CYBER STRATEGY PROGRAMME

Residential Induction: Cyber Fundamentals

16th & 17th November 2022 | 2 Full Days
Face to face. Garstang Country Hotel, PR3 1YE

You will spend two consecutive days immersing yourself into the key themes of the programme to develop your understanding and knowledge of the cyber threat landscape. As well as getting to know the other participants who will form a key part of the programme journey as you share challenges and ideas.

The sessions will be highly interactive, including real life case studies and demonstrations of hacking attacks to build your knowledge and awareness of the risk environment and the potential risk these may have to your business. We will introduce some of the key leadership themes essential to building a resilient business and mitigating against these risks.

The two days forms the foundation for the rest of the programme.

Before the next session you will have the opportunity to complete a benchmarking exercise which will be used to produce a tailored report that can form the basis of an action plan for your business.

The Cyber Leaders Toolkit: Understanding your Business

14th December 2022 | 9am-4.30pm
Face to face session at Lancaster University

Now with an understanding of cyber fundamentals, the focus shifts to your business. The session will focus on your business strategy to ensure you create a cyber-secure environment to grow your business.

Again, an interactive session which will enable you to create strategic focus helping you to ensure you realise business value. You will work through tools and a template that will help create a structured approach for your future business.

The Cyber Leaders Toolkit: Embedding Cyber Excellence

17th January 2023 | 9am-1pm
Online session - Microsoft Teams

This workshop will explore what it takes to develop a responsible organisational culture, instilling integrity within the organisation.

The session will look at how to communicate risk effectively to build trust and empower staff to take responsibility.

The Cyber Leaders Toolkit: Reviewing your Digital Estate

9th February 2023 | 9am-4.30pm
Face to face session at Lancaster University

Building on your cyber leaders toolkit from previous sessions, this session will provide you with the tools to define and understand the digital estate of your business. You'll also understand how cyber can be used as an enabler for growth and innovation so that you can prioritise where to implement cyber security within your business and create a winning USP. You will plan a 'Sprint' project to implement your ideas into your business.

Sprint Showcase & Reflection

22nd March 2023 | 9am-2pm
Face to face session at Lancaster University

To end the programme, you will deliver your Sprint presentations to your peers and consolidate your learning throughout the programme through group and individual reflection activities. The programme is designed so you take lessons, frameworks, and strategies and apply them to your business.

Group Sprint Check-In

Early March 2023 | Approximately 1 hour
Online Microsoft Teams check-in with Sprint buddy groups to review and evaluate progress

You'll take what you've learnt so far and the initial group sprint planning, to continue designing and building ideas for your business outside of the programme. Our team of cyber and business experts are available throughout this period and will book a check-in meeting with your team.

Date and time of this call to be confirmed with each individual Sprint buddy group.

Please note that workshop details may be subject to change.
