INTRODUCTION
Thank you for the purchase of this quality LLOYTRON product. Used carefully and in accordance with the instructions set out below, it should give you trouble free service over a long period of time. Please keep these instructions for future reference.

FEATURES
- 1200 watts power
- Shot of Steam, Steam, Spray or Dry Ironing options
- Vertical Steam Capability
- Non-Stick Sole Plate
- Adjustable Temperature Control
- Spray Button and Nozzle
- Water Filling Jug
- The unit is designed and manufactured to conform to British Safety Standards, and also to EMC Regulations.

CONNECTION TO MAINS
Your appliance operates on 220-240V~50Hz AC Mains and comes fitted with a 3-pin BSI Approved plug, so that it is ready for use by simply plugging into AC Mains. Should you need to change or refit a plug, proceed as follows:

IMPORTANT:
The wires in the mains lead are coloured in accordance with the following code:

- BLUE : NEUTRAL (N)
- BROWN : LIVE (L)
- GREEN & YELLOW : EARTH (E)

Neutral (N) /Live (L)

13A Fuse

As the colours of the wires in the mains lead of this appliance may not correspond with the coloured markings identifying the terminals in your plug, proceed as follows:

- The wire which is coloured BLUE must be connected to the terminal which is marked with the letter "N" or coloured BLACK.
- The wire which is coloured BROWN must be connected to the terminal which is marked with the letter "L" or coloured RED.
- The wire which is coloured GREEN & YELLOW must be connected to the terminal which is marked with the letter "E" or or coloured GREEN.

DO NOT CONNECT EITHER WIRE TO THE EARTH TERMINAL OF A 3-PIN PLUG

Always ensure that the Mains Cord is located into the Plug through the Cord Guard or Cable Clamp, and that the Cord Guard screws are tightened to clamp the Cord (outer sheath and inner coloured wires) in position in the Plug. Make sure the Plug top is also fitted securely.

This appliance must be protected by a 13-amp fuse in a 13-amp type (BS1363) plug. Should you need to replace the fuse, use only an ASTA approved BS1362 fuse.

SPECIAL INSTRUCTIONS
1. To avoid a circuit overload, do not operate another high wattage appliance on the same circuit.
2. If an extension cord is absolutely necessary, a 15-ampere cord should be used. Cords rated for less amperage may overheat. Care should be taken to arrange the cord so that it cannot be pulled or tripped over.

IMPORTANT SAFEGUARDS AND PRECAUTIONS

SAVE THESE INSTRUCTIONS
- Read all instructions
- Use iron only for its intended use
- To protect against a risk of electric shock, do not immerse the iron in water or other liquids.
- Do not place the iron on a wet surface.
- The iron should always be turned to 'OFF' before plugging or unplugging from outlet. Never pull the cord to disconnect from outlet; instead, grasp plug and pull to disconnect.
- Do not allow cord to touch hot surfaces.
- Do not use extension cords or adapters.
- Always disconnect iron from electrical outlet when filling with water or emptying and when not in use.
- Do not operate iron with a damaged cord or if the iron has been dropped or damaged. To avoid the risk of electric shock, do not disassemble the iron, take it to a qualified serviceman for examination and repair.
- Incorrect reassembly can cause a risk of electric shock when the iron is used.
- If the supply cable is damaged, it must be replaced by the manufacturer or their service agent or similarly qualified person in order to avoid a hazard.
- Close supervision is necessary for any appliance being used near children. Do not leave iron unattended while connected or on an ironing board.
- Burns can occur from touching hot metal parts, hot water or steam. Use caution when you turn a steam iron upside down – there may be hot water in the water tank.
- An approved service centre should carry out all repair work.
- Push steam button a few times and lightly shake iron after use to ensure all water is drained.
- The remaining moisture will evaporate if you then plug in the cord and heat iron for a few moments.
- The iron must be used and rested on a suitable stable surface, and out of reach of Children.
- When not in use, even for short periods of time, turn off the iron and leave on a suitable stable surface.
- Always unplug the iron, when not in use.
HOW TO USE

Basic Ironing Techniques

IRONING TIPS
1. Sort the articles to be ironed according to the fabric. Ironing instructions are usually stitched onto an inside seam of the garment and these should be followed at all the times. Start your ironing with the fabrics requiring the lowest heat setting.
2. If you are unsure of the fibre content of a garment, test a small area (a steam or inside hem) before ironing.
3. When in doubt, start with low heat. If wrinkles remain, gradually increase heat to find the best setting for good results without damaging the fabric.

HOW TO FILL WITH WATER
Note: Remove the supply plug from the socket-outlet before filling the reservoir with water.

Confirm that the steam button is in the MIN position when filling the water tank. Fill the tank to the "MAX" line. Do not overfill. Check the correct water level in the tank in the position shown.

FIRST USE OF YOUR IRON
1. Before using for the first time, check if the voltage rating on the base plate corresponds to the mains voltage in your home.
2. Remove any labels or stickers on the iron.
3. Some parts of the iron have been slightly greased and as a result the iron may smoke slightly when switched on for the first time. After a short while, however, this will cease.
4. Normal tap water can usually be used for ironing, but if you live in a hard water area, to ensure optimum performance of your iron, we recommend using distilled or de-ionised water.

Warning: The iron must not be left unattended while it is connected to the supply.

USING AS A STEAM IRON
1. Unwrap the cord. Be sure the iron is unplugged from the outlet before filling with water.
2. Turn the selector switch to minimum.
3. Stand the iron on its heel rest.
4. Fill the iron with water. Be careful to never fill over the "MAX" line on the water tank.
5. Plug the iron in.
6. Set the dial to the required position and the pilot lamp will illuminate.
7. In this setting, the iron can be used as a steam iron when the pilot lamp goes out. The lamp will illuminate and go out regularly during ironing as an indication that the temperature control is working properly.
8. Slide the Steam Controller to the desired position to create required steam. Stand the iron on heel rest when rearranging clothing or while not in use. Steaming will stop when the iron is placed on heel rest.

USING THE STEAM BURST BUTTON
Be sure there is water in the tank and the Temperature Control Dial is on steam.
1. Using the iron Horizontally. Lift the iron and press the steam burst button. You may need to press the button a few times after filling to activate the pump. The burst steam facility can be used only when ironing with high ironing temperatures.
2. Using the iron Vertically. The burst function can also be used when the iron is held in the vertical position to remove creases from hanging clothes, curtains, etc.

USING THE SPRAY BUTTON
As long as there is enough water in the water tank, you may use the spray button at any temperature setting on both steam and dry ironing. Press the button several times to activate the pump while you are ironing.

USING AS A DRY IRON
The iron can be used as a dry iron, even if there is water in the water tank. Do not put water in the water tank when the iron is to be used as a dry iron for MANY HOURS.
1. Stand the iron on the heel rest, and then plug the iron in.
2. Turn the steam control knob to 'MIN'.
3. Adjust the dial to the proper temperature control.
4. When the pilot lamp goes out, it indicates the iron has reached the required temperature.

CARE AND USE INSTRUCTIONS
1. Avoid ironing over zippers, rivets on jeans, etc., as they will scratch the soleplate. Iron around them instead.
2. Water and its minerals vary widely by geographic location. If you live in a hard water area, to ensure optimum performance of your iron, we strongly recommend the use of distilled or de-ionised water, which is readily available in retail stores.
3. Do not disassemble or repair your iron yourself.

TO EMPTY AND STORE
Be sure the iron is unplugged first. Pour out any remaining water by shaking the iron. Make it a habit to empty the iron after each use. After emptying the water tank, store the hot iron in an upright position, so that any moisture remaining will evaporate quickly. Let iron cool completely before storing.

TEMPERATURE CONTROL
Turn your temperature control dial to the position you desire according to the following fabric indications:

- Synthetics
- Silk/Wool
- Linen/Cotton
- Synthetic
- Soie/Laine
- Toile/Coton
- Chemiefasern
- Seide/Wolle
- Leinen/Baumwolle
- Leinen/Baumwolle

CLEANING AND CARE

MAINTENANCE:
This appliance has been designed to operate over a long period of time with a minimum of maintenance. Continuous satisfactory operation depends upon proper care and regular cleaning.

Warning: Before performing any maintenance or cleaning of this appliance, disconnect the appliance from the electrical supply.

CLEANING:
The exterior surface of the appliance and the soleplate should be cleaned with a clean damp cloth only.
DO NOT USE ABRASIVE CLEANERS ON ANY PART OF THIS APPLIANCE.
SPECIFICATIONS
Operating Voltage: 220-240v~ 50Hz
Wattage: 1200w

CAUTION
RISK OF ELECTRIC SHOCK

DO NOT OPEN
The Lightning flash with arrowhead symbol, within an equilateral triangle, is intended to alert the user of the presence of uninsulated "dangerous voltage" within the product's enclosure that may be of sufficient magnitude to constitute a risk of electric shock to person.

The exclamation point within an equilateral triangle is intended to alert the user of the importance of operating and maintenance (servicing) instructions in the literature accompanying the product.

CAUTION!
This appliance is not intended for use by persons with reduced physical, sensory or mental capabilities, or lack of experience and knowledge, unless they have been given supervision or instruction concerning use of the appliance, by a person responsible for their safety.

WEEE / ENVIRONMENTAL PROTECTION
Disposal of Electrical and Electronic Equipment
Do not dispose of this product with household waste. For the proper treatment, recovery and recycling please take this product to the appropriate waste collection point. If you are unsure where this may be, please contact your local authority.
Improper disposal may be harmful to the environment.

SERVICE WARRANTY
NOTE: THESE STATEMENTS DO NOT AFFECT YOUR STATUTORY RIGHTS AS A CONSUMER.

This product has been manufactured under the strictest quality control procedures, and using the highest quality of materials, to ensure excellent performance and reliability. It will give very good and long lasting service, provided it is properly used and maintained.

LLOYTRON plc offer this product subject to the understanding that should any defect in manufacture or materials appear in it within 12 months of the date of purchase, the dealer from whom it was purchased will arrange for such a defect to be rectified without any charge provided:
1) Reasonable evidence is supplied of the product having been purchased within 12 months of the date of claim
2) The defect is not a consequence of the product having been misused, e.g. connected to the incorrect voltage, used contrary to the instructions provided, or subject to accidental damage (whether in transit or otherwise), neglect or inexpert repair.
