Important safety and instructions

These warnings are provided in the interests of your safety. Ensure that you understand them all before installing or using this appliance.

Installation
• This appliance is heavy. Care should be taken when moving it.
• It is dangerous to alter the specifications or attempt to modify this product in any way.
• Ensure that the appliance does not stand on the electrical supply cable.
• Any electrical work required to install this appliance should be carried out by a qualified electrician or competent person.
• Parts which heat up should not be exposed. Whenever possible, the back of the appliance should be close to a wall but leaving the required distance for ventilation as stated in the installation instructions.
• The appliance should be left for hours after installation before it is turned on, in order to allow the refrigerant to settle.

Child Safety
• Do not allow children to tamper with the controls or play with the product.

During Use
• This appliance is designed for domestic use only, specifically for the storage of edible foodstuffs only.
• Frozen food should not be refrozen once it has thawed out.
• Do not place carbonated or fizzy drinks in the freezer.
• Ice lollies can cause 'frost/freezer burns' if consumed straight from the freezer.
• Do not remove items from the freezer if your hands are damp/wet, as this could cause skin abrasions or frost/freezer burns.

Maintenance and Cleaning
• Switch off, and unplug the appliance before carrying out any cleaning or maintenance work.
• Do not use sharp instruments to scrape off frost or ice. (See defrosting instructions).

At the End of the Appliance Life
• When disposing of your appliance, use an authorised disposal site.
• Remove the plug and ensure that any locks or catches are removed, to prevent young children being trapped inside.

Disposal
• Observe local environmental standards when disposing packaging material for recycling purposes.
• The European Directive 2002/96/EC on Waste Electrical and Electronic Equipment (WEEE), requires that old household electrical appliances must not be disposed of in the normal unsorted municipal waste stream. Old appliances must be collected separately in order to optimise the recovery and recycling of the materials they contain and reduce the impact on human health and the environment. The crossed out "wheeled bin" symbol on the product reminds you of your obligation, that when you dispose of the appliance it must be separately collected. Consumers should contact their local authority or retailer for information concerning the correct disposal of their old appliance.

Respecting and conserving the environment
• Install the appliance in a fresh and well-ventilated room. Ensure that it is protected from direct sunlight and do not place it near heat sources.
• Try to avoid keeping the door open for long periods or opening the door too frequently in order to conserve energy.
• Do not fill the appliance with too much food: cold air must circulate freely for food to be preserved properly. If circulation is impeded, the compressor will work continuously.
• Do not place hot food directly into the refrigerator. The internal temperature will increase and force the compressor to work harder and will consume more energy.
• Defrost the appliance if ice forms (see Maintenance). A thick layer of ice makes cold transference to food products more difficult and results in increased energy consumption.

Please read this instruction book carefully before use and retain for future reference.
Transportation

**Caution:** 2 people are required to unpack and handle the appliance, it is recommended that gloves are worn.

- The appliance should be transported only in an upright position. Do not tilt the appliance greater than 45°. The packaging as supplied must be intact during transportation.
- After transporting the appliance, leave it for at least 4 hours before switching on to allow the cooling system to settle. Failure to comply could result in damage to the appliance.
- Do not move the appliance by pulling the door or handle as it may damage your flooring and wall coverings etc.
- Empty any water in the drain tray before moving.
- Ensure the supply cable is not caught under the appliance during and after moving.
- Carefully remove all packaging materials including the foam base, dispose of correctly.

Installation

- Ensure sufficient spacing is provided for the appliance to be installed. Leave space on both sides and above the appliance to ensure proper ventilation.
- Do not place the appliance near a heat source or in direct sunlight.
- Do not put any heavy objects on top of the appliance. It will damage the appliance.
- Do not install the appliance in moist and wet place.
- Adjust the feet at front to level the appliance. It should be installed on a smooth surface to avoid excessive vibration and noise.
- Each appliance has a climate class (shown on the rating plate) where it indicates the temperature range of the appliance operation in place. The appliance may not work properly if it is left for a long period at a temperature outside the specified range.
- Refer to section “Care and Maintenance” to prepare your appliance for use.
**Plug replacement (UK & Ireland only)**

Should you need to replace the plug; the wires in the power cable are coloured in the following way:

Blue – Neutral ‘N’

Brown – Live ‘L’

Green & Yellow – Earth ‘E’

As the colours of the wires in the power cable may not correspond with the coloured markings identifying the terminals in your plug, and proceed as follows:

The green & yellow wire must be connected to the terminal in the plug that is marked with the letter E or by the earth symbol.

The blue wire must be connected to the terminal that is marked with the letter N.

The brown wire must be connected to the terminal that is marked with the letter L.

If power supply cord is damaged, it must replaced by the manufacturer or its service agent or a similar qualified person in order to avoid a hazard.
Door Reverse

⚠️ Warning: Remove the main plug before reversing the door. 2 people may be required to reverse the door.
1. Remove the screws (6) holding the top panel (7) to the unit. Remove the top panel.
2. Remove the two screws (1) holding the top hinge (5) (right side) to the frame. Remove the top hinge (5).
3. Lift the door off the bottom hinge pin and place it on a non-scratching surface.
4. Remove the two screws (8) holding the bottom hinge (2). Remove the bottom hinge (2).
5. Remove the left front leg (4) and transfer it to the right side.
6. Before replacing the bottom hinge (2), remove the hinge pin (9) and reverse the direction of the hinge (2). Reassemble the bottom hinge (2) on the left hand side using the two screws (8).
7. Refit the hinge pin (9) into the bottom hinge (2).
8. Lower the door onto the bottom hinge pin (9).
9. While holding the door in the closed position, reassemble the upper hinge (5) on the left hand side using the two screws (1). Do not tighten the screws (1) until the top of the upper door is level with the counter top.
10. Refit the top panel (7) using the screws (6).
Description of the appliance

Overall view

The instructions contained in this manual are applicable to different model refrigerators. The diagrams may not directly represent the appliance purchased.
This appliance is designed for domestic use only, specifically for the storage of edible foodstuffs. This appliance is designed to operate in ambient temperatures (surrounding air temperature) between 10°C (50°F) and 38°C. If these temperatures are exceeded i.e., colder or warmer, the appliance will not operate correctly. Should the ambient temperatures be exceeded for long periods, the temperature in the freezer section will rise above -18°C and food spoilage may occur.

Before Use
Remove all securing tapes. Wash the inside of the appliance with lukewarm water with a little bicarbonate of soda added (5ml to 0.5 litre of water). Do not use soap or detergent as the smell may linger. Dry the appliance thoroughly.

Thermostat Control
The thermostat control situated in the control panel regulates the temperature of the freezer compartment.
Position "Min" - Cold
Position "Normal" - Colder, normally, setting at this position.
Position "Max" - Coldest and the compressor work continuously.
The temperature will be affected by:
- Room temperature
- How often the door is opened
- How much food is stored
- Position of the appliance

In determining the correct temperature control setting, all these factors have to be considered and some experimentation may be necessary.

Do not use detergents, abrasive powders, highly perfumed cleaning products, wax polishes or products containing alcohol.

To Start the Appliance
1. Allow the appliance to stand for 12 hours after installation.
2. Plug in the appliance and switch on at the mains supply.
3. Turn the thermostat control to the required setting. A midway setting is usually suitable for normal operation (see thermostat control).
4. Leave the appliance for approximately 4 hours for the correct temperature to be reached before placing food inside.

Do not allow children to tamper with the controls or play with the product.
The Freezer Compartment

The symbol means that your freezer will store frozen food at -18 C (-0.4 C F) or colder allowing for long term frozen food storage and freezing of fresh food. The freezer temperature is controlled automatically by the thermostat situated in the control panel.

Due to the different installations, methods of usage and weather conditions, adjustments to the temperature settings may be required.

These are best assessed against a temperature reading on a thermometer buried in the frozen food. The reading must be taken quickly as the thermometer temperature will rise rapidly after removal.

Freezing Fresh Food

Place the fresh food on the freezer baskets. Food may need rearranging to achieve this.

During the freezing process the temperature of fresh food should be reduced quickly so that ice crystals are kept as small as possible to prevent damaging the structure of food. If freezing takes place slowly large ice crystals form and these will affect the quality of food once it has defrosted.

Packets to be frozen should be placed in the basket in contact with the baskets surface as far as possible and spaced apart to allow cold air to Circulate between them. They should not touch existing packets.

No harm will result if you forget to turn off the fast freeze switch after 24 hours, but for reasons of Economy, try to remember to turn it off when Freezing is complete.

Exceptionally large items can be stored by removing the upper basket.

Frozen food should not be refrozen once it has thawed out.

Do not remove items from the freezer if your hands are damp/wet, as this could cause skin abrasions or ‘frost/freezer burns’.

For safety reasons, the freezer baskets are fitted with stops but are readily removed by pulling them forward to the stop, then lifting the front and pulling all the way out. Re-fit by reversing this procedure.

Frozen Food Storage

Pre packed commercially frozen food should be stored in accordance with the manufacturer’s instructions for a 4 star frozen food compartment and should be put in the freezer as soon as possible after purchase. Your freezer provides for long term storage which generally means up to 3 months but the length of the time can vary and it is important to follow the recommended times shown on packets of commercially frozen food.

Do not place sealed containers or carbonated liquids such as fizzy drinks into the freezer as it creates pressure on the container which may cause it to explode resulting to the freezer.

Ice cubes and ice lollies should not be consumed immediately after removal from the freezer as it may result in low temperature skin abrasions.

Manufacturers storage times should be adhered to.

Hints and Tips

- Any opened packets of frozen food, should be rewrapped in airtight materials to prevent surface evaporation which causes drying or ‘freezer burn’.

- Frozen food which is allowed to thaw accidentally should either be used immediately or thrown away. Alternatively if the food is uncooked and has not been completely defrosted it can be cooked and then refrozen.

- Aim to check dates on packets and rotate food regularly. Although storage longer than recommended is not harmful, flavours and textures begin to change.
Defrosting the appliance

⚠️ Before any maintenance or cleaning work is carried out DISCONNECT the appliance from the ELECTRICITY supply.

Internal Cleaning
Clean the inside and accessories with warm water and bicarbonate of soda (5ml to 0.5 litre of water). Rinse and dry thoroughly.

⚠️ Do not use detergents, abrasive powders, highly perfumed cleaning products, wax polishes or cleaning products containing bleach or alcohol.

External Cleaning
Wash the outer cabinet with warm soapy water.

⚠️ Do NOT use abrasive products. There are sharp edges on the underside of the product so care should be taken when cleaning.

Once or twice a year dust the compressor at the back of the appliance, with a brush or Vacuum cleaner, as an accumulation of dust will Affect the performance of the appliance and Cause excessive electricity consumption

💡 To Defrost the Freezer

1. Wrap any food in layers of newspaper or blankets.
2. Switch the appliance off at the wall socket and remove the plug.
3. Open the freezer door.
4. Place a suitable container to collect the defrost water.
5. After defrosting, clean and dry the interior.
6. Switch the appliance on and replace any frozen food.

• Defrosting can be speeded up by putting bowls of hot (not boiling) water in the freezer and loosening the frost with a suitable plastic scraper.
• If the temperature of frozen food is allowed to rise during defrosting, its storage life may be shortened.

When the Appliance is Not in Use
When the appliance is not in use for long periods, disconnect from the electricity supply, empty all of the food and clean the appliance, leaving the door open prevent unpleasant smells.

Precautions and tips

⚠️ The appliance was designed and manufactured in compliance with international safety standards. The following warnings are provided for safety reasons and must be read carefully.

This appliance complies with the following Community Directives: - 73/23/EEC of 19/02/73 (Low Voltage) and subsequent amendments; - 89/336/EEC of 03.05.89 (Electromagnetic Compatibility) and subsequent amendments; - 2002/96/CE.
Hints and tips

Normal Operating Sounds
- You may hear faint gurgling or bubbling sounds when the refrigerant is pumped through the coils or tubing at the rear, to the cooling plate/evaporator or to the fixed freezer baskets.
- When the compressor is on, the refrigerant is being pumped round, and you will hear a whirring sound or pulsating noise from the compressor.
- A thermostat controls the compressor, and you will hear a faint ‘click’ when the thermostat cuts in and out.

Food Storage
- To obtain the best results from your appliance, neither hot foods nor liquids which may evaporate, should be placed in the compartment.
- Avoid buying frozen food if you cannot store it straight away. The use of an insulated container is advisable. When you arrive home place the frozen food in the freezer immediately.
- Keep the time between buying chilled food and placing it in your fridge as short as possible.
- Do not push food together too much, try to allow air to circulate around each item.
- Do not store food uncovered.
- Ensure that food placed in the freezer is dated and labelled and used in date order to ensure that food is consumed at its best.
- Remove suspect food from your refrigerator and clean, refer to cleaning and maintenance.

Energy Saving Advice
- Do not install the appliance close to sources of heat, such as a cooker, dishwasher or radiator.
- Locate the appliance in a cool well ventilated room and make sure that the air openings of the cabinet are not obstructed.
- Avoid unnecessary frosting in the cabinet by packing all foodstuffs into airtight packages before placing them in the freezer.
- Always leave warm food to cool down to room temperature before placing in the freezer.
- Food which is to be frozen (when cool) should be placed in the fridge before being transferred to the freezer.
- Thaw frozen food in the fridge. This will ensure safer defrosting of foods and reduce the work of the refrigeration unit.
- Try to avoid keeping the door open for long periods, or opening the door too frequently as warm air will enter the cabinet, and cause the compressor to switch on unnecessarily often.
- Ensure there are no obstructions preventing the door from closing properly.
- It is advisable to periodically clean the refrigeration system at the back of the appliance with a duster or vacuum cleaner.

In the Event of a Power Failure
If there is a power failure during the storage of frozen foods, keep the door closed. If the temperature within your freezer should rise do not refreeze the food without checking it’s condition. The following guidelines should assist you:
- Ice Cream: Once thawed should be discarded.
- Fruit and Vegetables: If soft should be cooked and used up.
- Bread and Cakes: Can be refrozen without danger.
- Shellfish: Should be refrigerated and used up quickly.
- Cooked Dishes: I.e. casseroles, should be refrigerated and used up.
- Large Pieces of Meat: Can be re-frozen providing there are ice crystals remaining within them.
- Small Joints: Should be cooked and then re-frozen as cooked dishes.
- Chicken: Should be cooked and re-frozen as a fresh dish.
Warning

- This appliance is not intended for use by persons (including children) with reduced physical, sensory or mental capabilities, or lack of experience and knowledge, unless they have been given supervision or instruction concerning use of the appliance by a person responsible for their safety. Children should be supervised to ensure that they do not play with the appliance.

- For compression-type appliances which use flammable refrigerants, instructions shall include information pertaining to the installation, handling, servicing.

- WARNING – Do not use mechanical devices or other means to accelerate the defrosting process, other than those recommended by the manufacturer.

- WARNING – Do not damage the refrigerant circuit.

- WARNING – Do not use electrical appliances inside the food storage compartments of the appliance, unless they are of the type recommended by the manufacturer.

- Appliances which use flammable insulation blowing gases, instructions shall include information regarding disposal of the appliance.

- Do not store explosive substances such as aerosol cans with a flammable propellant in this appliance.

- This appliance is intended to be used in household and similar applications.
If the appliance does not work, before calling for Assistance (see Assistance), check for a solution from the following list.

<table>
<thead>
<tr>
<th>Malfunctions:</th>
<th>Possible causes / Solutions:</th>
</tr>
</thead>
</table>
| **No power to the appliance**        | • Check there is power at the socket.  
• Check there is not a power cut by.  
• Checking the household lights.  
• Check the fuse has not blow.    |
| **The temperature in the freezer section is too high** | • Check the ambient temperature is within appliances operating limits of 16 to 32.  
• Relocate the appliance if necessary.  
• Check the thermostat is turned to the correct.  
• Setting relative to ambient conditions.   |
| **The freezer door will not open**   | • Has door just been opened?  
• If so leave for a few minutes to allow the air pressure to equalise. |
| **The compressor runs continuously** | • Adjust the thermostat to give correct temperature control.  
• Check that the door is closed.  
• Large quantities of food have recently been placed in the cabinet / and or door is frequently opened.  
• Check that air ventilation is not obstructed.   |
| **Excessive frost and ice has built up** | • Ensure the door is not left open.  
• Check that nothing is preventing the door from closing.  
• Is the door gasket intact and clean.  
• Has advised periodic defrosting been carried out. |
| **Noise**                            | • Refer to normal operating sounds.                                                        |
Guarantee

12 months Parts and Labour Guarantee

Your appliance has the benefit of our manufacturer’s guarantee, which covers the cost of breakdown repairs for twelve months from the date of purchase.

This gives you the reassurance that if, within that time, your appliance is proven to be defective because of either workmanship or materials, we will, at our discretion, either repair or replace the appliance at no cost to you.

This guarantee is subject to the following conditions:

- The appliance has been installed and operated correctly and in accordance with our operating and maintenance instructions.
- The appliance is used only on the electricity or gas supply printed on the rating plate.
- The appliance has been used for normal domestic purposes only.
- Any repair work must be undertaken by us or our appointed agent.
- Any parts removed during repair work or any appliance that is replaced become our property.
- The appliance is used in the United Kingdom or Republic of Ireland.

The guarantee does not cover:

- Damage resulting from transportation, improper use, neglect or interference or as a result of improper installation.
- Replacement of any consumable item or accessory. These included but not limited to: plugs, cables, batteries, light bulbs, fluorescent tubes and starters, covers and filters.
- Replacement of any removable parts made of glass or plastic.

THIS GUARANTEE WILL NOT APPLY IF THE APPLIANCE HAS BEEN USED IN COMMERCIAL OR NON-DOMESTIC PREMISES.

5 Year Parts Guarantee

Indesit also offers you a free 5 year parts guarantee. This additional guarantee is conditional on you registering your appliance with us and the parts being fitted by one of our authorised engineers. There will be a charge for our engineer’s time. To activate the extra parts warranty on your appliance, simply call our registration line on 08448 24 24 24 (Republic of Ireland 01 230 0800)

Extended Guarantees

We offer a selection of protection plans that enable you to fully cover yourself against the expense of repair bills for the life of your policy. To find the ideal plan for you please call our advice line on 08448 226 226 (Republic of Ireland 01 230 0233).

Free Helpdesk Service

We have a dedicated team who can provide free advice and assistance with your appliance if you experience any technical difficulties within the first 90 days of ownership. Simply call our Indesit Service Hotline on 08448 224 224 (Republic of Ireland 0818 313 413) for telephone assistance, or, where necessary, to arrange for an engineer to call.
After Sales Service

No one is better placed to care for your Indesit appliance during the course of its working life than us – the manufacturer.

Essential Contact Information

Indesit Service

We are the largest service team in the UK and Ireland offering you access to 400 skilled telephone advisors and 1000 fully qualified engineers on call to ensure you receive fast, reliable, local service.

Recycling and Disposal Information

As part of Indesit’s continued commitment to helping the environment, Indesit reserves the right to use quality, recycled components to keep down customer costs and minimise material wastage.

Please dispose of packaging and old appliances carefully. To minimise the risk of injury to children, remove the door, plug, and cut the mains cable off flush with the appliance. Dispose of these parts separately to ensure that the appliance can no longer be plugged into mains socket, and the door cannot be locked shut.
