# What is it about?

The projects analyse U.K. financial narratives, their association with financial statement information, and their informativeness for investors.

# Contributions

- Develop an automated method for extracting narrative content and structure from UK annual reports provided as PDFs
- First large-sample tests of the incremental predictive ability of UK annual report narratives
- First study to examine the incremental and differential predictive ability of alternative annual report narrative sections
- First study to model disagreement between preparers' and to examine the impact of disagreement on the predictive properties of narratives

# Why Financial Narratives

a doubling of the median word count over the sample period

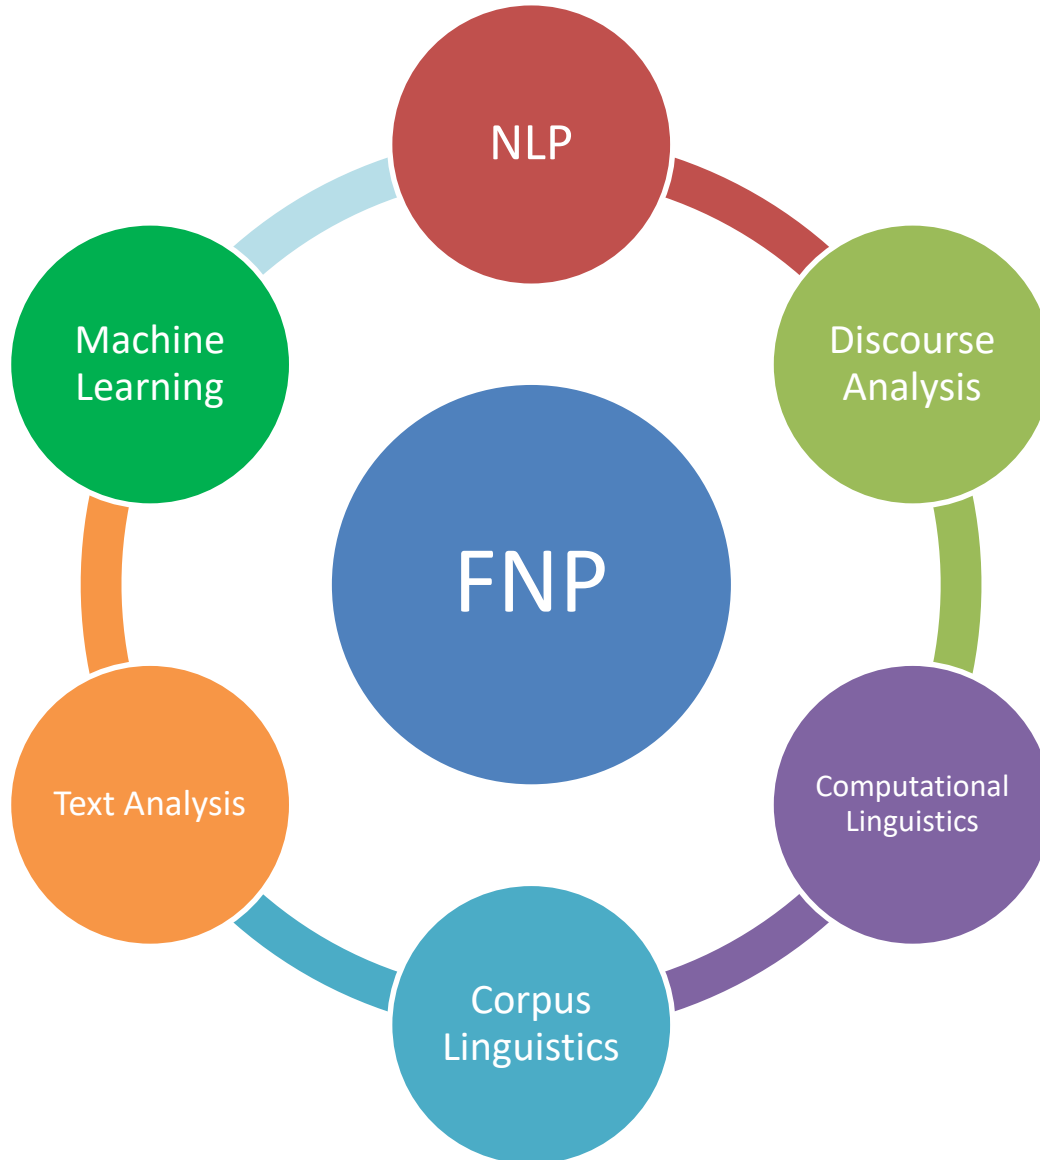

# Why Financial Narratives

# UK Annual Reports

- Free style (no standard structure)
- Use of images, text, hyperlinks, ...etc.
- PDF format
- Content and structure varies across firms.
- Management have more discretion over what, where, and how much information on topics such as risk, strategy, performance, etc. is reported.

This makes the extraction and analysis task more challenging;  
but it provides research opportunities.

Red boxes highlighting the following sections in the right table:

- Directors' report (106)
- Corporate governance (108)
- Remuneration report (118)
- Corporate social responsibility (130)

# Techniques

- Automatically detect 8 key headers
- Reorder headers to front and rear
- String matching, regex
- Levenshtein Distance / text similarity
- Machine learning to classify headers
- Crowdsourcing
- Text Reuse
- Hand crafted keyword lists by experts
- Bottom up and top down word lists:
  - Computer based approaches
  - By Linguists

# Report Classification

- Heuristic Approach
- Machine Learning
- Classify narratives (front) component into the following generic categories to facilitate cross-sectional and temporal analysis:
  - Chairman's statement
  - Performance commentary (incl. CEO review, strategic review, finance director's review, operating review, business review, etc.)
  - Governance statement (incl. chairman's introduction, separate committee statements, statement on internal control, etc.)
  - Remuneration report
  - Residual commentary (incl. overview, highlights, CRS report, principal risks and uncertainties, directors' report, etc.)

# Output

- NLP publicly available tool ( CFIE-FRSE)
- First large scale study of UK annual reports structure.
- First ever published disclosure scores for UK annual reports.
- Approaches used help speed up the analysis process and close the gap between firms and investors.
- Leads to better understand corporate financial decisions and corporate financial performance.

# SSRNPaper

- Heterogeneous Narrative Content in Annual Reports Published as PDF Files: Extraction, Classification and Incremental Predictive Ability
- [https://papers.ssrn.com/sol3/papers.cfm?abstract\\_id=2803275](https://papers.ssrn.com/sol3/papers.cfm?abstract_id=2803275)

# Output Evaluation

- Manual evaluation
  - Precision (Type I errors) → false positives
  - Recall (Type II errors) → false negatives
  - Overall accuracy ( $F_1$ ) → harmonic mean of precision and recall
- Compare extracted section headers with table of contents
- Assigned page numbers with actual page numbers from table of contents
- Examine accuracy of section classification
- Evaluations based on 586 reports selected at random (approx. 5% of initial population)
  - 11,720 annual report sections

# Reporting growing over Time

how some of the main types of content have grown over the sample period

# Readability (inverse Fog)

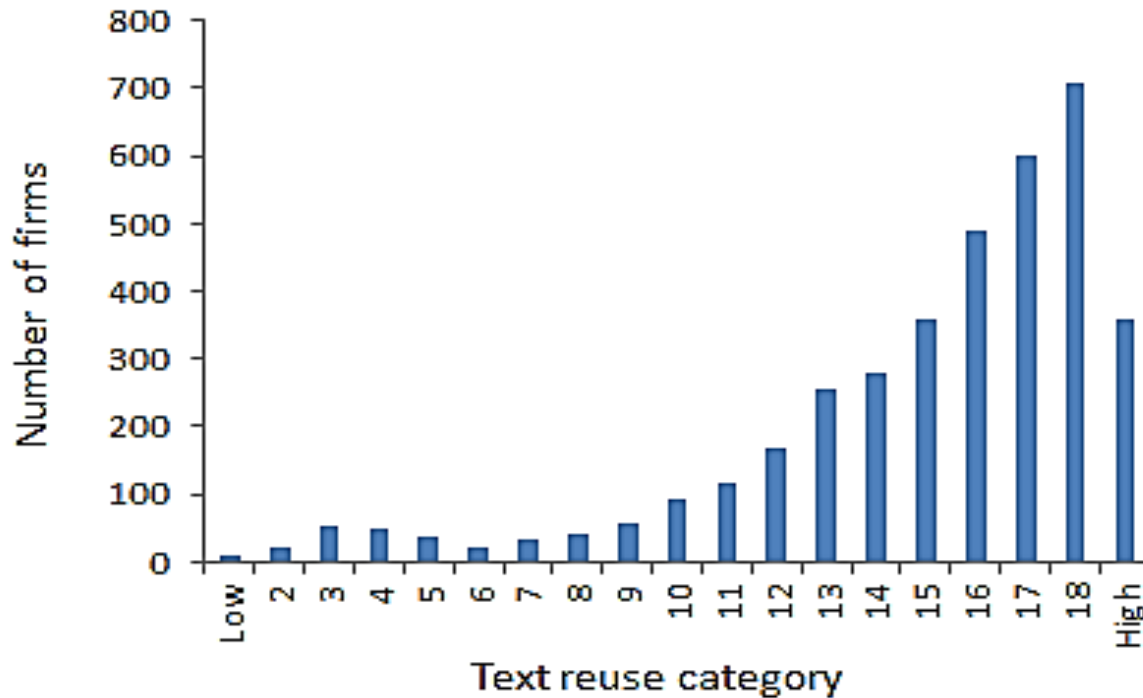

# Net Tone

# Text Reuse (Boilerplating)

Governance statements: Distribution of similarity

# Limitations

- Designed for large sample analysis
  - Accuracy of extraction process estimated to be around 90%
  - Extraction process can result in errors at the individual firm level (which are removed or diluted in large sample work)
  - Cannot capture the richness of *how* information is presented (e.g., graphics, charts, tables, etc.)
  - No attempt (yet) to parse text in the financial statements

# Summary & Conclusions

- Develop and validate a method for extracting the content and structure of UK annual reports published as PDF files
  - Retaining the structure of the report creates opportunities for research examining new features of disclosure
- Provide the first large-sample evidence regarding the predictive ability of UK annual report narratives
  - Narratives in their entirety are incrementally predictive for earnings beyond financial statement data
  - Different annual report sections are associated with different predictive qualities
  - Abnormal managerial optimism is associated with lower predictive ability and independent chairman commentaries help to negate managerial bias
