Ripple 1200W Steam Iron
with Non-Stick Soleplate

OPERATING INSTRUCTIONS

Thank you for the purchase of this quality LLOYTRON product. Use carefully and in accordance with the instructions enclosed. It should give you trouble-free service over a long period of time. Please keep these instructions for future reference.

FEATURES

- 1200 Watts Power
- Steam, Burst of Steam, Vertical Steam, Spray or Dry Ironing
- Non-Stick Soleplate & Steam Control
- Translucent Water Tank
- 1.8m Tangle-Free Swivel Cord
- Water Filling Jug
- Indicator Light
OPERATION

IRONING TIPS
1. Sort the articles to be ironed according to the fabric. Ironing instructions are usually sewn onto an inside seam of the garment and these should be followed at all times. Start your ironing with the fabrics requiring the lowest heat setting.
2. If you are unsure of the fibre content of a garment, test a small area (a steam or inside hem) before ironing.
3. When in doubt, start with low heat. Humidity remains gradually increase heat to find the best setting for good results without damaging the fabric.

HOW TO FILL WITH WATER
Note: Remove the supply cable plug from the socket outlet before filling the reservoir with water.
Confirm that the steam button is in the "MIN" position when filling the water tank. Fill the tank to the "MAX" line. Do not overfill. Check the correct water level in the tank in the position shown.

FIRST USE OF YOUR IRON
1. Before using for the first time, check if the voltage rating on the base plate corresponds to the mains voltage in your home.
2. Remove any labels or stickers on the iron.
3. Some parts of the iron have been slightly greased as a result the iron may smoke slightly when switched on for the first time. After a short time, however, this will cease.
4. Normal tap water can be used for ironing, but if you live in a hard water area, to ensure optimum performance of your iron, we recommend using distilled or de-ionised water.
Warning: The iron must not be left unpackaged while it is connected to the supply.

USING AS A STEAM IRON
1. Unwrap the cord. Be sure the iron is unplugged from the outlet before filling with water.
2. Turn the selector switch to minimum.
3. Stand the iron on a heat rest.
4. Fill the iron with water. Be careful to never fill over the "MAX" line on the water tank.
5. Plug the iron in.
6. Set the dial to the required position and the pilot lamp will illuminate.
7. In this setting, the iron can be used as a steam iron when the pilot lamp goes out. The lamp will illuminate and go out regularly during ironing as an indication that the temperature control is working properly.
8. Slide the steam control to the desired position to create required steam. Stand the iron on heat rest when repositioning clothing or while not in use. Steaming will stop when the iron is placed on heat rest.

USING THE STEAM BURST BUTTON
Be sure there is water in the tank and the Temperature Control Dial is on steam.
1. Using the iron horizontally. Lift the iron end press the steam burst button. You may need to press the button a few times after filling to activate the pump. The burst steam facility can be used only when ironing with low ironing temperatures.
2. Using the iron vertically. The burst function can also be used when the iron is held in the vertical position to remove creases from hanging clothes, curtains, etc.

USING THE SPRAY BUTTON
As long as there is enough water in the water tank, you may use the spray button at any temperature setting on both steam and dry ironing. Press the button several times to activate the pump while you are ironing.

USING AS A DRY IRON
The iron can be used as a dry iron, even if there is water in the water tank. Do not put water in the water tank when the iron is to be used as a dry iron for MANY HOURS.
1. Stand the iron on the heat rest, and then plug the iron in.
2. Turn the steam control knob to "NOV".
3. Adjust the dial to the proper temperature control.
4. When the pilot lamp goes out, it indicates the iron has reached the required temperature.

CARE AND USE INSTRUCTIONS
1. Avoid ironing over zippers, rivets on jeans, etc.; as they will scratch the ironplate. Iron around them instead.
2. Water and its mineral vary widely by geographic location. If you live in a hard water area, to ensure optimum performance of your iron, we strongly recommend the use of distilled or de-ionised water, which is readily available in retail stores.
3. Do not disassemble or repair your iron yourself.

TO EMPTY AND STORE
Be sure the iron is unplugged first. Pour out any remaining water by shaking the iron. Make it a habit to empty the iron after each use. After emptying the water tank, store the hot iron in an upright position, so that any moisture remaining will evaporate quickly. Let iron cool completely before storing.

NOTE
There is no Anti-Drip function on this model.

WARNING
DO NOT USE IF CORD IS DAMAGED.
SPECIAL INSTRUCTIONS

1. To avoid a circuit overload, do not operate another high wattage appliance on the same circuit.
2. If an extension cord is absolutely necessary, a 13-ampere cord should be used. Devices rated for less amperage may overheat. Care should be taken to arrange the cord so that it cannot be pulled or tripped over.

TEMPERATURE CONTROL

Turn your temperature control dial to the position you desire according to the following fabric indications:

- **Synthetics**
- **Silk/Weft**
- **Seda/Laine**
- **Chenille/Cambric**
- **Linen/Cotton**
- **Silk/Cotton**
- **Seda/Weave**
- **Linen/Baumwolle**

CLEANING AND CARE

**MAINTENANCE**: This appliance has been designed to operate over a long period of time with a minimum of maintenance. Continuous satisfactory operation depends upon proper care and regular cleaning.

**Warning!**: Before performing any maintenance or cleaning of this appliance, disconnect the appliance from the electrical supply. Any calculations should be cleaned occasionally with a clean, dry cloth.

**Cleaning**: The exterior surface of the appliance and the lid should be cleaned with a clean, damp cloth only.

**DO NOT USE ABRASIVE CLEANERS ON ANY PART OF THIS APPLIANCE.**

IMPORTANT SAFEGUARDS AND PRECAUTIONS

- Read all instructions carefully.
- For Household Use only. Not intended for commercial use.
- Only for indoor use. Do not use outside or in damp conditions.
- Before plugging into mains socket, check whether supply line voltage and current rating are in compliance with the rated electrical parameters shown on the rating label.
- Do not use for any purposes other than the appliance intended use.
- This appliance is not intended to be operated by means of an external timer or separate remote-control system.
- To prevent damage to the mains cord, do not let it pass over sharp corners, edges or hot surfaces.
- If the supply cable is damaged, it must be replaced by the manufacturer or a similarly qualified person in order to avoid a hazard.
- Do not use if the appliance or cord is damaged.
- Always unplug when not in use.
- To prevent against the risk of electric shock, do not immerse any part of the appliance in water.
- The appliance should only be used on a flat surface.
- This appliance is not intended for use by persons with reduced physical, sensory or mental capabilities, or lacks of experience and knowledge, unless they have been given supervision or instruction concerning use of the appliance, by a person responsible for their safety.
- Children should be supervised to ensure they do not play with this appliance.
- Cleaning and user maintenance shall not be made by children.
- The iron should always be turned to OFF before plugging in or unplugging from outlet. Never pull the cord to disconnect from outlet instead grasp plug and pull to disconnect.
- Let iron cool completely before closing the ironing board. Do not wrap around the iron, this damages the cord.
- Always disconnect iron from electrical outlet when filling with water or emptying and when not in use.
- Do not operate iron with a damaged cord or if the iron has been dropped or damaged. To avoid the risk of electric shock, do not disassemble the iron, take it to a qualified service center for examination and repair.
- Do not leave iron unattended while connected or on an ironing board.
- Burns can occur from touching hot metal parts, hot water or steam.
- Use caution when you turn the steam iron upside down—there may be hot water in the water tank.
- Push steam button a few times and lightly shake iron after use to ensure all water is drained. The remaining moisture will evaporate if you then plug in the cord and heat iron for a few moments.
- The iron must be used and rested on a suitable stable surface, and out of reach of children.
- When not in use, even for short periods of time, turn off the iron and leave on a suitable stable surface.
- Always unplug the iron, when not in use.
WE EE / ENVIRONMENTAL PROTECTION

Disposal of Electrical and Electronic Equipment
Do not dispose of this product with household waste. For the proper treatment, recovery and recycling please take this product to the appropriate waste collection point.

If you are unsure where this may be, please contact your local authority.
Improper disposal may be harmful to the environment.

UK PLUG REWIRING

Your appliance operates on 230-240V~50Hz AC Mains and comes fitted with a 3 pin BS Approved plug, so that it is ready for use by simply plugging into AC Mains.
Should you need to change or refit a plug, proceed as follows:

IMPORTANT:
The wires in the mains lead are coloured in accordance with the following code:

BLUE : NEUTRAL (N)
BROWN : LIVE (L)
GREEN & YELLOW : EARTH (E)

As the colours of the wires in the mains lead of this appliance may not correspond with the coloured markings identifying the terminals in your plug, proceed as follows:

The BLUE wire must be connected to the terminal which is marked with the letter "N" or coloured BLACK.
The BROWN wire must be connected to the terminal which is marked with the letter "L" or coloured RED.
The GREEN & YELLOW wire must be connected to the terminal which is marked with the letter "E", with this symbol or coloured GREEN.

DO NOT CONNECT EITHER WIRE TO THE EARTH TERMINAL OF A 3-PN PLUG.

Always ensure that the Mains Cord is inserted into the Plug through the Cord Guard or Cable Clamp, and that the Cord Guard screws are tightened to clamp the Cord (outer sheath and inner coloured wires) in position in the Plug.
Make sure the Plug top is also fitted securely.

The supply cord cannot be replaced. If the cord is damaged, the appliance should be disposed of.

This appliance must be protected by a 13 A fuse. If using a 13 A fuse an RCD of 10 mA must be used. If a fusing device is already fitted, it must be an approved BS1362 compliant fuse.
