serviced by an authorised engineer and only genuine spare parts should be used.

• Under no circumstances should you attempt to repair the appliance yourself. Repairs carried out by inexperienced persons may cause injury or serious malfunctioning. Contact your local Service Force Centre.

At the end of the Appliance Life
• When disposing of your appliance use an authorised disposal site.

• Remove the plug and ensure that any locks or catches are removed, to prevent young children being trapped inside.

### Instructions for the installer

- Technical specifications: 11
- Installation Positioning: 11
- Electrical Connections: 12
Description of the Appliance

A - Freezer calendar (recommended storage times for frozen foods)
B - Freezer controls
C - Frozen food storage and freezing fresh foods
Operation

Before Use

Remove all packaging and securing tapes. Wash inside the appliance with lukewarm water and bicarbonate of soda (5ml to 0.5 litre of water). Do not use soap or detergent as the smell may linger. Dry thoroughly.

Starting the Appliance

Insert the plug into the wall socket. The green pilot light will illuminate to show that the appliance is switched on.

Thermostat Control

The temperature within the freezer is controlled by the thermostat situated on the lower front of the cabinet. To operate the freezer, proceed as follows:

Turn the thermostat control beyond the ‘O’ position.

When you first start the freezer we suggest that you turn the thermostat to a medium setting in 3-4

0 = Off
1 = Lowest setting, minimum cold
7 = Highest setting, maximum cold

Allow the freezer to run for several hours before placing food inside.

Do not fill the freezer to more than 5mm below the top edge.

Opening/Closing the Lid

The lid is fitted with a tightly closing sealing strip to prevent moisture entering the freezer, increasing the amount of frost formed.

When the lid is opened the air inside the freezer booms - slightly warmer and expands. When the lid is closed again the air is cooled immediately. This may lead to the creation of a vacuum which makes it hard to open the lid again immediately. This is quite normal. Wait for a few minutes until the vacuum has subsided and then open gently. Never use excessive force on the handle.

Freezing Fresh Food

It is important that fresh food placed in the freezer is frozen quickly and that the food already in the freezer is heated as little as possible.

1. Turn the thermostat to the coldest setting 7’ 6-24 hours before placing the food in the freezer.

2. Place the food in the freezer and leave the thermostat at 7’ for a further 24 hours.

3. After 24 hours, return the thermostat to the normal setting.

If the thermostat is accidentally left at the coldest setting the freezer will not be damaged, but energy will be wasted.

Frozen Food Storage

When first starting the freezer or if the freezer has been out of use for some time, we advise you to run your appliance for at least 2 hours at the coldest setting 7’ before storing frozen food.

Do not exceed the storage period indicated by the manufacturer.

Do not open the door frequently or leave it open longer than is necessary.

Important

Do not put carbonated liquids in the freezer.

Ice lollies, if consumed immediately after removal from the freezer, can cause a low temperature skin burn.

Do not remove items from the freezer if your hands are damp/wet, as this could cause skin abrasions or frost/freezer burns.

In the event of a power cut the food in the freezer will not be affected if the power cut is short and the freezer is full.

Do not open the lid. Should the food begin to thaw it must be consumed quickly and must not be re-frozen.

(See Hints and Tips)

Thawing

Deep frozen or frozen food, prior to being used, can be thawed in the fridge or at room temperature, depending on the time available. Small food items may even be cooked from frozen, in this case cooking will take longer.

Any frozen food which is allowed to thaw accidentally should either be eaten as soon as possible, or thrown away. Alternatively, if the food is uncooked and has not been completely defrosted it can be cooked and then refrozen.

Defrosted cooked food must never be re-frozen.
Hints & Tips

Normal Operating Sounds

- You may hear faint gurgling or bubbling sounds when the refrigerant is pumped through the coils or tubing.
- When the compressor is on, the refrigerant is being pumped round and you will hear a whirring sound or pulsating noise from the compressor.
- A thermostat controls the compressor and you will hear a faint ‘click’ when the thermostat cuts in and out.

Food Storage

To obtain the best performance from your freezer:

- Do not store warm food or evaporating liquid.
- Avoid buying frozen food if you cannot store it straight away. The use of an insulated container is advisable. When you arrive home, place the frozen food in the freezer immediately.
- Do not push food together too much, try to allow air to circulate around each item.
- Do not store food uncovered.
- Ensure that food placed in the freezer is dated and labelled and used in date order to ensure that food is consumed at its best.
- Lean food keeps better and longer than fatty food, salt reduces the storage time.
- Wrap the food in polythene or aluminium freezing bags or foil so that they adhere to the food and provide an airtight seal.
- Packaging which is swollen or has traces of retrofrozen water droplets on the pack could indicate that the product has not been kept at a suitable temperature and that it may have lost its original quality. Partially thawed food must not be refrozen, it must be consumed within 24 hours. Never exceed the storage times indicated by the manufacturer.

Energy Saving Advice

- Do not install the appliance close to sources of heat, such as a boiler or radiator.
- Locate the appliance in a cool well ventilated room and make sure that the air openings of the appliance are not obstructed.
- Avoid unnecessary frosting in the cabinet by packing all foodstuffs into airtight packages before placing them in the freezer.
- Food which is to be frozen (when cool) should be placed in the fridge before being transferred to the freezer.
- Try to avoid keeping the lid open for long periods or opening the lid too frequently as warm air will enter the cabinet and cause the compressor to switch on unnecessarily often.
- Ensure there are no obstructions preventing the lid from closing properly.

In the Event of a Power Failure

If there is a power failure during the storage of frozen foods, keep the lid closed. If the temperature within your freezer should rise, do not refreeze the food without checking its condition. The following guidelines should assist you:

Ice Cream: Once thawed should be discarded.

Fruits & Vegetables: If soft should be cooked and used up.

Breads & Cakes: Can be refrozen without danger.

Shellfish: Should be refrigerated and used up quickly.

Cooked Dishes: i.e. casseroles should be refrigerated and used up.

Large Pieces of Meat: Can be refrozen providing there are still ice crystals remaining within them.

Small Joints: Should be cooked and can then be refrozen as cooked dishes.

Chicken: Should also be cooked and refrozen as a fresh dish.
Defrosting

The freezer compartment will become progressively covered with frost. This should be removed with the special plastic scraper provided whenever the thickness of frost exceeds ¼".

During this operation it is not necessary to switch off the power supply or to remove the foodstuffs.

However, when the ice becomes very thick on the inner liner, complete defrosting should be carried out and it is advisable to perform this operation when the appliance is empty.

To carry out complete defrosting:

1. It is advisable to disconnect the appliance from the electrical supply. If the plug is inaccessible, turn the thermostat to ‘0’.

2. Remove any stored food, wrap in several layers of newspaper and store in a cool place.

3. Leave the lid open.

4. To accelerate the defrosting process place a bowl of hot (not boiling) water inside the freezer and close the lid.

5. When defrosting is completed, dry the interior thoroughly.

6. Turn the thermostat control back to a medium setting between 3-4 and leave to run for at least 2 hours.

7. Replace the previously removed food.

Important

A temperature rise of the frozen food packs during defrosting may shorten their safe storage life.

Never use sharp metal tools to scrape off frost from the evaporator as this could damage the appliance beyond repair.

Maintenance and Cleaning

Before any maintenance or cleaning is carried out you must DISCONNECT the appliance from the electricity supply

Internal Cleaning

Clean the inside and accessories with warm water and bicarbonate of soda (5ml to 0.5 litre of water).

Rinse and dry thoroughly.

NEVER use detergents, abrasive powders, highly perfumed cleaning products or wax polishes to clean the interior as these will damage the surface and leave a strong odour.

External Cleaning

Wash the outer cabinet with warm soapy water.

When the Appliance is not in Use

When the appliance is not in use for long periods, disconnect from the electricity supply, empty all foods and clean the appliance, leaving the lid open to prevent unpleasant smells.
# Something not Working

If the appliance is not working correctly, please carry out the following checks before contacting your local Zanussi Service Force Centre.

<table>
<thead>
<tr>
<th>SYMPTOM</th>
<th>SOLUTION</th>
</tr>
</thead>
<tbody>
<tr>
<td>No power to the appliance</td>
<td>• Check there is power at the socket</td>
</tr>
<tr>
<td></td>
<td>• Check there is not a power cut by checking the household lights.</td>
</tr>
<tr>
<td></td>
<td>• Check the mains fuse has not blown.</td>
</tr>
<tr>
<td></td>
<td>• Check the thermostat is turned to the correct setting, relevant to ambient conditions.</td>
</tr>
<tr>
<td>The temperature in the freezer is too high</td>
<td>• Check the ambient temperature is within the appliance’s operating limits of 10°C - 32°C.</td>
</tr>
<tr>
<td>The freezer lid will not open</td>
<td>• Has the lid just been opened? If so leave for a few minutes to allow the air pressure to equalise.</td>
</tr>
<tr>
<td></td>
<td>• Adjust the thermostat to give correct temperature control. Refer to 'Temperature Control'.</td>
</tr>
<tr>
<td></td>
<td>• Check that the lid is closed.</td>
</tr>
<tr>
<td></td>
<td>• Large quantities of food have recently been placed in the cabinet and or the lid is frequently opened.</td>
</tr>
<tr>
<td></td>
<td>• Check that air ventilation is not obstructed.</td>
</tr>
<tr>
<td>Excessive frost and ice has built up</td>
<td>• Ensure the lid has not been left open.</td>
</tr>
<tr>
<td></td>
<td>• Check that nothing is preventing the lid from closing.</td>
</tr>
<tr>
<td></td>
<td>• Is the lid gasket intact and clean?</td>
</tr>
<tr>
<td></td>
<td>• Has advised periodic cleaning been carried out.</td>
</tr>
<tr>
<td>Noise</td>
<td>• Refer to ‘Normal Operating Sounds’</td>
</tr>
</tbody>
</table>

If after all these checks your appliance still does not operate correctly, contact your local Zanussi Service Force Centre.

Please note that it will be necessary to provide proof of purchase for any in-guarantee service calls.

In-guarantee customers should ensure that the above checks have been made, as the engineer will make a charge if the fault is not a mechanical or electrical breakdown.
Service and Spare Parts

In the event of your appliance requiring service, or if you wish to purchase spare parts, please contact your local Zanussi Service Force Centre by telephoning:

0870 5 929929

Your call will be routed to the Service Force Centre covering your post code area. The address of your local Service Force Centre is detailed in the accompanying Customer Care Book.

Before calling out an engineer, please ensure you have read the details under the heading ‘Something Not Working?’. When you contact the Service Force Centre you will need to give the following details:

1. Your name, address and post code.
2. Your telephone number.
3. Clear and concise details of the fault.
4. The model and serial number of the appliance (found on the rating plate).
5. The purchase date.

Customer Care Department

For general enquiries concerning your Zanussi appliance or for further information on Zanussi products, you are invited to contact our Customer Care Department by letter or telephone, as follows:-

Customer Care Department
Zanussi
55-77 High Street
Slough
Berkshire
SL1 1DZ

Tel: 08705 727 727
Guarantee Conditions

We, Zanussi, undertake that if within 12 months of the date of the purchase this Zanussi appliance or any part thereof is proved to be defective by reason only of faulty workmanship or materials, the company will, at our option repair or replace the same FREE OF CHARGE for labour, materials or carriage on condition that:

- The appliance has been correctly installed and used only on the electrical supply stated on the rating plate.
- The appliance has been used for normal domestic purposes only, and in accordance with the manufacturer's instructions.
- The appliance has not been serviced, maintained, repaired, taken apart or tampered with by any person not authorised by us.
- All service work under this guarantee must be undertaken by a Zanussi Service Force Centre.
- Any appliance or defective part replaced shall become the Company's property.

Home visits are made between **8.30am** and **5.30pm Monday to Friday**. Visits may be available outside these hours in which case a premium will be charged.

EXCLUSIONS

This Guarantee does not cover:

Damage or calls resulting from transportation, improper use or neglect, the replacement of any light bulbs or removable parts of glass or plastic.

- Costs incurred for calls to put right an appliance improperly installed or calls to appliances outside the United Kingdom.
- Appliances found to be in use within a commercial environment, plus those which are the subject of rental agreements.
- Products of Zanussi manufacture which are not marketed by Zanussi.

This guarantee is in addition to your statutory and legal rights.

ZANUSSI EUROPEAN GUARANTEE

If you should move to another country within Europe then your guarantee moves with you to your new home subject to the following qualifications:

- The guarantee starts from the date you first purchased your product.
- The guarantee is for the same period and to the same extent for labour and parts as exists in the new country of use for this brand or range of products.
- This guarantee relates to you and cannot be transferred to another user.
- Your new home is within the European Community (EC) or European Free Trade Area.
- The product is installed and used in accordance with our instructions and is only used domestically, i.e. a normal household.
- The product is installed taking into account regulations in your new country.

Before you move please contact your nearest Customer Care Centre, list below, to give them details of your new home. They will then ensure that the local Service Organisation is aware of your move and able to look after you and your appliances.

Installation

**Positioning**
- Place the freezer horizontally on a firm surface, resting on all four plastic feet. Use a wooden block or similar object to compensate for any bumps/holes in the surface.
- The room should be dry and adequately ventilated.
- If the room temperature exceeds 32°C, or falls below freezing point, the freezer will not function as intended.
- Do not place the freezer close to sources of heat, radiators, chimneys, etc., and do not place the freezer in direct sunlight.
- After installation, leave the freezer to stand for 2 hours before switching it on. This allows the refrigerant to settle.
- Please ensure that when the appliance is installed it is easily accessible for the engineer in the event of a breakdown.
Electrical Connection

Any electrical work required to install this appliance should be carried out by a qualified electrician or competent person.

WARNING: THIS APPLIANCE MUST BE EARTHED.
The manufacturer declines any liability should this safety measure not be observed.
If the plug that is fitted to your appliance is not suitable for your socket outlet, it must be cut off and the appropriate plug fitted.
Remove the fuse from the cut off plug.
The cut off plug should then be disposed of to prevent the hazard of shocks in case it should be plugged into a 13amp socket in another part of your home.

Important
The wires in the mains lead are coloured in accordance with the following code:

- Green and Yellow - Earth
- Blue - Neutral
- Brown - Live

If you fit your own plug, the colours of the wires in the mains lead of your appliance may not correspond with the markings identifying the terminals in your plug, proceed as follows:
Connect the Green and Yellow (earth) wire to the terminal in the plug which is marked with the letter ‘E’ or the earth symbol or coloured green and yellow.
Connect the blue (neutral) wire to the terminal in the plug which is marked with the letter ‘N’ or coloured black.
Connect the brown (live) wire to the terminal in the plug which is marked with the letter ‘L’ or coloured red.
The plug moulded onto the lead incorporates a fuse.
For replacement, use a 13amp BS1362 fuse. Only ASTA or BSI approved fuses should be used.
The plug must not be used if the fuse cover/carrier is lost. The cover/carrier is indicated by the coloured insert at the base of the plug.

A replacement cover/carrier must be obtained from your local Zanussi Service Force Centre whose address is listed in the Customer Care Booklet which accompanies your instruction manual.

This appliance complies with the E.E.C. Directive No. 87/308 of 2.6.87 relative to radio interference suppression.

This appliance complies with the following E.E.C. Directives:
- 73/23 EEC of 19.2.73 (Low Voltage Directive) and subsequent modifications;
- 89/336 EEC of 3.5.89 (Electromagnetic Compatibility Directive) and subsequent modifications.
Please ensure that when the appliance is installed it is easily accessible for the engineer in the event of a breakdown.
