MODELS: R1550C & R1550SL

Installation and operating instructions
Introduction
Section 1. Installation

Section 2. Safety Advice

- Appliance is not standing on the supply cable.
- Connect the plug to an adequate, 3-pin socket outlet and ensure that the plug is not out of the reach of children.
- Ensure that the appliance is visible and does not come in contact with any damp or wet surfaces (e.g., by a sink).
- Do not place any heavy items on the top of the appliance.
- If necessary, please ensure that the gap between the condenser and the rear wall is at least 1 inch.
- A ceiling or wall bracket must be used for the installation. If this cannot be done, the appliance must be fixed to the wall with screws provided.

Section 3. Operating the Appliance

- IMPORTANT: The appliance must be left to stand in an upright position for at least 4 hours before being switched on for the first time.

Section 4. Maintenance
3.3. Normal Operating Sounds

3.4. Energy Saving Advice

The temperature setting knob is located on the right hand side of the inner cabinet.
4.4 Changing the interior light bulb

4.3 When the appliance is not in use

Increased energy consumption

External cleaning

Combustion of fuel and other products. This may result in the formation of soot and creosote, which can be harmful to your health. To prevent this, always ensure that the appliance is cleaned regularly.

4.1 Internal cleaning

Important information:

When cleaning the appliance, always disconnect the power supply.

To clean the interior, use a soft cloth dampened with warm water and a small amount of mild detergent.

Section 4. Maintenance

Dismounting and cleaning the appliance:

Before any maintenance or cleaning work is carried out, DISCONNECT the appliance from the electricity supply.
Important Notice:

Check with your insurance provider.

Any warranty provided with this product does not cover loss of insurance or property. Extra coverage can be added to your standard homeowner's insurance if required. Please contact your insurance provider for additional information.

If the product does not work as expected, please refer to the Troubleshooting section for assistance. Contact the nearest service representative for further information.

There is no harm to the appliance.

Please contact your retailer if there is a problem with the appliance.

Ensure that the appliance has been installed correctly (see Section 1).

Refer to Normal Operating Sounds, Section 3.4.

The appliance is making a noise:

- The washer door is open. Close the door.
- The dryer door is open. Close the door.
- The door seal is damaged. Replace the door seal.
- The door seal is not installed correctly. Install the door seal correctly.
- The door is open. Close the door.
- The door is not closed correctly. Close the door correctly.

Check the fuse in the plug (must be 13 amp). Check there is power to the electric socket/appliance.

If all else fails, please contact your retailer.
