4. Push Button Door Control

Introduction

Thank you for choosing this Royale branded appliance. It has been designed to give years of trouble-free use provided it is installed and maintained correctly.

This appliance must be installed and connected in accordance with current regulations. This quality appliance has been tested and certified to meet all applicable UK electrical and safety standards.

Please read these instructions carefully before installing or using your appliance. It is advisable to keep your purchase and installation receipts with these instructions in a safe place for future reference. Included is some important safety information.

In addition to guidelines and recommendations that will enable you to take full advantage of all the functions available, in addition to guidance and recommendations that will enable installation receivers with these instructions in a safe place for future reference. Included is some important safety information.
Never operate the oven without food or liquids inside.

- The supply cable must not be placed inside a cabinet.
- Do not position the oven near a cooker or other sources of heat, e.g., gas or electric hob.
- The microwave oven is intended to be used free standing and is not suitable for built-in use.
- Do not position any objects on the top of the microwave oven.
- The distance limit is shown in Figure 1 below.
- Position the appliance so that the rear side is facing the wall.
- Position the appliance in a dry atmosphere.
- To ensure sufficient ventilation, the distance from the back of the appliance to the wall should be at least 10 cm. This applies to the side to the microwave as well. If the wall is at least 10 cm, this side to the microwave can be at the wall too.
- Ventilation is required at the rear of the appliance with warm soapy water.
- Remove all packaging, protective film, and securing tape from the appliance.

3.3 Normal Operating Sounds

3.2 Timer & Power Functions

3.1 Switching on the Appliance

Section 3: Operating the Appliance

3.3 Operating the Oven

Cooking Period:
Is quite normal. There will be an audible ping at the end of the cooking period. There will be a slight ticking noise from the timer control knob as it rotates – this is the sound of the motor during operation and there may be a slight clicking noise from the timer control knob as it rotates – this is not a fault.

You will hear the sound of the motor during operation and there may be a slight clicking noise from the timer control knob as it rotates – this is not a fault.

Always follow the microwave-defrosting instructions shown on your food packaging and note that this oven has a power output of 800W.

If the food in the oven is not cooked to your satisfaction, the timer control can be reset.

If you open the door and remove the food/containers from the oven prior to the end of the set cooking time, you must ensure that the timer control is turned back to zero (0).

The bell will sound and the oven will automatically stop at the selected time. The bell will sound when the timer has finished.

A bell will sound when the timer has finished.

The maximum time that can be selected is 30 minutes. The timer must be set to zero (0) minutes.

3.2 Timer & Power Functions

3.1 Switching on the Appliance

Section 3: Operating the Appliance

3.3 Operating the Oven
Important Note:

If after the above checks there is still a fault, please contact your retailer.

1. Has the door been closed correctly?
2. Is the timer control set to the required time?
3. The oven will not operate:
   - Check the fuse in the plug (must be 13 amp)
   - Check there is power to the socket/appliance
   - Check there is power cut
   - There is no power to the appliance

4.3. What to do if something goes wrong:

4.2. External Cleaning

Clean the exterior and accessories with warm soapy water. Do not use abrasives or cleaning products. Wash the outer cabinet with warm soapy water. Do NOT use abrasive products. These may be sharp edges on the underside of the product, so care should be taken when cleaning.

4.1. Internal Cleaning

Clean the interior and accessories with warm soapy water. Rinse to prevent the appliance is completely dry.

Before any maintenance or cleaning work is carried out, disconnect the appliance from the electricity supply and ensure that the appliance is completely cool.

This appliance is marked according to the European directive 2002/96/EC on Waste Electrical and Electronic Equipment (WEEE). By ensuring this product is disposed of correctly, you will help prevent potential negative consequences for the environment and human health, which could otherwise be caused by inappropriate waste disposal. For more detailed information about the WEEE directive, please contact your local authority.

The symbol on the product or on its packaging indicates that this product must not be disposed of as normal household waste.
