Section 2. Safety Advice

Section 3. Operating the Appliance

Section 4. Maintenance

Section 5. Electrical Data
Section 1. Installation

- Remove all packaging from the exterior and interior of the appliance.

- Wash the glass turntable and the interior of the appliance with like warm water containing a small amount of bicarbonate of soda (5ml to 0.5 litres of water).

- Ensure that the turntable roller ring and the glass turntable are assembled and located in the correct position (see diagram below).

- The appliance must be used in a dry atmosphere and kept away from direct sunlight and high temperatures.

- Position the appliance on a stable horizontal surface.

- This appliance is fitted with a 13amp fuse and MUST BE EARTHED.

(1) Door Safety Lock System
(2) Oven Window
(3) Oven Air Vent
(4) Roller Ring
(5) Glass Tray
(6) Control Panel
Section 2. Safety Advice

- This appliance is manufactured and intended for DOMESTIC use only. The guarantee offered with the appliance is not valid for any installation in a commercial environment.
- Always turn off the electricity supply before cleaning the external or internal surfaces of the appliance.
- Do not use the appliance if the power supply cord is damaged. Switch the appliance off and arrange for a qualified electrician to replace it for you.
- **Do not allow children to operate or play with this appliance.**
- Do not heat liquids or foods in sealed containers.
- Do not use metal pans, cutlery, paper covered metal ‘twist-ties’ or metallic objects within this appliance.
- Only use containers and utensils clearly marked for use in microwave ovens.
- Always stir food thoroughly and check the temperature before serving.
- Do not heat eggs in their shell – they could explode.
- Do not heat or cook food directly on the glass turntable – always use a suitable ‘microwave’ approved container without a sealed lid.
- The oven should be cleaned on a regular basis and any food deposits removed.
- Always ensure that the inner door and sealing surface are maintained in a clean condition. Do not operate the appliance if the door or inner sealing surface appear damaged in any way.
- This appliance must only be used for the heating and cooking of food and drink items. **It must not be used for any other reason, e.g. drying clothes, sterilising etc.**
- Never operate this appliance when empty as this will damage the unit. If you are concerned about accidentally turning the appliance on when empty, leave a small glass of water inside the unit and remove it before heating or cooking drink or food items.
- **Should your microwave oven develop a fault, call the Sovereign Service Help line on 0870-607-7270.**
Section 3. Operating The Appliance

To operate the appliance:

- Place food to be cooked inside the oven.
- Set the required power level with the Power Control Knob.
- Select the required cooking time with the Timer Control Knob.
- The appliance will start automatically and an audible ‘ping’ will sound when the cooking time has elapsed.
- For defrosting, set the power level to M.Low and select the timer control to the corresponding weight of the food to be defrosted.

Please note that the Power Levels are as follows:

- High: 100% Power Output
- M.High: 77% Power Output
- Med: 55% Power Output
- M.Low (Defrost): 36% Power Output
- Low: 17% Power Output

Always ensure that the timer control has been set back to zero after use.
Section 4. Maintenance

- Always turn off the power to your appliance before carry out cleaning
- Keep the inside of the oven clean. Clean away food spills with a soft damp cloth
- Wash the glass turntable and roller ring with warm soapy water
- Always ensure that the inner door and sealing surface are maintained in a clean condition. Do not operate the appliance if the door or inner sealing surface appear damaged in any way.
- Clean the outside of the appliance with a soft damp cloth
- Do not allow the control panel to become wet

What to do if something goes wrong

If the oven will not operate, check the following before contacting our service help line:

- Is the power is switched on at the socket?
- Has the socket been checked with another appliance?
- Has the 13amp plug fuse been checked and/or changed?
- Have the house electrics accidentally tripped?
- Has the timer control and power control been set correctly?
- Has the appliance door been closed correctly?

If after the above checks there is still a fault contact the Sovereign Service Help line on 0870-607-7270.

In-guarantee customers should ensure that the above checks have been made as the engineer will make a charge if the fault is not the result of a mechanical or electrical breakdown.

The model and serial number together with details of your sales receipt must be quoted when booking an in-guarantee service call
Section 5. Electrical Data

- Model: SMW207SSC
- Rated Voltage: 230V
- Rated Frequency: 50Hz
- Rated Input: 1280W
- Rated Output: 800W
- Microwave Frequency: 2450MHz
