guidelines for use

Cool Touch Toaster

Model FCL 4001
This charity has been launched to support people in the village of Thirukovil, the home town of the Rev Sam the Methodist minister from Morley who lost 31 relatives in the Tsunami. Around four hundred families now live in temporary tented camps.

Your generous donation will provide much needed support for the poorest survivors; primarily children, elderly and disabled who, in most cases, have lost the majority of their families.

In an endeavour to develop skills following the loss of their fishing industry, and give hope of rebuilding lives in the future, training programmes are planned - carpentry, brick laying and cycle repairs for males, and sewing and embroidery classes for ladies.

The charity offers - help with love - money with pride - commitment with concern.

Any contribution you are able to make will go directly to this much needed area - no administration fees or expenses are levied.

Tsunami Disaster Appeal
Morley For Thirukovil
Registered Charity No. 1108832

Please Help, by using the donation form at the back of this booklet

GETTING TO KNOW YOUR TOASTER

Please read all the instructions and the Safety section on pages 7 and 8 before using your Toaster. This appliance is for household use only.

Warning: The temperature of accessible surfaces of the toaster may be high during and after use. Allow the Toaster to cool before lifting or moving.
GETTING TO KNOW YOUR TOASTER

Before use
- Place the Toaster on a secure, flat surface away from any contact with water and away from the surface edge.
- Keep all the packaging until you are sure that the product is operating correctly.
- Check inside the Bread Slots and remove any packaging material.
- Check that the voltage printed on the rating plate on the bottom of the Toaster corresponds to the mains voltage in your home.
- Place the Toaster on a secure, flat surface and away from the surface edge. Allow a gap of at least 8cm (3 inches) away from any walls.
- Do not place on surfaces likely to be damaged by moderate sources of heat.
- Do not use the Toaster under a cupboard or close to a wall as burning or scorching of the wall or cupboard may result.
- The Toaster must not be used near or below curtains or other materials which may catch fire.
- During use the Toaster must be watched at all times.
- For extra safety we recommend that a smoke detector is fitted in your home.
- Before using for the first time, do not place any bread in the Toaster to allow the new elements to preheat and burn off any dust which may have accumulated during assembly.
- Care must be taken not to touch any hot surfaces, do not store or cover the toaster until it has fully cooled down.
- Ensure that the electrical mains lead connected to the Toaster has been fully unwound and is not touching or resting on any part of the toaster.
Toasting is a combination of cooking, browning and drying the bread, different types of bread will require different browning levels. For instance dry or thin slices of bread will toast quicker than moist or thick slices and should therefore be toasted on a lower browning level.

If you are toasting a single slice, set the browning level lower than normal as the Toaster is designed to heat two slices. Never force food into the toasting slots it should fit freely between the guard wires.

Do not use torn or misshapen slices of bread in the Toaster as they could jam the Bread Carriage return mechanism, causing a fire hazard.

In the unlikely event that the bread does becomes jammed, switch the toaster off at the supply socket and remove the plug. Make sure the Toaster has fully cooled before carefully easing the bread out of the Toaster Slots, ensuring that you do not damage the element. Do not attempt to release any trapped bread with a knife or fork or any other similar metal implement.

1. Plug in the Toaster to the mains supply. The Bread Carriage Lever will not lock itself in the down position if there is no power supply.
2. Select a browning level by turning the Browning Control Dial to the desired position. The higher the number (1-7) the longer the toasting cycle.
3. Place the slices of bread in the Bread Slots and press the Bread Carriage Lever right down until it stays locked into place. The bread is lowered into the Toaster and the heating elements start toasting the bread.
6

**USING YOUR TOASTER**

4. If the toast starts to smoke before it has popped up, or for any reason you wish to stop toasting, it can be stopped by pressing the Cancel Button and the toast will pop up.
5. If the toast is not dark enough you may wish to resume toasting. Turn the Browning Control Dial down and keep a careful eye on the toast to ensure it does not burn.
6. When the toasting has finished the Bread Carriage Lever and the toasted bread will spring up to the fully raised position, the heating elements will turn off. The toast can now be removed and the Toaster is ready for toasting again.

**MAINTENANCE**

**After use**
The Bread Carriage Lever should be in the upright position before removing the plug from the electrical socket. Allow the Toaster to cool completely, before storing. Never wrap the cord around the outside of the Toaster.

**Cleaning**
Always unplug the Toaster from the mains socket and allow to cool before cleaning.
It is important that crumbs are not allowed to build up inside the base of the Toaster as they could cause a fire hazard.
1. Crumbs can be removed by simply sliding out and removing the Crumb Tray at the bottom of the Toaster.
2. You can then tip the crumbs out of the tray.
3. Always replace the Crumb Tray in its correct position before re-using your Toaster.
To remove any pieces of bread remaining inside the toaster turn the Toaster upside down and shake gently.
Never touch internal parts of the Toaster with a brush or any other implement.
MAINTENANCE

Clean the outer surface of the Toaster with a soft damp cloth and dry thoroughly.

- Do not use harsh or abrasive cleaners, scouring pads or solvents to clean any part of your toaster.
- Do not immerse the Toaster in water or liquid of any kind.

IMPORTANT: Toaster must be completely dry before plugging into the mains supply.

SAFETY

- In common with other portable electrical appliances, this Toaster must never be put in water, used in a bathroom or near any source of water.
- Do not use outdoors.
- Wait for the Toaster to cool before moving. Never lift the Toaster by placing your fingers inside or near the Bread Slots.
- Close supervision is necessary when the Toaster is used by or near children and persons suffering from any physical impairment.
- Position the mains lead so that it does not overhang a working surface as this may cause a safety hazard.
- Flammable material such as paper, curtains, etc. should not be placed near the sides or top of the Toaster when it is being used. The Toaster should not be used under a cupboard or close to a wall as burning or scorching of the wall or cupboard may result. The bread slots must not become covered during toasting.
- To prevent electric shock and to avoid the risk of fire, oversized food, metal foil packages or utensils must not be inserted into the Toaster.
SAFETY

• It is not recommended that the Toaster is used by or near children and any person suffering any physical impairment.

• To prevent bread jamming do not use the Toaster with torn slices of bread and ensure that the size and thickness of the slice fits easily into the Bread Slots.

• NEVER attempt to remove bread which has jammed in the Bread Slots without first unplugging the Toaster from the mains socket and allowing to cool. Be careful not to damage the heating elements when removing the bread. Do not attempt to release any trapped bread with a knife or fork or any other similar metal implement.

• If your Toaster has been dropped or damaged it should not be used until it has been inspected by a qualified service centre.

• Always unplug from the mains socket after use.

• Do not disconnect the plug of the Toaster by pulling on the mains lead.

• Waffles, Pita Breads and similar products are unsuitable for use in an automatic toaster as fats may seep out, creating a fire hazard.

• Do not toast buttered items or try to make toasted sandwiches in the toaster as this may also create a fire hazard.

• Do not use any unauthorised attachments or accessories as these may cause a fire or electric shocks and invalidate the guarantee.

• Do not leave the Toaster unattended during use.

• The Toaster must be kept upright at all times.

• Do not use the Toaster as a source of heat.

• Do not operate the Toaster without bread, except when using for the first time (See section Before Use).

• If flames were to arise from the toaster, never attempt to extinguish them with water. Unplug the toaster and smother the flames with a damp cloth.

• Never wrap the electrical cord around the Toaster.
GUARANTEE

This appliance has been manufactured to exacting standards and the Company guarantees that should any defect in materials or workmanship occur within 12 months of the date of purchase (but not damage caused by misuse, negligence, or damage in transit), we will repair, or at our option, replace free of charge - always provided that the appliance has been used for normal domestic purposes in the U.K. and has been operated on an electric supply which matches that shown on the rating plate. Please keep your receipt as proof of purchase. This guarantee in no way diminishes the buyer's legal rights.

The policy of the Company is one of continuously seeking new ways of improving its products. Therefore the Company reserves the right to change the specification of items illustrated and described at any time.

If a fault occurs with this product you should consult the supplier or shop where it was purchased.

This appliance has been designed for domestic use only, the Company accepts no responsibility for product failure due to commercial or inappropriate use or failure to comply with product instructions.
THIS APPLIANCE MUST BE EARTHED.
This appliance is fitted with a fused three pin plug to BS 1363 which will be suitable for use in all houses fitted with sockets to current specifications.
If the fitted plug is not suitable for your socket outlets, it should be cut off and carefully disposed of. To avoid a possible shock hazard, do not insert the discarded plug into a socket.

Fitting a new plug
If for any reason you need to fit a new plug, the flexible mains lead must be connected as shown here.
The wires in the mains lead fitted to this appliance are coloured in accordance with the following code:

CONNECT GREEN AND YELLOW TO EARTH (E)
CONNECT BLUE TO NEUTRAL (N)
MAKE SURE THE OUTER SHEATH OF THE MAINS LEAD IS SECURELY HELD BY THE CLAMP

If the colours of the wires in the mains lead of this appliance do not correspond with the coloured markings identifying the terminals in your plug, proceed as follows:
The wire which is coloured Green and Yellow MUST be connected to the terminal which is marked with the letter E (Earth) or symbol or coloured Green. The wire which is coloured Blue MUST be connected to the terminal which is marked with the letter N or coloured Black. The wire which is coloured Brown MUST be connected to the terminal which is marked with the letter L or coloured Red.

Before refitting the plug cover, check that there are no cut or stray strands of wire inside the plug.
Use a 13 Amp BS1362 fuse, only BSI or ASTA approved fuses should be used. If you are in any way unsure which plug or fuse to use, always refer to a qualified electrician.

Note: After replacing or changing a fuse on a moulded plug which has a fuse cover, the cover must be refitted to the plug, the appliance must not be used without a fuse cover. If lost, replacement fuse covers can be obtained from an electrical shop.

This appliance complies with the following EEC Directives: 73 / 23 EEC (Low Voltage Directive) 89 / 336 EEC (EMC Directive).
Yes I would like to support Morley for Thirukovil. Here is my cheque / postal order for:
