Compact Kitchen Manual
Elfin Kitchens NZ Limited reserves the right to upgrade or source alternative appliances that are of the same or higher quality in the event of models being discontinued.
We hope you enjoy your new compact kitchen. Read these instructions carefully to make sure that the kitchen is properly installed and used in the right way. Please keep these documents in such a way that you or any subsequent owner can always refer to.

Security

- Do not operate damaged equipment, if in doubt contact Elfin Kitchens NZ Limited.
- Any changes in the product must be performed by a specialist.
- For repairs, please disconnect from the mains power supply.
- This product should only be operated by adults.
- Attention, the unit has hot surfaces during operation.
- Always cook with handle to the wall for safety. The rings are very hot and can cause burns.
- Do not store explosive liquids in the cabinet.
- Do not place coffee machines or other electric devices onto the cooking plates. This also applies to other combustible materials.
- Be careful when cooking dishes with oils and fats (eg chips), as they can ignite.
- No flammable or combustible objects (eg spray cans) are to be stored in the unit.
- Do not heat food in aluminium foil or plastic containers, always use the purpose made saucepans and pots.
- The hob should not be cleaned with a steam cleaner.
- This product is not intended to be used by persons (including children) with reduced physical, sensory or mental capabilities or lack of experience and / or knowledge, unless they are supervised by a responsible person.
- Do not let children play with the kitchen.
- The kitchen is only for normal indoor use. They must not be used as a source of heating.
- Do not block ventilation grills.

When installing a extractor hood, a minimum distance of 650 mm between the hob and the lower edge of hood are to be observed.

Notes for the environment

Our high quality products are protected for their journey to you with effective protective packaging. All packaging materials used are environmentally friendly and can be safely disposed.

Wooden parts are not chemically treated.

The cardboard boxes are made predominantly from recycled paper and can be crushed again and recycled.

Unpacking

Please check the unit for damage, if damage is found please report immediately to Elfin Kitchens NZ Limited within 24 hours of receiving your kitchen, reports of damage outside of this time cannot be resolved.

Lifting the Compact Kitchen

Care should always be taken when lifting the kitchen, please wear appropriate gloves and ensure there are sufficient people to lift the kitchen from the packaging into its final position. Lift from the bottom of the unit and be careful of any sharp edges, do not lift using the door or fridge handles as this will damage your kitchen.

Appliances

Your Elfin kitchen will have either a Liebherr or Techwood fridge fitted dependant on the model purchased and we ask you to read the operation instructions found in the fridge.

*Attention*

The Liebherr fridge is fitted with a ‘CoolPlus’ button located by the thermostat control knob inside the fridge. This is designed for use in cold environments and prolonged use (over 24 hours) could result in your fridge failing as the compressor will be over worked and this type of failure is not covered under warranty.

If your kitchen is fitted with a combination oven, microwave, convection oven or dishwasher please do read the operating instructions and keep in a safe place for future reference.

Regular cleaning will prolong the life of any appliance and prevent any unwanted smells!
Mains Connection
Depending on the kitchen purchased your kitchen will have 1, 2, 3 or 4 x 10amp plugs fitted to the individual appliances (with the exception of the Fov kitchen). Please consult a qualified electrician regarding the installation of the sockets to feed the kitchen and refer to the first fix guide regarding the electrical loadings and positions. **Any installation and repairs must be carried out by a qualified trades person.**

Water Supply and Drainage
Your kitchen is supplied with a waste kit and tap (except for the contract range). Please ensure these are fitted and secured correctly by a competent trades person to ensure a watertight installation.

Hotplates
Before your first use of hotplates, the rings must be tempered. For this you must perform the following; First the rear hob must be switched on at the highest level without a pot for at least 4 minutes (the front plate must remain off). After this time, wait at least 5 minutes. Then switch on the front hotplate to the highest level without a pot for at least 4 minutes (the rear plate remains off). Thereafter, the operation of burners is generally prohibited without pot.

Use only vessels with a flat bottom and a plate for each appropriate diameter.

For parboiling set the timer to the desired cooking time and then turn the switch at level 3. Then switch according to need one or several levels lower. In almost all cooking and frying operations the hotplates can be turned off 5-10 minutes prior due to the residual heat of the hotplate. So switch to “0” and select the cooking time with the timer correspondingly shorter. If the cooking time exceeds the maximum adjustable 30 minutes, the timer this must be reset.

Timer - if fitted
As an additional safety device for safe cut-off of rings, the mini kitchen has a mechanical timer with a max. running time of 30 minutes. After the set time 0 to 30 minutes, the power is interrupted to the burners. If longer cooking is required, the timer must be re-set again to the maximum adjustable 30 minutes.

The hotplates are controlled according to a switch with seven switch positions (6 circuit stages and a 0-position). On the knobs you will find the numbers 0-1-2-3.

<table>
<thead>

</thead>
<tbody>
<tr>
<td>1</td>
<td>Low</td>
</tr>
<tr>
<td>2</td>
<td>Medium</td>
</tr>
<tr>
<td>3</td>
<td>High</td>
</tr>
</tbody>
</table>

The dots indicate three additional intermediate/half stages. These intermediates can be selected if the higher level is too high or the lower level of heat output is too small.

At 0-position the hob is switched off. The indicator light is lit while at least one of the two rings is in operation. The cooking plates can still be hot (residual heat) despite extinguished pilot light.

O) = for rear hob
o) = switch for the front hob
Cleaning and Maintenance

In everyday use, only dry pots should be used. Pans with lids should always be used, this will reduce excess cleaning. When the stove has boiled over and when the hotplates have cooled hot plates should be washed. Do not scrape off food particles with abrasive utensils or cleaning cloths. A damp cloth is sufficient for normal cleaning. Heavily soiled hotplates should be cleaned with cleaning agents from the supermarket. After cleaning, buff with a dry cloth. After cleaning a small amount of oil on a dry cloth can be applied from time to time for a shiny surface.

Name | STP |
---|---|
Total power | 2200W solid hotplate |
Nominal voltage | 230V AC |
Connection | Cable HO5W-F 3 G 1.5 |
Regulation | Energy regulator, adjustable |
Hot Plates | ø 140 mm with 1000 w, ø 180 mm with 1200W power |
Operating control lamp | Display whether device is switched on |
Certified according to VDE and CE | GS certificate No. 57 41 077 |
Old equipment recycling | Devices are ear registered WEEE-Reg.-Nr. EF1120WQ |

This equipment complies with the European low voltage directives 2006/95/EC to the electrical safety, the European directives 89/336/EEC on electromagnetic compatibility and to the CE marking directives 93/68/EEC.
Operational Issues

The hot plates are not hot.

- Is the timer turned on?
- Is the rotary switch turned on.
- Is the mini kitchen connected correctly? (2 Plugs, one for the hot plates and one for the fridge).
- Check fuses in the fuse box.
- Check the voltage to the power outlet.

If no cause is found beyond these measures, please contact your installer.

Service

Services and spare parts can be obtained from Elfin Kitchens NZ Limited

Always give the model no. on contact with the service workshop.

Your Elfin Kitchen Guarantee

We are pleased that you have purchased an Elfin Kitchen. Due to strict control of production we are sure your kitchen will provide a long reliable service. Elfin Kitchens NZ Limited does however guarantee your kitchen against the following failures for a period of two years from date of purchase.

- Corrosion in base unit
- Fridge failure
- Hotplate failure
- Tap failure

If you purchased a unit housing either a combination microwave oven, microwave or convection oven these appliances are guaranteed by the manufacturer and the certificate must be completed and sent to the address on the documentation found within the appliance.

If you experience problems with the fridge within its second year of service this too is covered by the manufacturer and you will need to contact Elfin Kitchens NZ Ltd on 09 573 1444. In the event of the fridge not being able to be repaired and it is reported as a genuine failure Elfin Kitchens NZ Limited will provide a replacement fridge.

Accidental damage and general wear and tear is not covered by this guarantee. In the event of damage resulting from misuse most items on your kitchen can be replaced. Please contact Elfin Kitchens NZ Limited for a quotation on the cost of the damaged components.

Please retain your receipt for this purpose

We hope you enjoy your new Compact Kitchen Unit
