SAFEGUARDING THE ENVIRONMENT

Disposal of packaging materials

• The packaging material is 100% recyclable and is marked with the recycle symbol "\(\bigtriangleup\)"
• The various parts of the packing must therefore be disposed of responsibly and in full compliance with local authority regulations governing waste disposal.

Disposal of used household appliances

• This appliance is marked according to the European directive 2002/96/EC on Waste Electrical and Electronic Equipment (WEEE). By ensuring this product is disposed of correctly, you will help prevent potential negative consequences for the environment and human health, which could otherwise be caused by inappropriate waste handling of this product.

Energy saving

• Only pre-heat the oven if specified in the cooking table of the Product Description Sheet or in your recipe.
• Use dark, black enameled baking moulds as they absorb heat very well.

IMPORTANT NOTES

Warning:

• Accessible parts will become hot when in use. To avoid burns and scalds children should be kept away.
• Not intended for use by young children and infirm persons without supervision.
• Young children should be supervised to ensure they not play with the appliance.
• This oven is designed solely for use as a home appliance for cooking food. No other type of use is allowed. The Manufacturer declines all responsibility for inappropriate use or incorrect setting of the controls.
• Any repairs or adjustments must be carried out exclusively by a qualified technician.
• Never expose the oven to atmospheric agents.
• Do not put heavy objects on the door because they could damage the oven cavity and hinges. Do not cling to the door.
• Never hang anything heavy on the oven door handle.

• Do not cover the bottom of the oven with aluminium foil or other objects.
• The oven door must close properly. The door seals must be kept clean.
• Do not pour water directly into the inside of a hot oven. The enamel coating could be damaged.
• Fruit juice drippings from the baking tray may leave permanent stains. We recommend the oven be cleaned before reusing it.
• Never drag pots and pans across the bottom of the oven to prevent the coating from being scratched.
• Residual condensation after cooking could damage the oven and surrounding kitchen units in time. We recommend that you:
  - set the lowest temperature;
  - cover food;
  - remove food from the oven;
  - dry the wet parts when the oven is cool.
• The front panel and the handle of the oven door warm up when the appliance is switched on for a long time at high temperatures.
• Never touch the oven with any wet part of the body and do not operate it with bare feet.
• Do not pull the appliance or the power supply cable to disconnect them from the electrical supply.
• Do not allow children to touch:
  - the oven and its controls, especially when in operation and immediately afterwards to avoid injury;
  - packaging (bags, polystyrene, metal parts, etc.);
  - an oven to be scrapped.
• Make sure that the electrical cables of other appliances used near the oven do not touch hot parts and are not trapped in the oven door.
• Some oven models are equipped with an air cooling system to prevent the front of the oven and cabinet cavity from reaching excessively high temperatures.

**Attention:** Steam and smoke are vented through an opening located between the control panel and the oven door. Do not obstruct the vent opening.
• Do not place inflammable material in the oven or nearby; a fire may break out if the oven is inadvertently switched on.
• Use oven gloves to remove pans and accessories, when the oven is hot.
• If alcoholic beverages are added when roasting or cooking cakes and sweets (e.g. rum, cognac, wine, etc.) remember that alcohol evaporates at high temperatures. It may happen that vapours released by the alcohol can catch fire when they are in contact with the electric heating element.
• Do not heat or cook sealed jars or containers in the oven. The pressure that develops inside the packaging might cause it to explode, damaging the oven.
• Do not use containers made of synthetic material for cooking (except for packages specifically designed for this purpose; see the manufacturer's instructions). They could melt at high temperatures.
• Always keep a watch on pans when cooking with oil and grease. Oil and fat can overheat and catch fire.
• Never pull out fully loaded shelves. Use extreme caution.

**BEFORE USING THE OVEN**

• Remove the accessories from the oven and heat it 200°C for about an hour to eliminate the smell of the protective grease and insulating materials. Keep the window open during this operation.

• Before use, remove:
  - stickers on the front and oven door, except for the rating plate;
  - cardboard protection and protective plastic film from the front panel controls and other parts of the oven;
  - any sticky labels from the accessories (for example, under the drip tray).
OVEN ACCESSORIES

The accessories not provided with the oven can be bought separately from After Sales Service. The accessories provided with the oven are listed in the Product Description Sheet provided separately (under Accessories).

Drip tray (1)
The drip tray is designed to collect fat and food particles when it is positioned under the grid or as a plate, such as when cooking meat, chicken and fish with or without vegetables. Pour a little water into the drip tray to prevent spatters of fat and smoke.

Baking tray (2)
For cooking biscuits, cakes and pizzas.

Grid (3)
The grid can be used to grill food or as a support for baking trays, cake tins and other cooking receptacles. It can be placed on any of the runners in the oven. The grid can be inserted with its curved side facing upwards or downwards.

Turnspit (4)
Use the turnspit as indicated in the relevant chapter in the Product Description Sheet supplied separately.

Grill pan set (5)
The set comprises a grid (5a), an enamel drip tray (5b) and one or two handles (5c). This set must be placed on the grid (3) and used with the Grill function.
CARE AND MAINTENANCE

Important: never clean the appliance with high pressure water or steam cleaning equipment.

Exterior of the oven

- Clean with a damp cloth. If it is very dirty, add a few drops of washing up detergent to the water. Wipe with a dry cloth.
- Do not use corrosive or abrasive detergents, which dull the surface. In the event that one of these products comes into contact with the oven, immediately clean it using a damp cloth.
- Slight differences in colour on the front of the appliance are determined by the different materials used, such as glass, plastic and metal.

Ovens with aluminium front panel

- Clean using a delicate detergent and a soft window cleaning cloth or a microfibre cloth that does not leave fibres on the surface. Wipe horizontally, without exerting pressure.
- Do not use corrosive products, hard sponges or rough cloths. Clean the aluminium surfaces with a dry cloth.

Accessories

- Soak the accessories in water with washing up detergent immediately after use. Food residues can be easily removed using a brush or sponge.
