This document is intended to give an idea of the elements required from a Principal Investigator (PI) or Co-Investigator (CoI) and the support available from Research Services for developing a bid for external research funding either where the project is led by yourself as the PI or where you are invited to participate on a bid as a collaborator being led by another Department/HEI. If you are contacting RSO with a short deadline please note that the level of support you receive from your RDO may not be as extensive as that outlined above and your RDO may already be supporting other research proposals.
