**Warning:** If the fabric consists of various kinds of fabrics, always follow the ironing instructions on the garment label. If there are no instructions, but you know the type of fabric, please consult your local dry cleaner. If the information label on the garment is missing according to symbols on the information label, it is better not to iron at all. If it is not possible to sort the laundry by the kind according to the ironing guide, do not iron at lower temperature. The type of clothes and the amount of applied (pressing) liquid matter are also considerations. Remove any stickers, protective film or storage cover from the iron. When used for the first time, you may notice a slight emission of smoke and hear some sounds made by expanding iron. In this case, you may leave the iron in the drawer. If not, some parts of the iron have been slightly greased. When the operation guide is used, the iron should always be turned off before plugging or unplugging from the outlet. Never your hand is disconnected. Some parts are damaged. Do not operate another high-down load or near water in the reservoir.

**Component:**
- Water nozzle
- Water inlet
- Steam control
- Temperature indicator light
- Spray button
- Temperature indicator light
- Steam control
- Water reservoir
- Maximum filling level
- Spray plate
- Steam plate
- Water nozzle
- Protective film
- Storage cover
Troubleshooting Guide

Problem: The steam is not heating up.

Possible Causes:
- The water level is too low.
- The steam nozzle is clogged.

Solution:
- Add water to the reservoir.
- Clean the steam nozzle.

Problem: The iron is not heating up.

Possible Causes:
- The iron is not plugged in.
- The cord is not plugged into the outlet.

Solution:
- Plug the iron into a functioning outlet.
- Ensure the cord is correctly plugged into the outlet.

Problem: The steam is not coming out.

Possible Causes:
- The steam is not turned on.
- The steam setting is too low.

Solution:
- Turn on the steam function.
- Increase the steam setting.

Problem: The iron is not pressing down.

Possible Causes:
- The iron is not on the fabric.
- The iron is not set to the correct temperature for the fabric.

Solution:
- Place the iron on the fabric.
- Set the iron to the correct temperature for the fabric.

Dry Ironing

1. Fill the water tank with water.
2. Plug the iron into the outlet.
3. Turn the steam knob to the dry position.
4. Set the temperature control knob to the lowest setting.
5. Press the steam button to turn on the steam.
6. Place the iron on the fabric.
7. Iron the fabric as desired.

Filling the Reservoir

1. Remove the cap from the water tank.
2. Fill the water tank with water until it is full.
3. Replace the cap on the water tank.
4. Plug the iron into the outlet.
5. Turn the steam knob to the dry position.
6. Press the steam button to turn on the steam.
7. Iron the fabric as desired.
