

GENDER MATTERS 2022

Dr Lara Pecis Professor Valerie Stead Melanie Wilkes

GENDER MATTERS

The Gender Matters project began in 2018 in response to a recognised need for inclusive business practices vis-à-vis the under-representation of women in positions of power.

In this third Gender Matters publication, we reflect on the progress of challenges identified in our second 2020 edition, including the gender pay gap, the leadership pipeline, and managing personal and professional lives.

FOREWORDS

VALERIE STEAD
Professor of Leadership,
Lancaster University
Management School

The Covid-19 pandemic has often stalled and, at best, slowed progress in tackling gender and inclusion challenges at work. This edition examines the entwined effects of the pandemic and increasing work insecurity, and the negative effects that Black and minority ethnic women experience with regards to their equal opportunities and ability to progress at work.

Inequalities in the labour market between women and men persist across participation, insecurity and pay. Set against the backdrop of the rising cost of living, falling real wages and an impending recession, there are inherent risks that these gender gaps widen. It is, therefore, more important than ever to stimulate policy and employer discussions to bring about change.

MEL WILKES
Head of Research,
Work Foundation

We're living in extremely challenging times and it's clear that women in low paid, insecure jobs are at the very sharp end of these pressures.

Our new analysis drawing on the UK Insecure Work Index, shows that working women are 1.8 times more likely to be in severely insecure work than men. Mothers are hit hardest: those with children under nine are nearly three times more likely than fathers to experience insecure work.

The gender insecurity gap can help us understand why, despite concerted efforts, steady increases in women joining the labour market hasn't translated to equality in pay or progression. A blinkered approach focusing only on progression and seats at the top table will only get us so far – to drive meaningful change and to achieve true equality for women, it's clear we need to tackle labour market insecurity.

LOPA PATELChair, Diversity UK

Gender Matters 2022 shines a light on the continued challenges women face in their working lives.

We see many women are stuck in insecure work, find it harder to progress within their careers and are still not represented at the top table. The figures are particularly stark for women from ethnic minority backgrounds who are more likely to be discriminated against and many report they are more likely to be passed over for promotion.

As a digital entrepreneur, I know what it feels like be the only woman in the room and I hope Gender Matters is a call to action for employers and policy-makers to continue to drive forward gender and race equality.

INEQUALITIES IN THE LABOUR MARKET

Inequalities in the labour market between women and men persist across participation, insecurity and pay.

1

Global gender gap in economic participation and opportunity

Although showing improvement overall, globally, progress towards parity in economic participation and opportunity is volatile.

THE LEADERSHIP PIPELINE

Women's progression into leadership roles continues to be slow with limited evidence of advancement during the Covid-19 pandemic. Black and minority ethnic women are those most negatively affected.

MANAGING THE PERSONAL AND THE PROFESSIONAL

The pandemic has exacerbated existing inequalities between women and men. This has affected almost all areas of life, rolling back on the hard-won achievements of past years. The figures show that lockdowns had significant impact on unpaid care and work-life balance.

Global impact of lockdowns on family responsibilities

On average, women spent 7.7 more hours a week than men on unpaid childcare last year.

The UK parenthood penalty

Mothers of children aged 9 or under were **2.7 times** more likely than fathers to experience severely insecure work.

Source: Work Foundation calculations of the ONS Labour Force Survey 2021/22.

Well-being at work in the UK

39% of Black and minority ethnic women stated their well-being had been impacted by a lack of progression compared to 28% of white women.

The pandemic and harassment at work in the UK

45% of women experienced harassment online through sexual messages, cyber harassment and sexual calls.

23% of women reported increased harassment of the pandemic while they were working from home.

ACKNOWLEDGEMENTS

The authors wish to thank Dr Diansha Wang and Heather Taylor for their support in compiling the data for this resource.

This brochure is supported by funding from the UKRI ESRC Impact Acceleration Account.

The Academy for Gender, Work and Leadership

The Academy for Gender, Work and Leadership is a vibrant research area of expertise at Lancaster University Management School, that includes national and international projects, research engagement and scholarly events. Our research focus on social justice is motivated by the persistent global challenge of gender inequality. In collaboration with national and international partners, our concern is to reveal and tackle gender inequalities in order to develop more equitable and fair organisations and ways of working.

The Work Foundation

The Work Foundation is a think tank focused on improving working lives across the UK through applied research and new ideas. For over a century, we have worked to break down the barriers individuals and communities face in accessing good work.

We believe everyone should have access to secure, rewarding and high-quality work. By engaging directly with workers, employers, policymakers and leading academics, we deliver rigorous applied research to tackle structural inequalities in the labour market and improve working lives across the UK.

We are part of Lancaster University's Management School, and work with a range of partners and organisations across our research programmes.

Diversity UK

Diversity UK is an equality charity that aims to research, advocate and promote ideas for improving diversity and inclusion in Britain. It is an evidence-based initiative that seeks to influence policy, enhance civic engagement and improve the perception of the minority ethnic community in Britain.

Diversity UK aims to advance the education of the public in diversity and inclusion in the workplace, in particular by carrying out research for the public benefit in all aspects of that subject and to publish the useful results.
