For Larders (coolers):

Defrosting:

1. Warm water can be placed in the freezer compartment.
2. Leave the door open and accept the defrosting process one or more basins of warm water.
3. Switch the refrigerator off and spread the defrosting water in the basin. Keep in a cool place. The defrosting will shorten their storage life.
4. Defrosting is a simple process. Frozen foods should be unwrapped in several layers of paper and stored in a cool place. Let it dry completely to prevent the freezing of other foods.

For this compartment, defrost the defrosting period of the compartment at least twice a year. The defrost compartment should be cleaned in the way as the refrigerator. The defrost, accumulated in the defrost compartment, should be removed periodically.

For 2 star and 4 star model refrigerators:

You can also use glass of the water to defrost the inside.

Defrosting is not recommended by the manufacturer of the refrigerator and washer to avoid water damage.

You should clean the defrost compartment with warm water at least twice a year.

Do not use abrasive products, detergents or soap after cleaning the defrost compartment.

Clean the accessories separately with soap and water using a solution of detergent or soap and lukewarm water. Do not clean the accessories by pointing water.

Disconnect until from the power supply before cleaning.

Cleaning and Maintenance
**Recommendations**

When water is scattered over surface of refrigerator:

---

**Replacing the Light Bulb**

When replacing the light of the refrigerator compartment:
A. Information on Disposal for Users (private households)

1. In the European Union

Attention: If you want to dispose of this equipment, please do not use the ordinary dust bin.

Used electrical and electronic equipment must be treated separately and in accordance with legislation that requires proper treatment, recovery and recycling of used electrical and electronic equipment.

Following the implementation by member states, private households within the EU states may return their used electrical and electronic equipment to designated collection facilities free of charge. In some countries, your local retailer may also take back your old product free of charge if you purchase a similar new one. (*) Please contact your local authority for further details.

If your used electrical or electronic equipment has batteries or accumulators, please dispose of these separately beforehand according to local requirements.

By disposing of this product correctly you will help ensure that the waste undergoes the necessary treatment, recovery and recycling and thus prevent potential negative effects on the environment and human health which could otherwise arise due to inappropriate waste handling.

2. In other Countries outside the EU

If you wish to discard this product, please contact your local authorities and ask for the correct method of disposal.

For Switzerland: Used electrical or electronic equipment can be returned free of charge to the dealer, even if you don’t purchase a new product. Further collection facilities are listed on the homepage of www.swico.ch or www.sens.ch.
