Unpacking your Kettle

Before you use your Kettle

1. Remove all the packaging.

2. Check the Kettle after unpacking for any visual damage such as:
   - Misaligned or damaged cabinet parts
   - Damage to the base
   - Damage to the main body
   - Damage to the plug or cable
   - If you can see any damage do not use the Kettle

This Kettle must be put on a stable horizontal surface.

The Kettle must be placed away from high temperatures and steam.

Do not install the Kettle over, on, or near a cooker or other heat producing appliance, or in a heated oven.
Safety Instructions

When using electrical appliances, basic safety precautions should always be observed, including the following:

➢ Read all instructions.

➢ Avoid contact with moving parts.

➢ To protect against electrical shock do not immerse cord, plug, or appliance in water or other liquid.

➢ Unplug from the mains outlet when not in use, and before cleaning.

➢ Do not operate any appliance with a damaged cord or plug, or after the appliance malfunctions or is dropped or damaged in any manner. The supply cord cannot be replaced. If the cord is damaged the appliance should be scrapped.

➢ The use of accessory attachments not recommended by the appliance manufacturer may cause fire, electric shock or injury. Only use the accessories supplied by the manufacturer.

➢ Do not let the cord hang over the edge of the worktop, or touch hot surfaces.
Never put any objects into the openings on the outer case.

Never remove parts from the appliance such as the screws and so on.

Do not operate this appliance for anything other than its intended use.

This product is intended for household use only. Do not use outdoors. This product is only intended for boiling water.

Warning: it is hazardous for anyone other than a competent person to carry out any service or repair operation which involves the removal of a cover which gives protection against exposure to electrical parts.

Warning: children should not use this appliance. Close supervision is necessary when any appliances are used near children.

Warning: this appliance is not intended for use by persons (including children) with reduced physical, sensory or mental capabilities, or lack of experience and knowledge, unless they have been given supervision or instruction concerning use of the appliance by a person responsible for their safety. Children should be supervised to make sure that they do not play with the appliance.
1  Water Gauge
2  Spout
3  Lid Handle
4  Handle
5  Switch
6  Power Base
**Before initial use**

If you are using the kettle for the first time, it is recommended that you clean your kettle before use. To do this, fill with clean water to the 'max' position and boil the water. Discard the water and refill with clean water. Repeat again, discarding once water has boiled. Kettle is now ready for use.

**Operation**

1. To fill the kettle with water, remove it from its power base and open the lid by pulling up on the lid handle. Fill with the desired amount of water. Always fill between the minimum (0.6L) and the maximum (1.7L) levels. Filling with too little water will result in the kettle's thermal cut-out operating, switching the kettle off before it has boiled. Close the lid.

   **NOTE:** Do not fill the water over the maximum level, as water may spill out of the spout when boiling. Ensure that the lid is firmly in place before connecting the power cord to the outlet.

2. Position the kettle on the power base.

3. Connect the plug into a power outlet. Press down on the kettle's power switch, below the handle, to the "I" position. The indicator light inside the switch will illuminate. Once the water has boiled, the kettle will switch off automatically and the indicator light will extinguish. You can shut the power off at any time by moving the power switch the "O" position or by lifting the kettle up from its power base.
NOTE: Ensure that switch is clear of obstructions and the lid is firmly closed. The kettle will not turn off if the switch is constrained or if the lid is left open.

4. Lift the kettle from the power base and then pour the water.

NOTE: Operate carefully when pouring the water from your kettle as boiling water may result in scald, don’t open the lid while the water in the kettle is hot.

5. To re-fill the kettle first allow to cool down for 20-30 seconds before opening the lid. Refill with fresh water and close the lid. To re-boil the kettle set the power switch to the "I" position.

NOTE: Ensure power supply is turned off when kettle is not in use.

Boil Dry Protection Feature
Should you accidentally allow the kettle to operate without water, the Boil Dry Protection Feature will automatically switch it off. If this should occur, allow the kettle to cool before filling with cold water and re-boiling.
WARNING: Electrical Shock Hazard.
Always disconnect the appliance from the power outlet before cleaning.
Never immerse the kettle or cord in water, or allow moisture to contact with these parts.

Removal of mineral deposits
Mineral deposits in tap water may cause the kettle interior to discolor. To remove this build-up, use Liquid Descaler, a simple to use non-toxic cleaner.
Alternatively:
➢ Fill the kettle with a cup of white vinegar and the remainder with fresh water.
Allow to stand overnight. Do not boil.
➢ Empty the solution from the kettle. Any stains remaining inside the spout can be removed by rubbing with a damp cloth, fill the kettle with clean water, bring to boil and then discard the water. Repeat and the kettle will then be ready to use.
The outside of the kettle can be wiped over with a damp cloth.

Cleaning appearance of housing
Wipe the outside of the kettle body with a damp cloth. Do not use abrasive cleaners or cleaning solutions as these may damage the outer surface of the kettle body. Do not immerse the kettle body in water.

Cleaning the filter
Remember to clean the inner water filter at regular intervals. This can be done by removing filter from the kettle body and cleaning with a damp cloth. There is no need to use abrasive cleaners or cleaning solutions.

CAUTION: Do not use chemical, steel, wooden or abrasive cleaners to clean the outside of the kettle.
This appliance is designed to operate from a mains supply of AC220-240V, 50Hz. Check that the voltage marked on the product corresponds with your supply voltage. This product is fitted with a 13A plug complying with BS1363 and is fitted with an appropriate fuse complying with BS1362. Always replace the fuse with one of the same rating. If the plug is unsuitable for your mains socket or needs to be replaced, please note the following:

Important: The wires in the mains lead must be connected as per the following diagram -

Always ensure that the plug cord grip is fastened correctly.

DANGER
Electric
Shock Risk

If your appliance is supplied with a non-rewireable plug, you will find that it incorporates a fuse, the value of which is indicated either on the base of the plug or on the fuse carrier. Always replace the fuse with one of the same rating. If you need to remove the plug, cut it from the mains lead and dispose of it. Never attempt to re-use this plug or insert it into a socket outlet, as there is a very great risk of an electric shock.

Product code: 2160606
Rated voltage: AC 220-240V~50Hz,
Power consumption: 1850-2200W
